

Transform ideas. Pursue excellence.

Excellence requires more than a sharp mind. And in today's competitive world of academia, excellence requires access to respected data. For faculty, data transforms ideas into groundbreaking research and a challenging curriculum. For students, it can bring about top marks and career opportunities. For librarians, it defines a comprehensive reference catalog in the digital age. Whether in the finance lab, classroom or library, we not only provide the data, but we make you smarter with every click.

Data and research

Compustat financials

- Fundamental and market data on 32,500+ North American public companies and 42,000+ non-North American, with 5,000+ data items

Access and tools

S&P Capital IQ platform

Revolutionize your business program with access to the same comprehensive information on companies, markets and people worldwide that analysts and investors use on Wall Street. Conduct research in a lab or on your own personal computer to define curriculum, complete assignments or explore prospective employers.

Market Intelligence platform

Dive deep into our sector intelligence on industries essential to the global economy. Conduct relevant analysis using industry-specific metrics and tools that go deeper than generalist data allows. Supplement with proprietary news and research to get a more comprehensive view of the subject.

Bulk data delivery

Access our data in a research-friendly format through our partnerships with Wharton Research Data Services (WRDS) or Chicago Booth's Center for Research in Security Prices (CRSP). These platforms are built to easily deliver the data you need for comprehensive research.

Research Insight

Quickly create custom analysis using our powerful financial modeling application. Evaluate company performance, produce in-depth peer comparisons and conduct long-term, actionable backtest research to broaden and enhance your analysis.

About S&P Global Market Intelligence

S&P Global Market Intelligence integrates financial and industry data, research, and news into tools that help track performance, generate alpha, identify investment ideas, understand competitive and industry dynamics, perform valuation, and assess risk.
