

S&P Global Data via Snowflake

Convergence of the Cutting Edge: Data Meets Delivery

From the evolution of the punch card to the onset of big data itself, we've been here through it all. During this time, our mission has remained the same, to provide you cutting-edge solutions for your business needs. That's why we've collaborated with Snowflake to deliver you curated data via the cloud.

You need to capitalize on the explosion of big data and uncover additional insights that can give you an edge in today's ever-changing market. Quickly and efficiently gain access to data, including our quality traditional data, via Snowflake Data Marketplace.

- Through Snowflake, you are able to directly access and query S&P Global and select third-party data—eliminating the data ingestion process and significantly improving your productivity and efficiency. Snowflake's database architecture, which separates storage and compute, results in queries being more efficient; granting you more time for analysis.
- Snowflake allows for unlimited concurrency and infinite scalability when compared to traditional on-premise databases or non-Snowflake cloud solutions. Snowflake's availability in Amazon AWS, Microsoft AZURE, and Google Cloud allows you to leverage your cloud provider of choice.
- With access to the cloud from virtually anywhere, you can now eliminate the need to manage an expensive data warehouse—streamlining both your data and delivery needs.
- Snowflake supports ANSI SQL, meaning most common operations are supported in Snowflake which allows you to query data from the Data Marketplace without any transformation.

With S&P Global data via Snowflake, you can:

- **Reduce time to insights:** Get data faster to accelerate analytics and make more timely decisions
- **Eliminate data transformation:** With no need to extract and transform data before using, you can reduce the time, effort, and cost associated with data analytics
- **Improve operational efficiency:** Access to ready-to-query data gives you the ability to streamline data analytics operations and get value from your data faster
- **Streamline your workflow:** Directly integrate data into your existing views and workflows with access to over 80 third-party vendors such as Tableau and Alteryx

Datasets available via Snowflake

Data Type	Data Set	Coverage	Delivery Frequency	Coverage History
Financials	S&P Capital IQ Fundamentals	150,000+ companies globally, including over 95,000 active and inactive public companies	Intraday	1985
