What is an Official Selling Price (OSP)?

Many state-owned oil companies (NOCs) price crude oil sales to long-term customers using an official selling price (OSP) for each of their major crude streams. These OSPs are typically set by each oil company on a monthly basis after an official meeting and then circulated to long-term customers. OSPs are generally only sent to the registered lifters of the company's crude grade, joint venture partners, major trading exchanges and to news agencies like Platts and are not otherwise made publicly available. While some OSPs are published as a premium or discount to a major pricing benchmark like Platts Dated Brent or Platts Oman/Dubai, others are published as outright prices or derived from prices on a futures exchange.

What does an OSP premium (or discount) represent?

Crude oil producers typically price long-term contracts using price markers that are generated from spot market activity. In the Middle East, for example, many NOCs use Dubai and Oman

as the spot price marker for crudes shipped to Asia and Brent for crude oil shipped to Europe. Frequently, NOCs will release different OSPs for different refining regions. OSPs are normally announced as a premium or discount to a monthly average for the relevant price markers. This differential is meant to capture any differences in quality, supply and demand, and any differences between the loading period of the crude oil being priced and the reference spot market.

When are OSPs published?

Platts aims to publish OSPs as soon as they are made available. Each NOC publishes their OSPs at different times of the month, but this can vary depending on market conditions. Most OSPs are published proactively, meaning that they are published in advance of loading. For example, the August OSPs for Saudi Arabia's Arab Medium crude will be released in July. The table below lists when producers typically issue their OSPs and includes the Platts Global Alert pages where they can be

located. Platts publishes both the monthly OSP differential once it is released and an outright price once the full pricing month has passed. Using the example above, Platts will publish the August OSP differentials for Arab Medium in July, but will not publish the outright August OSP until the first working day of September, once all days in August have been priced.

How does Platts use OSPs?

Platts does not assess OSPs; Platts simply republishes the OSPs released by the state-owned oil companies for informational purposes. Further, Platts does not publish an exhaustive list of all of the OSPs issued by each NOC. OSPs do not represent spot market value, and are thus not used by Platts in the assessments of our assessed prices, but they can factor into some of the models Platts uses to generate cracking margins and netbacks. Additionally, OSPs can often give a clear indication of where NOCs are seeing demand for different crude streams, and can be a valuable indicator for changing market trends.

Global Crude Oil OSPs

Indonesia releases a list of OSP differentials -- Minas, Ardjuna, Duri, Attaka, Belida, Senipah Condensate and Banyu Urip -- to Dated Brent, but also releases the reference price of Dated Brent. The balance of its OSPs are set relative to these main grades. Platts publishes all Indonesian OSPs as outright prices only.

Global	1062	Tapis	AAQTJ00	AAILV00	N/A	M	M-1	2nd of the month

Petronas issues MCO OSP Alpha one month in advance of loading, which represents the all crudes within the basket. Petronas then issues outright OSPs for all crude oil grades following the month of loading.

Mexico - PEMEX Internacional (PMI)

Asia	1064	Maya	AAIQD00	AAIOK00	Platts Oman/Platts Dubai	M	M-1	15th of the month
Asia	1064	Isthmus	AAIQE00	AAIOL00	Platts Oman/Platts Dubai	M	M-1	15th of the month
Europe, India & the Middle East	1064	Maya	AAIQB00	AAIOI00	ICE Brent	M	M-1	15th of the month
Europe, India & the Middle East	1064	Isthmus	AAIQC00	AAIOJ00	ICE Brent	M	M-1	15th of the month
Europe, India & the Middle East	1064	Olmecca	AAAXNH00	AAAXJX00	ICE Brent	M	M-1	15th of the month
US	1064	Maya	AAIPY00	AAIRM00	Argus WTI Houston	M	M-1	15th of the month
Europe, India & the Middle East	1064	Isthmus	AAIPZ00	AAISC00	Argus WTI Houston	M	M-1	15th of the month
Europe, India & the Middle East	1064	Olmecca	AAIQA00	AAIRN00	Argus WTI Houston	M	M-1	15th of the month
Europe, India & the Middle East	1064	Isthmus (West Coast)	AAAXNG00	AAAXJW00	Argus WTI Houston	M	M-1	15th of the month

Pemex publishes a monthly adjustment factor (k) for each type of crude oil and destination.

For Asia, Platts uses the following formula to calculate outright Mexican prices: (Oman+Dubai)/2+k

For Europe, India & the Middle East, Platts calculates its outright Mexican prices using the following formula: ICE Brent+k

For the US, Platts uses the following formula to calculate outright Mexican prices: (0.65*WTI MEH)+(0.35*ICE Brent)+k
