

# Panjiva Supply Chain Intelligence via Xpressfeed™

## Intelligent supply chain data, seamlessly delivered.

### Robust global supply chain data

Panjiva data contains global transaction details of goods traded across borders, with information such as buyers and sellers, product descriptions, values, and more, to help you understand the associations among global trading relationships.

Coverage includes:

- Over 1 billion transaction records
- 13 million company-to-company relationships
- Approximately 40% of global merchandise traded by dollar value\*

### Country sources include:

- USA
- China
- Mexico
- India
- Brazil
- Chile
- Colombia
- Costa Rica
- Ecuador
- Panama
- Paraguay
- Peru
- Uruguay
- Venezuela

### Powerful Xpressfeed delivery

Xpressfeed provides a single integrated data source in item level transaction files. The comprehensive data warehouse includes the foundational data sets required to power sophisticated quantitative research and modeling. Information is delivered in packages so you can customize and receive only the data you want and need.

With Xpressfeed, you can:

- Take advantage of the industry's most comprehensive database of corporate actions and security mappings
- Leverage a cross-reference suite of products that will allow you to link across entities using a variety of entity level identifiers
- Reduce time spent on backtesting and focus on factor model creation

\*The assumptions in this analysis are calculated using proprietary algorithms in addition to 2016 Global Merchandise Trade by Value data reported to UN Comtrade, the International Trade Statistics database, by the participating governments. Using a factor between 1 and 0.46, we have made these assumptions as of August 28, 2018, to calculate the global merchandise traded by dollar value coverage. Based on availability of the underlying data, these assumptions are subject to change.

### Unstructured data, differentiated insight

Panjiva leverages supervised and unsupervised machine learning technologies to surface key insights from unstructured supply chain data.

### With Panjiva Supply Chain Intelligence, you can:

- View total import and export data to analyze global supplier and customer networks or evaluate details on product lines
- Map company supply chain data to stock price movements
- Leverage supply chain data as indicator of company inventory activity, COGS, or revenue
- Enhance your risk or investment models to better understand relationships in the supply chain
- Identify higher risk counterparties

### Linking capabilities that unlock connections

S&P Global Market Intelligence's Cross-Reference Services helps you understand connections in the global supply chain with robust linking capabilities.

With powerful and flexible delivery via Xpressfeed, you can combine timely information from the global supply chain with existing S&P Global datasets, coupled with your own datasets to create unique, forward-looking insights.

### Key benefits:

- Save time with our extensive linked reference data and gain valuable perspective on business relationships
- Validate, reconcile, and link data for a streamlined workflow

### Service you can count on

Nothing satisfies us more than helping you complete a project or meet a deadline. Turn to our 24x7x365 global support team anytime, from anywhere. We're just a phone call or email away.

## About S&P Global Market Intelligence

S&P Global Market Intelligence integrates financial and industry data, research, and news into tools that help track performance, generate alpha, identify investment ideas, understand competitive and industry dynamics, perform valuation, and assess risk.
