Credit Analytics

How do you manage your credit risk?

Whether you’re looking to assess probability of default (PD) risk of unrated, or private companies with limited financials, generate a point-in-time credit risk view for public companies, or understand the impact of climate change on a company’s creditworthiness, Credit Analytics blends cutting-edge models with robust data to help you reliably score and efficiently monitor your potential risk exposure to counterparties and investments across the globe.
Get a detailed picture of your credit risk exposure

Our powerful analytical models, unrivalled data and sophisticated workflow tools help you to quickly and easily measure the credit risk of rated, unrated, public and private companies across the globe.

**Smart tools for smart decisions**

Get a detailed picture of your credit risk exposure with a range of dynamic analytical models that generate credit risk indicators to help you stay one step ahead of credit risk.

- Market- and fundamentals-driven analytical models deliver PD and credit scores that broadly align with ratings from S&P Global Ratings
- Early warning indicators to monitor credit deterioration, enabling you to act fast and with confidence
- Transparency into the drivers of default risk and the ability to conduct scenario analyses
- Loss Given Default analytics helping you assess potential losses or recovery in the event of a default
- Secure upload capabilities for proprietary data to standardize and store the financials you receive from your counterparties
- Relative credit health comparisons across peer groups
- Qualitative information and news that gives a deeper view of issues impacting your counterparties

**Get the essentials, quicker**

**Private company and Small- and Medium-Enterprise (SME) solutions**

Streamline your counterparty credit risk assessment with RiskGauge Reports from S&P Market Intelligence, comprehensive business credit reports powered by dynamic analytical models and robust data, available for over 50 million public and private companies across the globe—including SMEs.

Access a detailed company credit risk profile that contains company firmographics, relative performance benchmarks and rich, insightful commentary, plus:

- S&P Global RiskGauge Score: a holistic credit risk score comprising elements of a company’s PD Fundamental, PD Model Market Signal, and CreditModel™ scores
- PaySense BETA: identifying potential delays of trade payables by leveraging historical trade payable data and macroeconomic factors
- MaxLimit: identifying maximum exposure limits based on analysis of a customer’s PD, liquidity risk, recovery and risk appetite

**Flexible Delivery Options**

Credit Analytics models and data are:

- Fully integrated in the S&P Capital IQ platform and Excel® Plug-in
- Accessible via API solutions to embed in internal and third party platforms
- Delivered via bulk data feed alongside credit ratings, financials, market data and more

**Climate Linked Credit Analytics**

An innovative approach to gauging the impact of pre-defined or user-defined carbon tax impact on a firm’s creditworthiness within your portfolio. Assess how a future carbon tax may affect each item reported within company financial statements over the next three years with the fundamentals-driven model—available for 1,200 public and private companies in the Oil & Gas Sector. In addition, assess how earnings of public companies may change over the next three decades under multiple carbon tax scenarios with a market driven approach—available for over 44,000 public companies across the globe.

**Track industry trends**

We pre-calculate probability of default and credit scores across more than 881,000* public and private companies, and then aggregate across 160 industries, 183 countries, and 241 S&P Dow Jones Indices. Country, Industry and Index level Benchmarks are provided so you can see individual companies against their peer groups and follow burgeoning trends for a given region or industry.

* Coverage as of January 16, 2020
Analytics

Leverage sophisticated models to generate quantitative credit scores on global counterparties, which can be scored individually or in a batch. S&P Global RiskGauge Reports powered by Credit Analytics analytical models provide a detailed picture of default and liquidity risk.

Utilize country and industry risk profiles, as well as aggregate credit risk distributions across your portfolio.

Workflow

Intelligently search and screen companies based on advanced criteria. View the universe of company credit assessment scores or analyze proprietary companies on demand. Monitor and surveil your counterparties and group them into watchlists, then visualize through dashboards or custom Excel templates. Activate alerts to get notified on changes to your risks.

Data Coverage

Dive into timely and transparent data on over 50 million companies. Screen for prospects or investments by geography, sector, rating, credit score, stock price, market cap, estimates, and financials. Input and save financials of private counterparties and share with colleagues.
About S&P Global Market Intelligence

At S&P Global Market Intelligence, we know that not all information is important—some of it is vital. We integrate financial and industry data, research and news into tools that help clients track performance, generate alpha, identify investment ideas, understand competitive and industry dynamics, perform valuations and assess credit risk. Investment professionals, government agencies, corporations and universities globally can gain the intelligence essential to making business and financial decisions with conviction.
