

Decommission of the S&P/BMV Sovereign BONDESD Indices

August 19th, 2026: Effective after the close of **August 19th, 2026**, S&P Dow Jones Indices will no longer calculate end-of-day index levels of the attached list of **S&P/BMV Sovereign BONDESD Indices**. Some end-of-day files will be impacted, and others will no longer be posted to the S&P Dow Jones Indices SFTP (EDX) site as of that date.

A value for the **S&P/BMV Sovereign BONDESD Bond Indices** listed in this announcement has not been published since **August 1, 2026** because there have been no eligible constituents since that time. The D Series of bonds are no longer being issued by the Mexico Government, therefore, these indices will not be published in the future.

This would also include NR versions of the files, where applicable.

Details about the indices are provided in the link below.
