## Gain greater speed and transparency in the assessment process

Platts eWindow is a data-entry and online communications tool that gives you a transparent, at-a-glance view of price discovery in the physical spot and derivatives markets.

Delivering greater speed and efficiency to the price assessment process for oil, as well as oil products and petrochemicals, Platts eWindow has been used by more than 2,000 market participants from more than 460 companies, reaching 50 markets worldwide since its introduction in 2007.

Platts eWindow facilitates the price assessment process by combining the Platts Market-On-Close (MOC) price assessment methodology with state-of-the-art technology, customized for Platts and licensed from the Intercontinental Exchange (ICE).

## Benefits

**Clarity and Transparency** – In real time, view all firm bids, offers and transaction data communicated to S&P Global Platts editors during the MOC process. Access an online community of more than 1,700 users worldwide.

**Efficiency and Data Management** – Directly manage orders, make price changes, indicate trading requirements and confirm deal information simultaneously to Platts and the marketplace.

**Trade Confirmation and Data Logging** – Execute trades through the ICE system interface without leaving the Platts MOC environment. Back offices instantly receive and process trade confirmations.

**Counterparty Clarity and Credit Management** – Better assess counterparty appropriateness through Platts eWindow's transparent environment, as well as ICE's integrated credit control system – including ICE Clear – for both physical and derivative trades.

Why use the limited functionality of instant messaging, telephone and e-mail when you can reach S&P Global Platts editors and the marketplace online through Platts eWindow?
