

Revision to the S&P Global BMI Auto Create Maps and Associated Decommissions

October 1, 2026: S&P DJI has completed a detailed review of the **S&P Global BMI** auto-create framework with the objective of simplifying the index lineup, reducing low-demand index variants, and creating a more consistent and logical product offering across the **S&P Global BMI, S&P Emerging BMI, S&P regional, and related index families**. The revised framework will update the auto-create maps used to determine which standard indices are automatically created or reactivated when securities enter or leave the BMI universe or when GICS classifications change.

Summary of changes:

- 1- The **S&P Global BMI** auto-create maps will be published on our [Client Resources Center](#) site under **User Guides** titled “S&P DJI Auto-Create Index Maps”.
- 2- The revised maps will go into effect with the December 2026 rebalancing, effective after the close of Friday, December 18, 2026.
- 3- Indices that fall outside the new framework will be decommissioned in two phases
 - a. Phase 1: **GICS Industry and Sub-Industry indices (3rd and 4th level GICS)**, will be decommissioned effective after the close of **December 31, 2026**.
 - b. Phase 2: other indices that fall outside the new framework will be decommissioned effective after the close of **Friday, February 26, 2027**.

Decommissioned indices will not be automatically created or reactivated under the revised auto-create maps, even if securities subsequently meet the relevant criteria in the parent index. S&P DJI intends to send periodic reminders to clients as the effective dates approach.

Details of the changes to the Auto-Create maps:

Category		Discontinue	Keep
	All	GICS Industry and Sub-Industry Indices (3rd and 4th level)	
	MidSmallCap	GICS Sector indices (purpose to be aligned with LargeCap and MidCap segments)	
	Style MidSmallCap		
Currency Indices (Both Emerging and Developed)			
a)	LargeMidCap and SmallCap Industry Group	EUR, CAD, and AUD	USD and Local
b)	MidSmallCap	AUD, CAD, EUR, GBP, and JPY	USD and Local
c)	Developed Style Size LargeMidCap and SmallCap	JPY, GBP, CAD, NZD, and Currency Hedge	USD, Local, AUD, and EUR
d)	Developed Style Size MidSmallCap	AUD, CAD, EUR, GBP, and JPY	USD and Local
e)	Developed Style Industry Group	AUD, CAD, EUR, GBP, and JPY	USD and Local
f)	Emerging LargeMidCap and SmallCap Industry Groups	AUD, CAD, and EUR	USD and Local
g)	Emerging MidSmallCap	AUD, CAD, EUR, GBP, and JPY	USD and Local

h)	Emerging Style LargeMidCap and SmallCap	JPY, GBP, CAD, and NZD	USD, Local, AUD, and EUR
i)	Emerging Style MidSmallCap	EUR, JPY, AUD, GBP, and CAD	USD and Local

Following decommissions, S&P Dow Jones Indices will no longer calculate end-of-day or real-time values for **S&P Global BMI** indices licensed in the attached file. Data for these indices will be removed from the affected end-of-day files and will no longer be posted to the S&P Dow Jones Indices SFTP (EDX) site as of the applicable effective date.

A full list of the impacted indices, including index names, codes, and decommission data, is available in the link below.
