Driven Brands Funding LLC/Driven Brands Canada Funding Corp. (Series 2020-2)

October 29, 2020

Preliminary Rating

| Class | Preliminary rating(i) | Balance (mil. \$) | Anticipated maturity | Legal maturity (years) |
|-------|-----------------------|-------------------|----------------------|------------------------|
| A-2 | BBB- (sf) | 450.00 | January 2028 | 30 |

Note: This presale report is based on information as of Oct. 29, 2020. The ratings shown are preliminary. Subsequent information may result in the assignment of final ratings that differ from the preliminary ratings. Accordingly, the preliminary ratings should not be construed as evidence of final ratings. This report does not constitute a recommendation to buy, hold, or sell securities. (i)The rating does not address post-ARD additional interest. ARD--Anticipated repayment date.

Executive Summary

Driven Brands Funding LLC's (Driven Brands, or the issuer) and Driven Brands Canada Funding Corp.'s (Canadian co-issuer) series 2020-2 issuance is a \$450.0 million corporate securitization of the Driven Brands Inc. (Driven) business out of its existing securitization vehicle from 2015. The main brands backing this securitization, as of the series 2020-2 transaction closing, will be Maaco, Meineke, 1 800 Radiator & A/C, CARSTAR, Take 5, ABRA, and, most recently, Uniban, P.H. Vitres d'Autos, and Fix Auto USA.

From the 2020-2 debt issuance, management has stated that it intends to use the proceeds to (1) repay in full the outstanding principal balances of the series 2015-1 and 2016-1 notes, plus any accrued and unpaid interest and any make-whole prepayment considerations for those series, (2) pay fees and expenses incurred in connection with the issuance of the 2020-2 notes, and (3) use any remainder for general corporate purposes, which may include future acquisitions. The series 2020-2 note issuance will result in leverage of approximately 6.7x on a debt/adjusted EBITDA basis, assuming the series 2019-3 class A-1 variable-funding note (VFN) remains fully drawn.

Debt repayment is supported by substantially all revenue-generating assets for the specified brands, including existing and future franchise income, product sales margins, and intellectual property.

Key credit features of the transaction include:

- A long operating history of over 45 years for the Meineke and Maaco brands, while the majority of the other brands in the system have an operating history of approximately 30 years.

Presale: Driven Brands Funding LLC/Driven Brands Canada Funding Corp. (Series 2020-2)

- Driven's large and developed franchise base, which is currently 84% franchised, down from 99% in 2015. This is due to a number of sizeable acquisitions that have been completed since the initial 2015-1 issuance.
- Stable historical systemwide sales with a cumulative average growth rate of approximately 10% since 2015.
- Geographic concentration, with the three largest states accounting for approximately 27.1% of systemwide sales as of Aug. 1, 2020.
- A contribution by the top 10 franchisees of approximately 7% to system-wide sales as of Aug. 1, 2020.
- The non-discretionary nature of the system's services and offerings.

Rating Rationale

The preliminary rating assigned to Driven Brands Funding LLC and Driven Brands Canada Funding Corp.'s \$450.0 million senior secured notes series 2020-2 reflect our assessment of:

- The brand strength: The strength of the Maaco, Meineke, 1 800 Radiator & A/C, CARSTAR, Take 5, ABRA, Uniban, P.H. Vitres d'Autos, and Fix Auto USA brands and the likelihood that the brands would survive a Driven Brands bankruptcy; and the brands' resulting capacity to continue generating sufficient cash flows from business operations, provided that adequate servicing remains in place.
- The business strength: when taken as a whole, the brands comprising Driven's collateral pool have a national presence in both the U.S. and Canada and generate substantial and reliable cash flow to the securitization.
- Resilience to a stressed economic environment: we believe a significant portion of the brands' sales can be considered non-discretionary, and thus likely to be more resilient to the continuing pandemic and current recessionary environment than sales for consumer brands driven by more discretionary spending.
- The managers' replicability: The managers' responsibilities are generally limited to sales, general, and administrative (SG&A) functions, which we believe increase the likelihood of successful replacement following a termination of the current managers. Additionally, the transaction has a backup manager--FTI Consulting Inc. (established at the 2015-1 transaction's closing)--that has reviewed the business' cost structure relative to the sizing of the management fee and believes it is adequate should the company need to step in.
- The legal isolation of the assets: As of the close of the 2020-2 transaction, substantially all of the business' cash-generating assets had been sold through a "true sale" to the securitization co-issuers and guarantors, which are bankruptcy-remote entities. This should decrease the likelihood that existing Driven Brands' creditors could disrupt cash flow to the securitization following a bankruptcy of a manager. Legal opinions related to the true sale and non-consolidation have been, or will be, provided before this transaction's closing.
- Asset performance not fully correlated with manager performance: A system of franchised stores will likely continue to generate cash flow following the managers' bankruptcy because individual franchisees generally operate independently from the managers (aside from SG&A functions, which we believe can be transferred to a backup manager).
- Cash flow coverage: Given the brands' strength, the replaceable nature of the managers, the income generated by the various brands that collateralize the transaction, and the legal isolation of the assets from the managers, we have projected long-term cash flows for the business. Our analysis incorporates cash flow haircuts reflecting our view of how the business' assets could weaken in adverse economic conditions. Under these conditions, our analysis shows the cash flows generated by the business are sufficient to meet all debt service obligations of the rated notes.
- Liquidity: A reserve account funded with three months of interest expenses and/or a letter of credit.

Presale: Driven Brands Funding LLC/Driven Brands Canada Funding Corp. (Series 2020-2)

As Driven's services are deemed essential by virtually all U.S. and Canadian jurisdictions, approximately 97% of locations remained open during the COVID-19 pandemic, and Driven reports that all are now open. Although the company has experienced some negative impact, especially in late March through mid-April weekly same-store sales, it has shown significant improvement from that time. The system is at approximately 97% of same store sales levels as of Sept 26, 2020.

S&P Global Ratings acknowledges a high degree of uncertainty about the evolution of the coronavirus pandemic. The current consensus among health experts is that COVID-19 will remain a threat until a vaccine or effective treatment becomes widely available, which could be around mid-2021. We are using this assumption in assessing the economic and credit implications associated with the pandemic (see our research here: www.spglobal.com/ratings). As the situation evolves, we will update our assumptions and estimates accordingly.

Industry Outlook

The auto aftermarket services industry is highly fragmented, with most companies accounting for a very small proportion of market share. The industry is mature, and barriers to entry are considered low as initial capital costs can vary depending on the scale of operations. Demand remains fairly stable; companies in the auto-part and services space are less susceptible to economic downturns, as consumers opt to maintain existing vehicles rather than purchase new ones. Secular trends, including the increasing age of vehicles on the road, growth in the number of annual miles travelled, and greater vehicle complexity, increase customer's reliance on trained technicians to service and maintain their cars.

Summary Of The Business

Driven, based in Charlotte, N.C., is a leading franchisor in the aftermarket automobile service and parts distribution industry, with national franchising platforms in the U.S. and Canada. The company offers various automotive services--including general repair and maintenance, automotive paint, collision, parts distribution, quick lube, and appearance refinishing services. The Driven system is 84% franchised, with approximately 3,229 operating locations across 49 U.S. states, all 10 Canadian provinces, one Canadian territory, and Puerto Rico as of Aug. 1 2020.

Driven's primary business is to serve as the franchisor of its brands. It franchises, owns, operates, and manages retail and service locations under the core service brands of CARSTAR, ABRA, Fix Auto USA, Maaco, Take 5, Meineke, 1 800 Radiator & A/C, P.H. Vitres D'Autos, and Uniban. Maaco and Meineke have continuously operated in their respective segments for over 40 years.

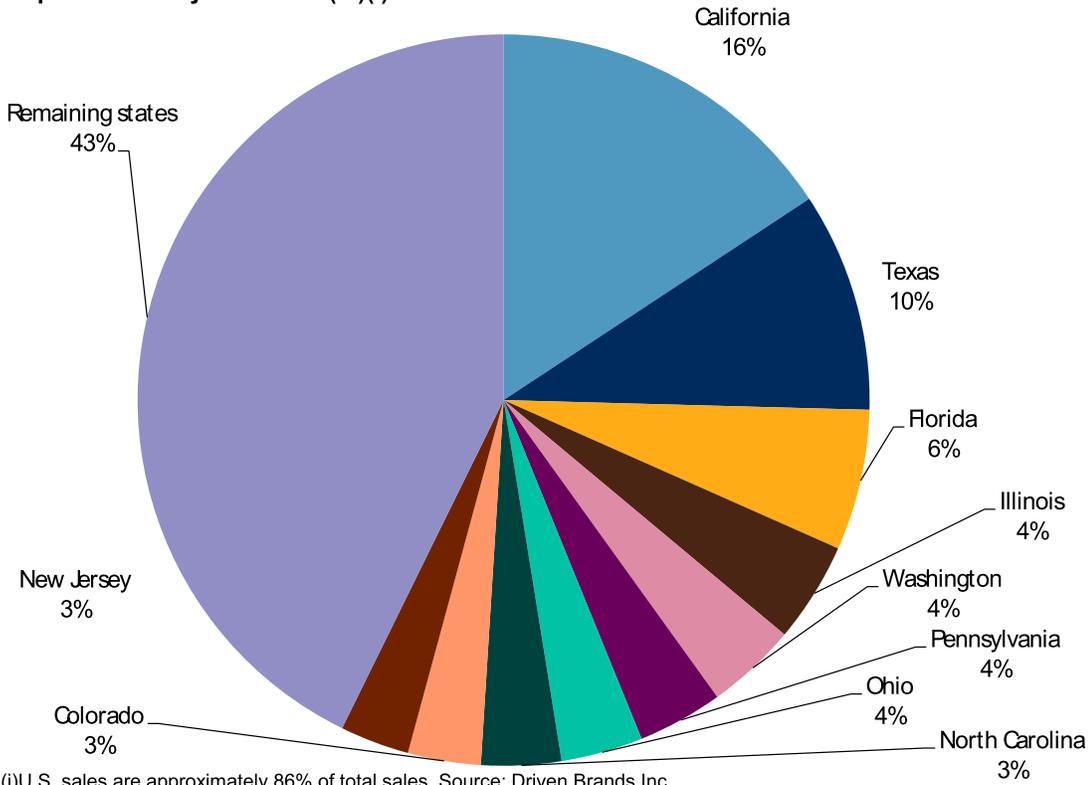

In the last year, Driven has executed several acquisitions, including ABRA (September 2019); Clairus, which includes the Uniban and PH Vitres D'Autos brands (November 2019); Automotive Training Institute (2019); and Fix Auto USA (2020). ABRA specializes in collision repair and maintains partnerships with major auto insurers. The ABRA acquisition included 55 automotive collision repair centers as well as all ABRA intellectual property. Clairus, a leader in automotive glass repair and replacement in Canada, operates in three segments: service, distribution, and claims management. The brand consists of approximately 220 units throughout Canada. Automotive Training Institute is a leading provider of financial and operational training services to the automotive maintenance, paint, and collision and glass markets. Fix Auto USA specializes in automotive collision repair and has over 150 locations across 12 U.S. states.

Driven operates in three segments: the maintenance segment, the platform services segment, and the paint, collision, and glass segment.

- Driven's maintenance segment is primarily comprised of the Take 5 and Meineke brands and services both retail and commercial customers such as fleet operators through 1,368 total branded locations. The company's maintenance services include oil changes and other regularly scheduled and as-needed services, including vehicle component repair and replacement.
- Driven's platform services segment is primarily composed of the 1-800-Radiator & A/C brand, PH Vitres D'Autos, and Spire Supply. This segment specializes in parts procurement and distribution as well as the training of automotive technicians. 1-800-Radiator & A/C had 198 branded locations as of Aug. 1, 2020.
- Driven's paint, collision, and glass Segment is primarily composed of the CARSTAR Brand, ABRA Brand, Fix Auto Brand, Maaco Brand, and Uniban Brands. This segment services both retail and commercial customers such as fleet operators and insurance carriers through 1,663 total branded locations. The company's collision services (CARSTAR, ABRA, and Fix Auto USA) include full collision repair and refinishing services; paint services (Maaco) include standard paint services, surface preparation protection and refinishing, and other cosmetic repairs; and the company's glass services (Uniban) include replacement, repair and calibration services for automotive glass.

Collateral

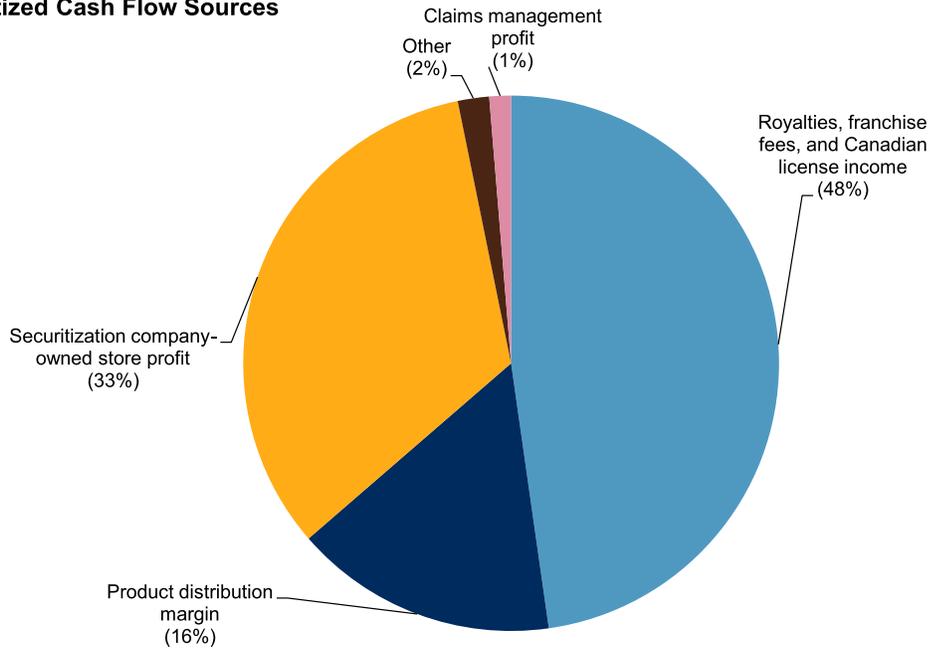

The notes will be secured by a security interest in substantially all of the assets of the master issuers and guarantors for the specified brands, both domestic and Canadian, including:

- Existing and future domestic franchise and development agreements for such brands;
- Existing and future domestic product sales margin for such brands;
- Existing and future intellectual property for such brands (including certain IT, license, and other income from royalties on Canadian trademarks);
- Profits from securitization-owned company stores and related store assets;
- Profits from Canadian distribution and Canadian claims management and related assets;
- Certain transaction accounts; and
- A pledge of the equity interests in each co-issuer and its subsidiaries.

Chart 5 illustrates the relative initial contributions of the various cash flow streams to the transaction.

Chart 5

Securitized Cash Flow Sources

(i) Other securitization revenues include information technology maintenance fees, fees received for certain advertising and insurance services provided by the managers on behalf of the franchisees, and collections related to note repayments made by franchisees and other franchisee payments as of the trailing 12-month period ended third-quarter 2020.

(See table 4 below for more details on each category of securitization collections.)

Prefunding Account

There is no prefunding account in this transaction.

Key Credit Considerations

Table 2

Key Credit Consideration

| Credit consideration | Discussion |
|------------------------|---|
| Long operating history | The brands in the Driven Brands Inc. portfolio were started over 30 years ago. The two main brands, Maaco and Meineke, were founded over 45 years ago. Since then, the brands have survived multiple economic downturns. This supports the likelihood that brand loyalty and, thus, sales will continue even in the event that Driven Brands Inc. is replaced as the manager. |
| Brand strength | Two of the flagship brands, Maaco and Meineke, were both founded in 1972 and are highly recognizable nationally. |

Table 2

Key Credit Consideration (cont.)

| Credit consideration | Discussion |
|--|--|
| High franchised percentage | Prior to the acquisition of Take 5 in 2016, Driven Brands Inc. was 99% franchised. This dropped to 86% as of June 2019, and it is currently 84% as of Aug. 1, 2020. We believe a high franchised percentage provides the transaction with better cash flow stability and independence from the managers than transactions with lower percentages of franchised stores. |
| ABRA, Uniban, P.H. Vitres D'Autos, and Fix Auto USA businesses | Based on their simple service offerings, low capital expenditures, and high profitability, these businesses are good additions to the existing Driven Brands Inc. portfolio. |

Credit Rating Methodology

The following table details our specific conclusions for each of the five analytical steps in our ratings process for Driven Brands Funding LLC/Driven Brands Canada Funding Corp.'s series 2020-2 transaction.

Table 3

Credit Rating Methodology

| Step | Result | Discussion |
|----------------------------|-------------------|--|
| Step one | | |
| Eligibility analysis | Pass | We believe that a system of franchised stores can continue to generate cash flows following the bankruptcy of the franchisor ("manager") because individual franchisees generally operate independently from the manager (notwithstanding their reliance on centralized general and administrative functions, which are transferable to a back-up manager). We believe that as long as a brand has sufficient customer loyalty, royalty revenues can continue to be available to service securitization debt assuming the assets have been isolated via a "true sale" to a bankruptcy-remote special purpose entity. Given that we do not believe substantially all cash flows from the system will be at risk following the bankruptcy of the manager, the following analysis quantifies the impact of the correlated cash flow decline from the Driven's system and compares that to ongoing required interest and principal payments to the rated debt. |
| Step two | | |
| BVS | 3 | Driven's BRP is currently fair, which maps to an unadjusted BVS of 4(i). We adjusted that BVS upward by one notch to 3 because the cash flows are primarily revenue-based and the system has demonstrated stability over more than 20 years. |
| Cash flow assumptions | See table 4 below | |
| Min. base DSCR | 1.87x | Principal and interest are fully paid in this scenario. |
| Anchor | 'bbb-' | Determined per table 1 of our corporate securitization criteria, "Global Methodology And Assumptions For Corporate Securitizations" published June 22, 2017. |
| Min. downside run DSCR | 1.57x | Principal and interest are fully paid in this scenario. |
| Step three | | |
| Resiliency score | Satisfactory | Determined per table 3 of the corporate securitization criteria. |
| Resiliency adjusted anchor | 'bbb' | Determined per table 4 of the corporate securitization criteria. |

Table 3

Credit Rating Methodology (cont.)

| Step | Result | Discussion |
|----------------------------|---------------|--|
| Step four | | |
| Modifier analysis | No adjustment | This structure is not an outlier from a leverage perspective, though leverage is on the higher end of the range for Driven's peer group. The anticipated repayment date and the transaction structure are all comparable to similarly rated deals. Also, Driven has shown a strong track record of cash generation and deleveraging. |
| Step five | | |
| Comparable rating analysis | 1 notch | Driven's overall profile, including its system size, AUV, royalty rates, franchised percentage, and recent performance, are typical of its peer group; however, its highly acquisitive strategy has the potential for performance volatility in the near term, relative to those peers, which typically grow more organically, until new systems are fully integrated. Thus we apply one downward notch for a preliminary rating of 'BBB- (sf)'. |

(i)The mappings from BRP to BVS are: excellent=1; strong=2; satisfactory=3; fair=4; weak=5; and vulnerable=6. BVS--Business volatility score. BRP--Business risk profile. DSCR--Debt service coverage ratio. AUV--Average unit volume.

Table 4

Cash Flow Assumptions

| Asset cash flow category | Cumulative decline (%) | | Description |
|---|------------------------|------------------|---|
| | Base case | Downside case(i) | |
| Royalty revenue and fees | 0 | 15 | Franchise and company-owned store royalties, which constitute a majority of the overall projected cash flow, are a function of store count, AUV, and royalty rates. |
| Contributed store securitized-adjusted EBITDA | 0 | 30 | Profits from contributed company-owned stores. |
| Other securitization revenues | 0 | 30 | Any other collections from franchisees. |

(i)For the downside case, we applied periodic stresses to non-U.S. license income to address the risk of foreign exchange rate volatility; we assumed foreign currency depreciation rates consistent with our criteria "Foreign Exchange Risk In Structured Finance--Methodology And Assumptions" published April 21, 2017. AUV--Average unit volume.

Sensitivity Analysis

Sensitivity run 1: Management fee stress

Using the base-case assumptions in table 4 above, we determined that the management fee could be increased by as much as 266% (translating to an approximately 58% reduction in net securitized cash flow relative to the base case) without any impact on the transaction's ability to pay timely interest and full principal payments by the legal final maturity. In our opinion, the additional management fee stresses could occur if Driven experienced a bankruptcy. While the management fee is currently outlined in the transaction documents, we believe that it may be possible that such fees might be renegotiated in a potential bankruptcy scenario.

Sensitivity run 2: Event-driven stress

Starting with the base-case scenario assumptions, we determined the maximum haircut to cash flow that would allow timely interest and full principal payments by the transaction's legal final maturity date. This haircut to cash flow after fees is approximately 57%. We examined several event risks associated with cash flow losses, including royalty losses from the top three geographies by store count and from the top 10 franchisees. Under these scenarios, our analysis showed that the transaction could pay timely interest and full principal by the legal final maturity date.

Additional Sensitivity runs: COVID-19 Related Stresses

As part of our review, we performed several analyses to determine the resilience of the structure given the economic stresses resulting from COVID 19. These included additional liquidity and break-even runs. S&P Global Ratings' analysis suggests that the decline in securitization collections would need to exceed 83% for an interest shortfall to occur over the coming six months. Given that break-even value, we believe it is unlikely that the transaction will experience an interest shortfall over that timeframe. Additionally, our analysis indicated that the transaction could withstand a 10% decline in retained collections over the life of the deal before it would lead to a one-notch reduction in our resilience-adjusted anchor (without consideration to any modifier or comparable ratings adjustments).

Structural Protection Summary

The structural features and credit enhancements (summarized in table 5) are generally consistent with those of other recently rated corporate securitizations.

Table 5

Structural Features

Test

| | |
|--|--|
| Rapid amortization DSCR trigger (P&I) | 1.20x or system-wide sales < \$640 mil. |
| Cash flow trapping DSCR trigger (P&I) | 1.75x (50% trap); 1.5x (100% trap) |
| Senior leverage ratio nonamortization test (total ABS debt/SNCF) | 5.00x (no scheduled amortization if the senior leverage is less than or equal to this level) |
| ARD horizon(i) | Seven years |
| Scheduled amortization through ARD (%) | 1.0 |
| Manager termination DSCR trigger (IO) | 1.2x |
| Event-of-default DSCR trigger (IO) | 1.1x |

Table 5

Structural Features (cont.)

Test

| | |
|----------------|--|
| Management fee | The management fee, which includes both fixed and variable components, is a function of the retained collections of both the U.S. and Canadian operations. According to the transaction documents, the U.S. portion of the management fee has a fixed component of \$8.5 million annually, and the variable component is assumed to be \$14,375 per \$100,000 of retained collections in the form of U.S. collections. The Canadian portion of the management fee has a fixed component of CAD\$2.0 million and a variable component of CAD\$19,165 for every CAD\$133,000 of retained collections in the form of Canadian collections. Both the U.S. and Canadian portions of the management fee are subject to 2% annual increase of the fixed component if the increased amount does not exceed 35% of retained collections in the preceding four quarterly collection periods. |
|----------------|--|

(i)The failure to pay the notes in full by their applicable ARDs constitutes a rapid amortization event, but not an event of default. Given a rapid amortization event, the class A-1 notes would be retired first, and then pro rata rapid amortization will begin for all class A-2 tranches (for all outstanding series, including series 2018-1, 2019-1, 2019-2, and 2020-1). DSCR--Debt service coverage ratio. P&I--Principal and interest. ARD--Anticipated repayment date. IO--Interest only. SNCF--Securitized net cash flow.

Payment Priority

The series 2020-2 class A-2 notes and the notes currently outstanding that were previously issued by Driven Brands Funding LLC and Driven Brands Canada Funding Corp. (including the class A-2 notes from series 2018-1, 2019-1, 2019-2, and 2020-1, as well as the class A-1 notes from 2019-3) will pay interest and principal quarterly from weekly distributions in the priority shown below (see table 6).

Currently, the transaction includes no senior subordinated or subordinated notes; however, the transaction may issue these notes if certain conditions are met.

Table 6

Payment Priority

| Priority | Payment |
|----------|--|
| 1 | Solely related to indemnification amounts, release prices, asset dispositions proceeds, and insurance/condemnation proceeds: (a) from the U.S. collection account to the trustee, then the servicer for unreimbursed advances; (b) from the U.S. collection account to the U.S. manager for any unreimbursed manager advances and from the Canadian collection account to reimburse the Canadian manager for any unreimbursed manager advances; (c) from the applicable collection account, if on or after a class A-1 note renewal date, principal on the class A-1 notes; (d) from the applicable collection account, to prepay the outstanding principal amount of all other senior notes in alphanumerical order; (e) from the applicable collection account, to prepay the outstanding principal amount of all senior subordinated notes of each class on a pro rata basis in alphanumerical order; and (f) from the applicable collection account, to prepay the outstanding principal amount of all subordinated notes of each class on a pro-rata basis in alphanumerical order. |
| 2 | (a) From the U.S. collection account to the trustee, then the servicer for unreimbursed advances; (b) from the U.S. collection account to the U.S. manager for any unreimbursed manager advances, and from the Canadian collection account to the Canadian manager for any unreimbursed manager advances; and (c) from the U.S. collection account to the servicer all servicing fees, liquidation fees, and workout fees. |
| 3 | From the U.S. collection account to pay the U.S. successor manager transition expenses, if any, and from the Canadian collection accounts to pay the Canadian successor manager transition expenses, if any. |
| 4 | Weekly management fees, from each respective U.S. and Canadian collection account. |

Presale: Driven Brands Funding LLC/Driven Brands Canada Funding Corp. (Series 2020-2)

Table 6

Payment Priority (cont.)

| Priority | Payment |
|-----------------|--|
| 5 | Capped from the applicable collection account, securitization operating expense amount; and, as long as an event of default has occurred and is continuing, to the trustee the post-default capped trustee expense amount. |
| 6 | From the applicable collection account, senior notes accrued quarterly interest amount and the class A-1 note accrued quarterly commitment fees amount. |
| 7 | From the U.S. collection account, the capped class A-1 note administrative expenses amount. |
| 8 | From the applicable collection account, senior subordinated notes accrued quarterly interest amount, if any. |
| 9 | From the U.S. collection account, the senior note interest reserve account deficit amount and the senior subordinated note interest reserve account deficit amount, in alphanumerical order of designation. |
| 10 | From the applicable collection account, the senior notes accrued scheduled principal payment amount; any senior notes scheduled principal payment deficiency amount; amounts then known by the managers that will become due under any class A-1 note purchase agreement before the immediately succeeding quarterly payment date with respect to the cash collateralization of letters of credit issued under such class A-1 note purchase agreement; and in respect of any series of class A-1 notes for which their renewal date has not occurred, any outstanding amounts due and payable in respect of principal for such series. |
| 11 | Supplemental management fees, if any, from the respective collection account. |
| 12 | From the applicable collection account, on or after any class A-1 notes renewal date, if the class A-1 notes have not been repaid on or before such date, all remaining amounts to the class A-1 notes until their outstanding principal amount is reduced to zero. |
| 13 | From the U.S. collection account, if no rapid amortization has occurred and is continuing, during a cash-trapping period, the cash-trapping amount of the issuer into the U.S. cash trap reserve account, and to deposit into the Canadian cash trap reserve account an amount equal to the Canadian co-issuer's cash trapping amount, if any on such weekly allocation date. |
| 14 | From the U.S. collection account, if a rapid amortization has occurred and is continuing, all remaining amounts to pay-down the class A-1 notes, then to pay-down the senior notes, and then to pay-down any senior subordinated notes. |
| 15 | From the applicable collection account, as long as no rapid amortization event has occurred and is continuing, any senior subordinated notes accrued scheduled principal payment amount; and then senior subordinated notes scheduled principal payment deficiency amount, if any. |
| 16 | From the applicable collection account, subordinated notes accrued quarterly interest amount, if any. |
| 17 | From the applicable collection account, as long as no rapid amortization event has occurred, the subordinated notes' accrued scheduled principal payment amount, if any; and then the subordinated notes' scheduled principal payment deficiency amount, if any. |
| 18 | From the U.S. collection account, if a rapid amortization has occurred and is continuing, all remaining amounts to pay down the subordinated notes, if any. |
| 19 | From the U.S. collection account, or Canadian collection account in respect of any Canadian direct payment amount, uncapped securitization operating expenses. |
| 20 | From the U.S. collection account, uncapped class A-1 note administrative expenses amounts. |
| 21 | From the U.S. collection account, class A-1 notes other amounts. |
| 22 | From the U.S. collection account, after the ARD, any senior notes accrued quarterly post-ARD additional interest amount. |
| 23 | From the U.S. collection account, after the ARD, any senior subordinated notes accrued quarterly post-ARD additional interest amount. |
| 24 | From the U.S. collection account, after the ARD, any subordinated notes accrued quarterly post-ARD additional interest amount. |
| 25 | From the U.S. collection account, any unpaid premiums and make-whole prepayment consideration. |

Table 6

Payment Priority (cont.)

| Priority | Payment |
|----------|---|
| 26 | From the Canadian collection account, to deposit to the Canadian product sourcing lease expense account and the Canadian claims management lease expense account, respectively, an amount equal to any previously accrued and unpaid rent, tenancy costs, or other similar costs and expenses of the Canadian product sourcing business and the Canadian claims management business, together with any such amounts that are expected to be payable prior to the last day of the immediately following fiscal month. |
| 27 | In the case of available funds with respect to the U.S. collection account, to the Canadian co-issuer the amount of any shortfall payments and any accrued interest thereon made by the Canadian co-issuer on any prior weekly allocation date or quarterly payment date, or any other applicable date, and not previously reimbursed, and in the case of available funds with respect to the Canadian collection account, to the issuer the amount of any shortfall payments (and any accrued interest thereon) made by the issuer on any prior weekly allocation date or quarterly payment date, or any other applicable date, and not previously reimbursed. |
| 28 | From the Canadian collection account, to pay the excess Canadian weekly management fee. |
| 29 | Any remaining funds at the direction of the co-issuers. |

ARD--Anticipated repayment date.

Surveillance

We will maintain active surveillance on the rated notes until the notes mature or are retired. The purpose of surveillance is to assess whether the notes are performing within the initial parameters and assumptions applied to each rating category. The transaction terms require the issuer to supply periodic reports and notices to S&P Global Ratings for maintaining continuous surveillance on the rated notes.

We view Driven's performance as an important part of analyzing and monitoring the performance and risks associated with the transaction. While company performance will likely have an effect on the transaction, other factors such as cash flow, debt reduction, and legal framework also contribute to our overall analytical opinion.
