IHS Maritime Sea-web: Benchmark Module

In partnership with Marine Benchmark

Sea-web: New Benchmark Module Released, June 2013

We are pleased to announce a brand new service to Sea-web's product suite.

Sea-web Benchmark is a new service available for undertaking essential analysis of key performance indicators for ships, fleets and global market segments.

Sea-web Benchmark provides:
- Features include overview of: Ship Type, Size, Number in Segment, Dead Weight , Capacity, Average Speed and Time in Segment. Also includes: Operational Analysis, Trading Area Analysis, Top Company Analysis, and Age Profile Analysis
- Benefits: ability to identify trends using the historical data displayed for the last 6 month period to understand current fleet operations against previous activities
- Analysis of your Ship or Company's performance against competitors to gain a competitive edge and insight into global ship operations

Use **Sea-web Benchmark** data and analysis as the ultimate benchmark tool for your ship, fleet, company and market segment analysis.
