

Compustat® Data from S&P Global Market Intelligence

A comprehensive database with standardized, historical and point-in-time data, with flexible delivery options to power your quantitative research and analysis.

S&P Global
Market Intelligence

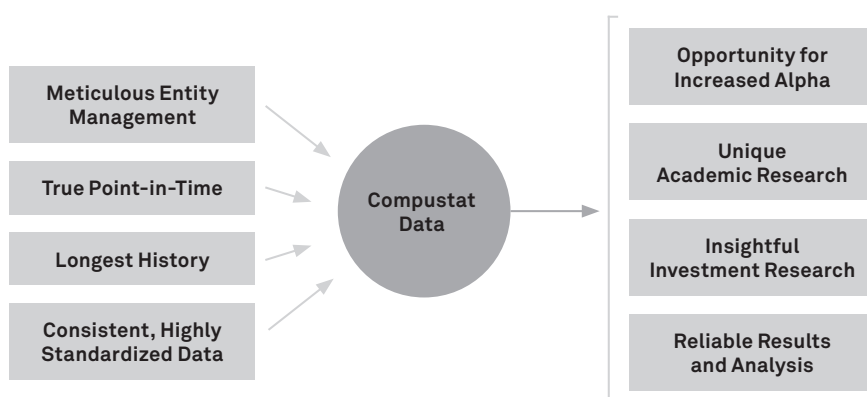

Compustat® data is available through Xpressfeed™, our powerful data feed management solution, that expedites integration into your repository and simplifies maintenance. Compustat® data is also accessible through an API, third-party vendors, and the S&P Capital IQ platform.

Leverage highly standardized, deep historical and point-in-time data for enhanced research and insightful analysis.

- Easily compare companies with standardized, historical data with annual and interim history dating back to 1979. View extended annual history back to the 1950s, and extended interim history back to 1962.
- Align company data with reliable and in-depth linking capabilities to capture corporate actions and other key developments.
- Streamline analysis with integration of Compustat® data and other datasets accessed via Xpressfeed™ for unique data analysis.
- Access extensive research of the financial notes, including the management discussion and detailed footnotes for data comparability, with additional breakouts of key items for additional insight.
- Receive multiple intra-day updates for timely integration into your systems and programs.

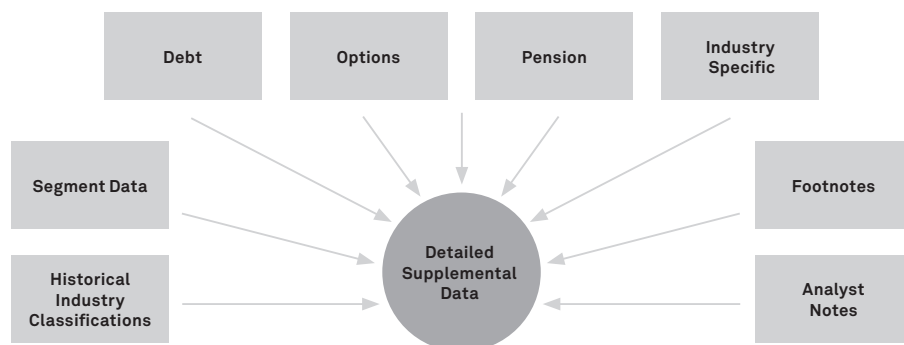

Key Benefits:

- Unlock alpha and enhance your analysis with deep historical data that lets you research companies across numerous economic cycles and regimes.
- Avoid survivorship bias in your analysis with dedicated corporate actions entity management.
- View true point-in-time analysis that helps you understand available data as of a given point in time to avoid look ahead bias.
- Access over 5,000 data items including supplemental items, and leverage highly standardized data for consistency and comparability across companies and items over time.

Access reliable, differentiated data for in-depth analysis.

- Analyze detailed supplemental data items such as historical industry classifications, segment data (including operating and geographic segment, customer and product data), debt, options, pension, and industry specific data.
- Review detailed footnotes, analyst notes, and standardized presentation for additional comparability.

Power your research with preserved data using point-in-time analysis.

- Quickly identify changes by line item with time series point-in-time analysis.
- Re-create historical investment scenarios and develop models that simulate investment environments by viewing data cross-sectionally at a chosen observation date.
- Leverage more than 1,500 annual, quarterly, and year-to-date fundamental data items for both preliminary and final data items.
- Reduce restatement bias as data is recorded with the original value retained, as well as any subsequent changes.
