

## S&P Global Carbon Efficient Index Series Consultation

**NEW YORK, OCTOBER 23, 2018:** S&P Dow Jones Indices (“S&P DJI”) is conducting a consultation with members of the investment community on potential changes to the S&P Global Carbon Efficient Index Series. The index series includes the following indices:

S&P/JPX Carbon Efficient Index	S&P 400 Carbon Efficient Index

S&P North America LargeMidCap Carbon Efficient Index	S&P South Africa Domestic Carbon Efficient (DSW) Index
S&P Asia Pacific LargeMidCap Carbon Efficient Index	S&P South Africa Domestic Carbon Efficient Capped (DSW) Index

In order to enhance index replicability while reducing turnover, S&P DJI is proposing to alter the treatment of mergers between two index constituents. S&P DJI is considering two options as described in the table below.

Option	Methodology	
	Current	Proposed
1	An adjustment is made to the surviving company’s AWF to freeze index shares and the weight of the company being removed is distributed across the index.	If two constituents of the same index merge, the merged company carries the combined weights of the original companies.
2	An adjustment is made to the surviving company’s AWF to freeze index shares and the weight of the company being removed is distributed across the index.	The merged company is dropped on the effective date of the corporate event, and the weight is distributed across the index.

*Note: Effective with this consultation, S&P DJI will implement a methodology change and maintain the S&P Global Carbon Efficient Index Series using the first proposed treatment (i.e. option 1) above until further notice.*
