S&P Global Energy CERA Titan

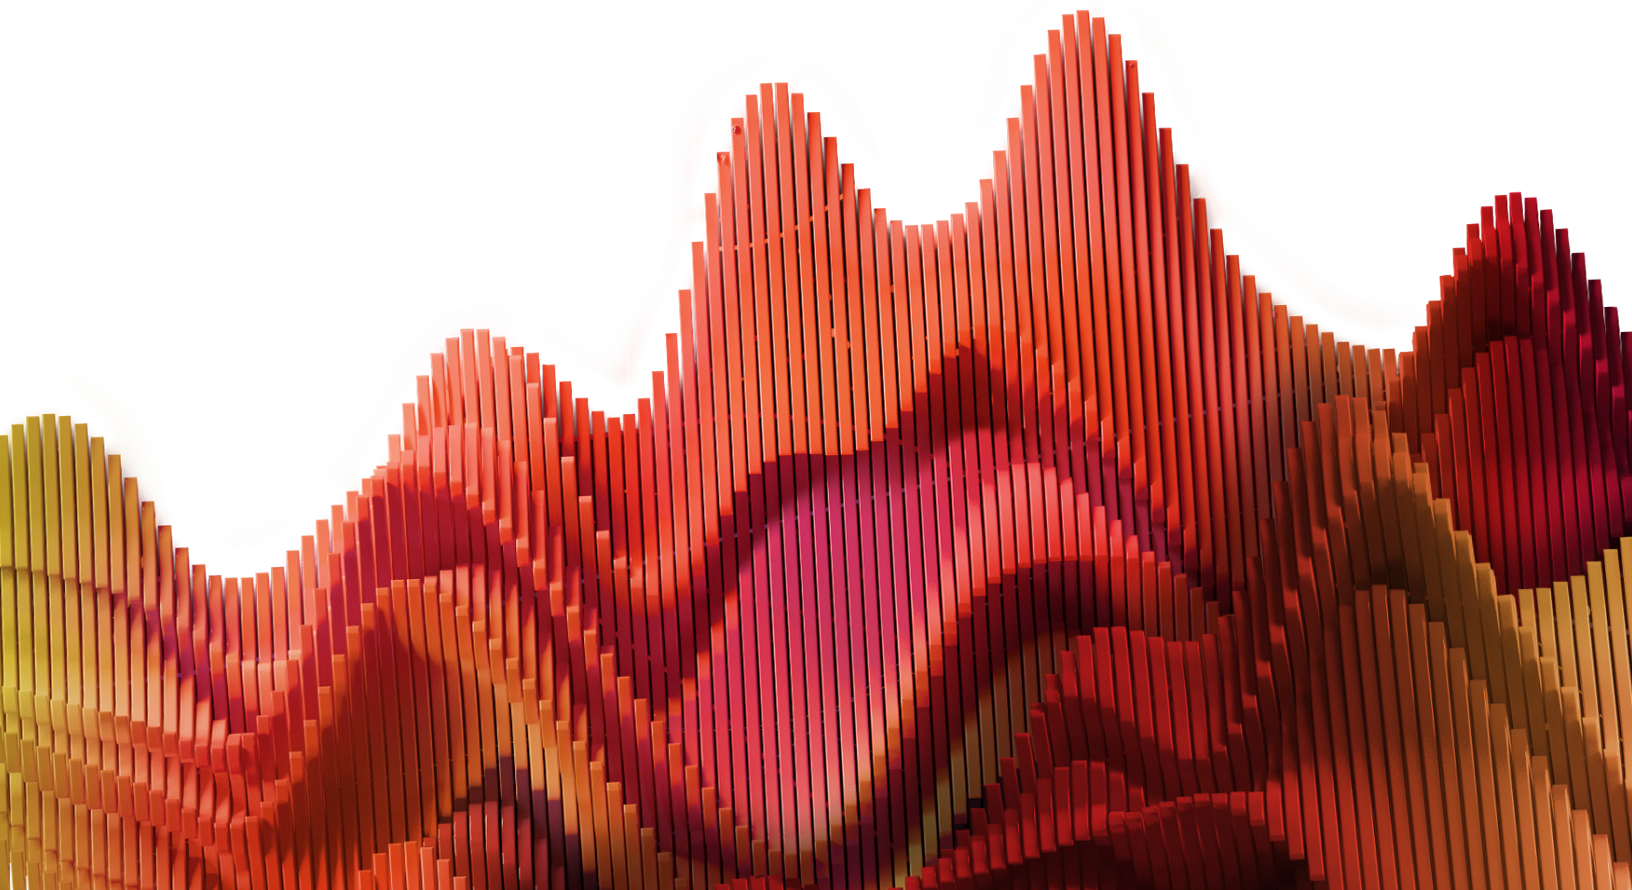
Harness the power of unified upstream intelligence.

CERA

S&P Global Energy

Upstream teams aren’t short on data.

They’re short on time.



You know S&P Global Energy for its trusted, world-class upstream data, spanning every well, basin, asset and market. It underpins how the industry screens opportunities, evaluates assets and makes confident decisions.

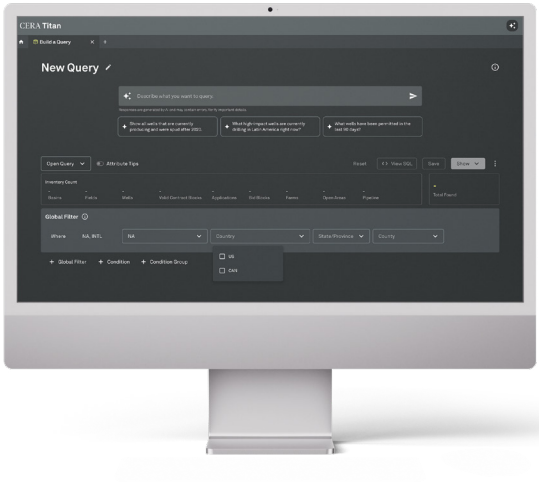
Yet, your intelligence is still fragmented across systems and workflows. Context is disconnected. Time is lost switching tools and rebuilding the full picture, just to move one decision forward. Even when the insight is there, action takes too long.

Introducing S&P Global Energy CERA Titan.

Intuitive by design. Powered by world-class data. Driven by revolutionary AI.

The CERA Titan Advantage

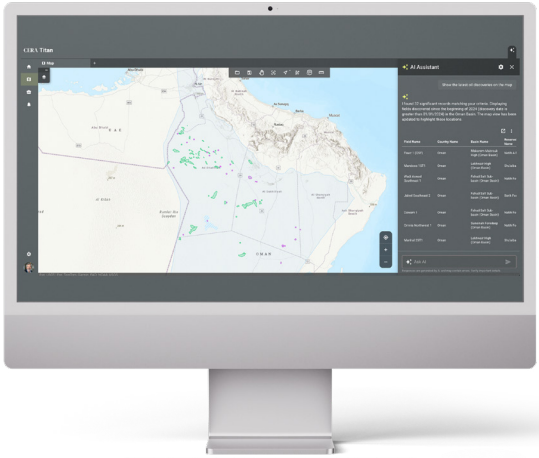
Five ways Titan will revolutionize your workflow



1 Upstream data. Extracted.

Unify data, context and workflows across disciplines. Eliminate fragmentation.

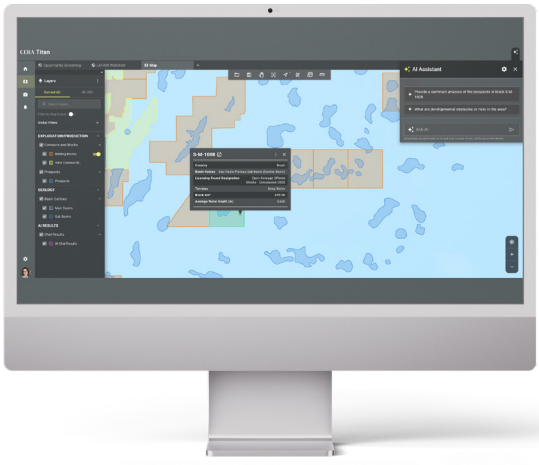
Through CERA Titan, you'll gain access to S&P Global Energy's trusted data across subsurface and commercial workflows through one map-centric platform. Instead of switching between tools, you can now streamline your workflow through a singular login.



2 Upstream AI. Unprompted.

Gain a discovery partner in proactive AI. Re-architect decision workflows.

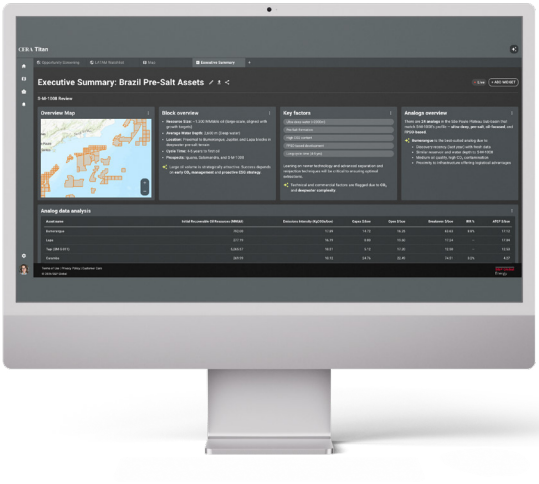
With proactive AI, CERA Titan enables a dynamic dialogue, and prompts opportunities, extracting the details of activity shifts across acreage, wells and competitors, so decisions happen faster and with greater confidence.



3 Upstream intelligence. Mapped.

See data come alive on intelligent maps. Reduce hesitation and accelerate alignment.

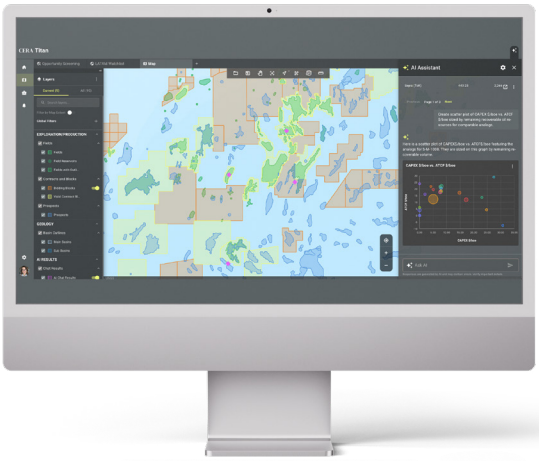
CERA Titan connects subsurface, commercial and market datasets on geospatial maps that highlight signals, changes and patterns as they happen, so you don't have to search for them.



4 Upstream Advantage. Scaled.

Gain decision advantage in a tighter, more volatile environment.

CERA Titan is a platform built for shorter cycles, higher stakes and increased complexity. It allows you to screen basins, visualize assets and drill into subsurface, technical and commercial detail — all in one continuous flow.



5 Upstream decisions. Transformed.

Make decisions faster, smarter and more confidently.

Built on S&P Global Energy's trusted data estate, CERA Titan connects global scale with basin-level clarity, so you can act with confidence across regions, assets and opportunities. Turn global upstream data into decision-ready intelligence.

One interface.
Infinite insights.

Screening

CERA Titan by the numbers

Uncover opportunities early with an intuitive end-to-end experience.

- Proactive Competitive Alerts
- Spatial Lease Screening
- Automated Ownership Audit
- AI-Assisted Chain of Ownership

Accelerate discovery with natural-language insights and integrated analytics.

- Natural-Language Regional Screening
- Integrated Reservoir Dashboard
- AI-Enhanced Data Visualization
- Analogue Comparisons and Validation

Extract more insights with proactive alerts, strategic market signals and spatial assessments.

- Proactive Licensing Alerts
- Macro-Level Dashboard Overview
- Spatial Block Evaluation

About S&P Global Energy

At S&P Global Energy, our comprehensive view of global energy and commodities markets enables our customers to make superior decisions and create long-term, sustainable value.

Our four core capabilities are: Platts for pricing and news; CERA for research and advisory; Horizons for energy expansion and sustainability solutions; and Events for industry collaboration.

S&P Global Energy is a division of S&P Global (NYSE: SPGI). S&P Global enables businesses, governments and individuals with trusted data, expertise and technology to make decisions with conviction. We are Advancing Essential Intelligence through world-leading benchmarks, data and insights that customers need in order to plan confidently, act decisively and thrive economically in a rapidly changing global landscape.
