## S&P ESG Global Macro Index

The S&P ESG Global Macro Index seeks to measure the performance of a multi-asset-class strategy with ESG-themed equity components and a risk control overlay. The index dynamically allocates to equities and fixed income across three regions based on economic and market trend signals. By switching between these two types of assets, the index adapts to changing market conditions with the goal of generating excess return while mitigating risk.

### How does the index work?

- The index is made up of equity and bond securities from the U.S., Europe, and Japan.
- Economic and market trend signals determine asset class allocations on an ongoing basis.
- The index’s risk control overlay adjusts exposure to allocations actively to maintain a 5% target risk level.

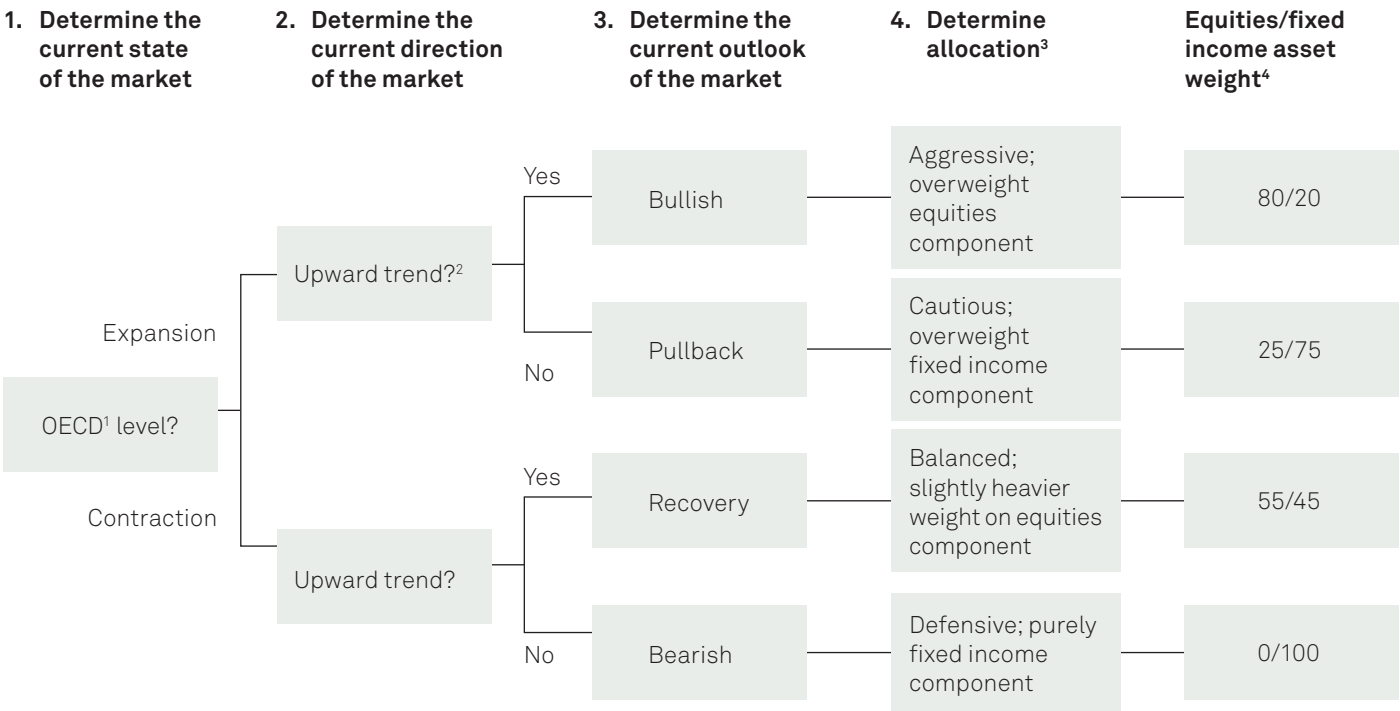

### What are the potential benefits?

- Designed to align investment objectives with ESG values
- Diversified across asset classes and regions
- Seeks to maintain a low target risk level and provide stability

### Geographically Diversified Assets

North America	Europe	Asia
U.S. Large-Cap Equities	Pan-European Equities	Japanese Equities
S&P 500 Scored & Screened Index (SPXESUP)	S&P Europe 350 Scored & Screened Index (SPEESEP)	S&P Japan 500 Scored & Screened Index (SPJESGJP)
U.S. Govt. Bonds	German Govt. Bonds	Japanese Bonds
S&P 10Y US T-Note Futures (SPUSTTP)	S&P Euro-Bund Futures (SPEUBDP)	S&P JGB Futures (SPJGBER)

### How are allocations determined?

<sup>1</sup> Published OECD Leading Indicator; OECD > 100 indicates expansionary economy, OECD ≤ 100 indicates contracting phase.  
<sup>2</sup> If at least 2 out of 3 regions (U.S., Europe, Japan) have a positive 3-month equity momentum, that indicates an upward trend.  
<sup>3</sup> The allocation across three regions within equities and fixed income follows the ratio of 3:2:1 for U.S., Europe, Japan, respectively.  
<sup>4</sup> Portfolio exposure adjusted daily to maintain 5% risk level.

## Index by the Numbers

	<b>S&amp;P ESG Global Macro Index</b>	<b>60/40 Equity/ Bond Portfolio* 5% Risk Control</b>
<b>Return</b>	5.43%	3.28%
<b>Volatility</b>	4.87%	4.90%
<b>Sharpe Ratio</b>	1.12	0.67
<b>Max Drawdown</b>	-6.35%	-7.11%

\* 60/40 Equity/Bond Portfolio allocates fixed weights to equities component (SPXESUP 30%, SPEESEP 20%, SPJESGJP 10%) and fixed income component (SPUSTTP 20%, SPEUBDP 13.33%, SPJGBER 6.67%), with monthly rebalancing.

### Performance disclosure and general disclaimer

The S&P ESG Global Macro Index was launched on Oct. 4, 2019. All data shown prior to the launch date is hypothetical back-tested performance, not actual performance. The back-test calculations are based on the same methodology that was in effect on the index Launch Date. However, when creating backtested history for periods of market anomalies or other periods that do not reflect the general current market environment, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market the index is designed to measure or strategy the index is designed to capture. For example, market capitalization and liquidity thresholds may be reduced. Complete index methodology details are available at [www.spdji.com](http://www.spdji.com). Also, back-tested performance is created with the benefit of hindsight. Prospective application of the methodology used to construct the Index may not result in performance commensurate with the back-test returns shown. Past performance is no guarantee of future results.
