1) Index Overview

1.1) iTraxx Asia ex-Japan Index

IHS Markit Credit Indices are indices that track different segments of the debt markets (corporate, municipal and sovereign debt bonds and/or loans) across different regions (Europe, Asia, North America and Emerging Markets) and are referenced in various tradable products such as credit default swaps (“CDS”).

IHS Markit Credit Indices are made up of the most liquid entities in the relevant single-name CDS market. The indices roll on a semi-annual basis, and the composition of each new series (a new index) is established based on a transparent set of rules designed to ensure that the current series tracks the most liquid instruments in the relevant market.

The iTraxx Asia ex-Japan Index is composed of forty (40) liquid Asian (excluding Japanese) entities with primarily investment grade credit ratings that trade in the CDS market or have significant bond issuance.

The iTraxx Asia ex-Japan Index is a tradable index that allows market participants to take a view on the overall credit quality and direction of the underlying basket by trading one instrument.

All iTraxx Indices are owned, managed, compiled and published by Markit Indices GmbH a wholly owned subsidiary of IHS Markit Limited.

1.2) Administrator

Markit Indices GmbH is the administrator of the iTraxx Asia ex-Japan Index. The composition of this index is determined by the Administrator in accordance with the rules and methodologies set forth in this document (the “Rules”).

The Administrator has sole responsibility to interpret the Rules.

The Administrator shall make determinations and perform all actions regarding the indices pursuant to the Rules except as follows:

Upon the occurrence of an event that the Administrator determines materially impacts the integrity of one or more type of iTraxx Asia ex-Japan Index-related transactions, including but not limited to trading interruptions; market instability; and/or force majeure events, the Administrator, acting in a commercially reasonable manner, may at its sole discretion determine that it is appropriate to depart from the methodologies, timelines and/or procedures set forth in the Rules in order to obtain a result that preserves the economic intent of such iTraxx Asia ex-Japan Index. Where the best course of action is not clear IHS Markit will consult the Index Advisory Committee for guidance prior to making any such determination. The determined course of action will be documented, communicated to all stakeholders and published on the IHS Markit website www.ihsmarkit.com under the *iTraxx News* page.

In the event that any critical input required in the construction of a new series of the index is not available, IHS Markit will confer with the Index Advisory Committee and publish the outcome of any material change as well as any decisions taken at IHS Markit’s discretion that have led to a methodology change.

1.3) Roll dates

iTraxx Asia ex-Japan Index will begin on 20 March (or the business day immediately thereafter in the event that 20 March is not a business day) and 20 September (or the business day immediately thereafter

in the event that 20 September is not a business day) of each calendar year (each such date, a “Roll Date”).

Unless otherwise specified, all references to “business days” in this document mean days on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in Hong Kong. All times referred to in this document, refer to local time in Hong Kong unless otherwise specified.

1.4) Rule Revision

The rules for the index are reviewed semi-annually prior to the index roll. Decisions made following an index rule review will be communicated to stakeholders via e-mail and published on the IHS Markit website. The publication will contain an overview and timelines for implementation of such rules changes.

1.5) Maturity

Each Index that has a Roll Date of 20 March shall be issued with the maturity date of 20 June occurring 5 years following the Roll Date.

Each Index that has a Roll Date of 20 September shall be issued with the maturity date of 20 December occurring 5 years following the Roll Date.

1.6) Weighting

Each constituent in the iTraxx Asia ex-Japan Index will have equal or approximately equal weightings.

The weighting of each entity will be equal to (i) one divided by (ii) the number of entities in such index, expressed as a percentage with three decimal places (e.g., 2.500%). In the case where rounding is necessary to express the weightings in this manner, the entities shall be arranged in alphabetical order, with the weightings of the entities at the top of the list being rounded up to the nearest one-thousandth of a percent and the weightings of the entities at the bottom of the list being rounded down to the nearest one-thousandth of a percent until the weightings of all entities have been rounded and the aggregate of the weightings equals exactly 100%.

1.7) Relevant rating

Determinations of constituents for the iTraxx Asia ex-Japan Index will be based, in part, on the “Relevant Rating” of each entity in consideration for inclusion or exclusion. For the purposes of these Rules, “Relevant Rating” means the highest rating of the following:

1. Higher of the Issuer Rating, Senior Unsecured Debt Rating, and Corporate Family Ratings for Moody’s;
2. Higher of the Long-term Issuer Credit Rating and Senior Unsecured Debt Rating for S&P; and
3. Higher of the Issuer Default Ratings and Senior Unsecured Debt Rating for Fitch.

Besides the treatment of unrated current constituents described in Section 2.1 below, all entities should have an investment grade Relevant Rating. Entities rated below BBB-/ Baa3 are excluded.

Rating changes that could affect the index membership are taken into account if IHS Markit is notified of such change prior to 5:00 pm London time on the last business day of the month prior to the month in which the roll date occurs.

2) Index roll process

As part of the Index Roll process, the Administrator will create the iTraxx Asia ex-Japan index (as defined below) after each publication of the *6 Month Analysis Top 1,000 Single Names* report published by DTCC or any successor report thereto published by DTCC, or if such report is no longer available, successor report that measures liquidity within the CDS market (as applicable, the “DTCC Report”).

The iTraxx Asia ex-Japan index is composed of forty (40) liquid Asian (excluding Japanese) entities with primarily investment grade credit ratings that trade in the CDS market. The most recent iTraxx Asia ex-Japan index Liquidity List and Debt Issuer List will be used to create the new series of the iTraxx Asia ex-Japan index in accordance with the criteria detailed in this document.

2.1) Creation of the iTraxx Asia ex-Japan Index Liquidity List

Using the average weekly trading activity measured in the then-current DTCC Report, the Administrator will create the Liquidity List by determining all entities for which the following criteria are satisfied:

- Entities must be incorporated in Asia (excluding Japan)
- Entities must have issued or guaranteed an amount of outstanding publicly traded debt securities (which, for the avoidance of doubt, excludes loans, equities and privately placed debt securities) equal to or in excess of USD 150,000,000 with a maximum remaining maturity of 30 years, at close of business on the tenth Business Day preceding the Roll Date. For this determination debt issued by Special Purpose Vehicles created by an insurer or re-insurer for the sole purpose of issuing debt will also be taken into account. The total debt issued or guaranteed will be determined by the Administrator based on sources including, but not limited to, public filings and financial reports of the entity. For new issues of the relevant entities, the first settlement date of the issue will be used to determine whether the debt should be taken into account for the above determination.
- Entities must not be guaranteed or controlled by (directly or indirectly) or guarantee or control (directly or indirectly) in either case, an “Affiliate”, that has a higher ranking on the Liquidity List and otherwise satisfies the relevant criteria as determined by the Administrator. “Control” of any entity means ownership of a majority of the voting power of that entity.
- Entities must demonstrate trading activity greater than zero during the last eight weeks preceding the last Friday of the month prior to month in which the Roll Date occurs, as measured in the DTCC Report.
- Entities not currently in the index must have a minimum rating of at least BBB as per the iBoxx Rating Methodology.
- If any entity in the current Index is below investment grade Relevant Rating it will be excluded from the new series as part of the creation of Liquidity List process below, however if an entity in the current index is no longer rated by Moody’s, S&P or Fitch then providing the average CDS trading spread of such entity is within 200% of the median spread of the qualifying investment grade constituents of the forthcoming index, it will be eligible for the new iTraxx Asia ex-Japan index Liquidity List. For this determination the IHS Markit End of Day Composite CDS Spreads^[1] at the 5 Year tenor are used. The average spread over the last 10 Business Days of the month prior to the month in which the Roll Date occurs are calculated for each entity

^[1]Where credit default swap spreads are required to determine eligibility for inclusion, the “IHS Markit CDS End of Day” service will be used. IHS Markit receives contributed CDS data from market participant’s official books of record. This data undergoes a rigorous cleaning process before being aggregated to form the “IHS Markit CDS End of Day” Composite

Ranking those entities meeting the above criteria, from the most liquid to the least liquid, based on the notional market risk activity as listed in the relevant DTCC Report. To the extent that two or more entities are determined to be equally liquid based on the notional market risk activity, the Administrator shall rank

such entities from the most liquid to the least liquid based on (i) the number of trades specified in the relevant DTCC Report, or (ii) if an equal number of trades are specified, in alphabetical order (such overall completed rankings, the “iTraxx Asia ex-Japan index”, and such overall completed list, the “iTraxx Asia ex-Japan index Liquidity List”).

2.2) Creation of the Debt Issuer List

The Debt Issuer List will be used in addition to the Liquidity List in the creation of the new iTraxx Asia ex-Japan index series. The debt Issuer List is composed of two lists, namely, Large Debt Issuer List and Significant Debt Issuer List.

The Administrator will create a list according to the following criteria:

- Entities must have an aggregate minimum of USD 1,000,000,000 outstanding (under the same ticker) and included in the *iBoxx USD Asia ex-Japan Investment Grade Index* (the “Selection Index”) as published in the Selection Index on the first business day of the relevant roll month. Furthermore:
 - > entities with aggregate debt outstanding of less than USD 2,000,000,000 but greater than or equal to USD 1,000,000,000 must also have debt issued in the last 24 months;
 - > for this determination all publicly traded debt at all tiers, including senior and subordinated, secured and unsecured will be included in the Selection Index;
 - > loans, debt guaranteed (but not issued) by the entity, convertibles and privately placed debt securities will be excluded;
 - > debt issued via Loan Participation Note (LPN) programs will be excluded.
- Entities must have a minimum rating of at least BBB as per the *iBoxx Rating Methodology* .
- Entities must not be guaranteed or controlled by (directly or indirectly) or guarantee or control (directly or indirectly) in either case, an “Affiliate”, that has a higher ranking on the Liquidity List or Debt Issuer List and otherwise satisfies the relevant criteria as determined by the Administrator. “Control” of any entity means ownership of a majority of the voting power of that entity.
- Entities must not appear on the DTCC Report in order to be candidates for the Debt Issuer List, though affiliates of entities on the DTCC Report are eligible for the Debt Issuer List as long as existing rules concerning affiliates within the iTraxx Asia ex-Japan Index are met.

Ranking of the Debt Issuer List

Once the list is created as set out under the “Creation of the Debt Issuer List” above, the list will be ranked by ticker according to the below process:

Step 1: Ranking based on issuance size Assign a rank to each of the entities in ascending order of the amount of debt included in the Selection Index. For avoidance of doubt, the entity with the lowest debt outstanding will be ranked 1.

Step 2: Ranking based on number of bonds issued

Assign a rank to each of the entities in ascending order by the number of bonds included in the Selection index. For avoidance of doubt, the entity with the least number of bonds outstanding will be ranked 1.

Step 3: Debt Issuer List Score

Generate a Debt Issuer List Score for each entity by adding the ranks generated in Steps 1 and 2 for each entity.

Step 4: Debt Issuer List Ranking

Assign a rank to each entity in descending order of the Debt Issuer List Scores generated in Step 3. For avoidance of doubt, the entity with the highest Debt Issuer List Score will be ranked 1.

To the extent that two or more entities are determined to have the exact same Debt Issuer List Score, the Administrator shall rank such entities by (i) the total amount of senior unsecured debt included in the Selection Index for all eligible entities under the relevant ticker and if still two or more names are equally ranked, by (ii) the most recent senior unsecured issuance included in the Selection Index from all eligible entities under the relevant ticker.

Large Debt Issuer List

Following creation of the Debt Issuer List, entities within the Debt Issuer List that have debt outstanding greater than or equal to USD 2,000,000,000 will be placed in the Large Debt Issuer List.

Significant Debt Issuer List

Following creation of the Debt Issuer List, entities within the Debt Issuer List that have debt outstanding greater than or equal to USD 1,000,000,000 but less USD 2,000,000,000 will be placed in the Significant Debt Issuer List.

Selecting an Entity within a Ticker

- For the purposes of the Debt Issuer List, entities will be considered Eligible if one or more of the following criteria is satisfied:
 - > the entity has an Investment Grade Relevant Rating;
 - > is Unrated and at least one bond issued by the entity included in the Selection Index is rated Investment Grade by at least one of S&P, Moody's or Fitch (entities which are Unrated and only have Unrated debt outstanding will not be Eligible);
- If the bonds issued by the different entities under the ticker are guaranteed by the parent entity, the parent entity will be selected.
- If the bonds issued by the different entities under the ticker are not guaranteed by the parent entity, the entity that is a candidate for inclusion in the Debt Issuer List is the one which has the largest amount of Senior Unsecured debt included in the Selection Index.
- If none of the entities under the same ticker have Senior Unsecured debt included in the Selection Index then entities with Senior Secured debt included will be considered.
- Where there is only one entity under the relevant ticker and this entity has only Senior Secured debt included in the Selection Index, this entity will be selected for the Debt Issuer List.
- If there are multiple Eligible entities under the relevant ticker and all of these entities have only Senior Secured debt included in the Selection Index, the Administrator will endeavor to select the Eligible entity which has the largest amount of lower ranking Senior Secured debt included in the Selection Index for the Debt Issuer List.
 - > The Administrator may use bond and/or entity ratings and consult with IHS Markit RED in order to achieve this.
 - > If the Administrator believes that the Senior Secured debt included for these entities is of equal ranking, then the Eligible entity with the largest amount of Senior Secured debt included in the Selection Index will be selected.
- For the purposes of choosing an entity within a ticker:
 - > Only bonds with maturities of 30 years or below from the new index start date will be considered when determine outstanding amounts.
 - > PIK notes and convertibles will not be considered. (To clarify - PIK notes are considered when determining New Debt Issuance.)

Debt Tier Classification

The below criterion is used to establish the Debt Tier classification of a bond for determining eligibility of the issuing entity for the Debt Issuer List, as follows:

- The bond will be classified as Senior Unsecured if any of the below criteria are satisfied:
 - > The bond's rating from Moody's is equal to the Moody's Senior Unsecured or Moody's Senior Subordinate Debt Rating.
 - > The bond rating from S&P is equal to the S&P Senior Unsecured or S&P Senior Subordinate Debt Rating.
 - > The bond rating from Fitch is equal to the Fitch Senior Unsecured or Fitch Senior Subordinate Debt Rating.
- The bond will be classified as Senior Secured if any of the below criteria are satisfied:
 - > The bond's rating from Moody's is equal to the Moody's Senior Secured Debt Rating.
 - > The bond rating from S&P is equal to the S&P Senior Secured Debt Rating.
 - > The bond rating from Fitch is equal to the Fitch Senior Secured Debt Rating.
- If the above tests are inconclusive, then the IHS Markit RED Tier classification (if available) is used. Bonds with a Subordinated IHS Markit RED Tier classification will be ranked as Senior Unsecured.
- If the above tests are inconclusive and the IHS Markit RED Tier classification is unavailable, then the bond is considered to be Senior Unsecured.

2.3) Creation of new iTraxx Asia ex-Japan Index Series

At the time of an index roll, the index composition is initially set to be the same as the previous series, the Administrator will then identify entities which match the Roll Exclusion criteria below and remove them from the existing index. The Administrator will then add new and replacement entities by applying the Roll Inclusion criteria to create the new index. The inclusion and exclusion processes are as described below.

2.3.1) Roll Exclusions

No later than eight (8) Business Days prior to a Roll Date, the Administrator will create list of entities in the current index that no longer satisfy the General Criteria set forth above or match the exclusion criteria set forth below:

Corporate Events

The Administrator may determine, at its sole discretion and based on publicly available information, that a corporate event has occurred or been announced in relation to any current constituent that renders such current constituent unsuitable for inclusion. For purposes of this paragraph,

- (i) "Corporate Events" include mergers, acquisitions or other similar events and
- (ii) "Publicly available information" includes, but is not limited to, information from public filings, financial reports, or information published in the main sources of business news in the country in which the corporate entity is organized and any other internationally recognized published or electronically displayed news services.

Credit Events

The Administrator may determine at its sole discretion that a current constituent is no longer suitable for inclusion in the Index if one of the following occurs on or after the previous Index Roll Date with respect to any current constituent:

- (i) a notice is published on the ISDA Credit Derivatives Determinations Committee web page (<http://dc.isda.org/>), or any successor webpage thereto) announcing that a request relating to a potential Credit

Event (as defined in the Credit Definitions) in respect of such current constituent has been accepted by the relevant Credit Derivatives Determinations Committee (as defined in the Credit Definitions, the "DC"); provided that as of 5:00 p.m. Hong Kong time on the first business day following the day on which the relevant DC is required to convene to consider such request under the DC rules (such timeline to be determined without regard to any ability of the DC to amend the published timetables set forth in the DC rules immediately prior to such request), a DC No Credit Event Announcement (as defined in the Credit Definitions) has not occurred and no announcement to the effect that such request has been dismissed, withdrawn, or rejected by the relevant DC has been published on such web page; or

(ii) a DC Credit Event Announcement (as defined in the Credit Definitions) occurs with respect to such current entity. As set forth in these Rules, the Administrator may consider any information and make any determinations necessary under this Roll Exclusion to obtain a result that preserves the integrity of the Index.

External Events

The Administrator may determine at its sole discretion that an entity that would qualify for inclusion based on the selection criteria would not be appropriate to include in the forthcoming series. This might be based on an external event impacting the entity which can include sanctions, legal restrictions, or other similar stipulations. The Administrator will make such decision based on publicly available information and, where possible, after consulting with market participants.

Liquidity Based Exclusion

Existing entities in the current index will be excluded from the new index if they are either not part of the Liquidity List or if more than 50 entities are available on the Liquidity List, and they are ranked at #51 or lower.

Rating Based Exclusion

Any entity not achieving the relevant rating will be deemed no longer eligible, however if a constituent is no longer rated by any of the following Moody's, S&P or Fitch its exclusion will be judged according to the spread criteria outlined in the General Criteria section.

These entities will be replaced by the most liquid eligible new entities from the Liquidity List subject to the inclusion criteria set forth below. Current entities identified in accordance with the above are "Roll Exclusions."

2.3.2) Roll Inclusions

Using the Liquidity List the Administrator will identify entities that match the criteria below to create a list of entities that are not current constituents, that are not subject to any Roll Exclusion criteria above, and that satisfy the General Criteria:

Liquidity Based Inclusion

New entities ranked #20 or higher are included automatically if this inclusion causes the overall entity list to exceed 40, the least liquid entities from the overall 40 list will be excluded.

Roll Exclusion replacement

If an existing constituent has been excluded from the new index due to the Roll Exclusions above, the entity will be replaced by the most liquid new entity from the Liquidity List. In case the Liquidity List does not have an eligible entity for the Roll Exclusion replacement, the highest ranked eligible entity from the Debt Issuer List will be selected as the Roll Exclusion replacement entities.

The new entity must not be guaranteed or controlled by (directly or indirectly) or guarantee or control (directly or indirectly) in either case, an “Affiliate”, that has a higher ranking on the iTraxx Asia ex-Japan Index Liquidity List and otherwise satisfies the relevant criteria as determined at the sole discretion of the Administrator. Where the nature of a corporate action creates uncertainty as to which entity is higher ranking on the iTraxx Asia ex-Japan Index Liquidity List, the most liquid entity as per the trading activity over the last eight weeks preceding the last Friday of the month prior to the month in which the Roll Date occurs as measured in the DTCC Report will be selected. “Control” of any entity means ownership of a majority of the voting power of that entity

This process is repeated until all Roll Exclusions have been replaced and the index has 40 entities.

2.3.3) Market Sector Alignment

Once the iTraxx Asia ex-Japan index size of 40 has been achieved through the Roll Inclusions process described above, a Market-Sector alignment procedure will be applied. For this purpose, every combination of the below Markets and Sectors will be considered:

Market Sector Profile		SECTORS			
		Financials	Non-Financials	Real Estate	Sovereigns/Sub-sovereigns
	Mainland China				
	Hong Kong				
	India				
	Indonesia				
	Macao				
	Malaysia				
	Philippines				
	Singapore				
	South Korea				
	Taiwan				
	Thailand				

The Target Market-Sector profile of the forthcoming iTraxx Asia ex-Japan index will be the Market-Sector distribution of the *iBoxx USD Asia ex-Japan Investment Grade Index* (the “Selection Index”) as published in the Selection Index on the first business day of the relevant roll month.

The *Market Weighting Tolerance Level* allows each Market weight in the forthcoming iTraxx Asia ex-Japan index series to deviate the corresponding Market weight in the Selection Index by the specified tolerance level. The Market Weighting Tolerance Level is set at 3.75%.

When a Market is identified as overweight by more than the Market Weighting Tolerance Level:

- an entity from the most overweight Market-Sector within that Market will be excluded from the index; and
- an entity from the most underweight Market, and the most underweight Market-Sector within that Market will be selected for index inclusion. In case there are no entities available from the required Market-Sector, an entity is selected from any of the sectors within the most underweight Market.

Following the above adjustment, if there are any Markets that are identified as underweight beyond the Market Weighting Tolerance Level:

- an entity will be added to the most underweight Market-Sector within the most underweight Market, subject to not creating any further overweight Markets. In case there are no entities available from the required Market-Sector, an entity is selected from any of the sectors within the most underweight Market; and
- an entity will be removed from the most overweight Market-Sector within the most overweight Market, subject to not creating any further underweight Markets.

For Markets with only one entity represented in the iTraxx Asia ex-Japan index, the most liquid CDS entity will be retained regardless of Sector.

All entity selections will be based on the ranking of the Liquidity List, Large Debt Issuer List, and the Significant Debt Issuer List in that order of preference. The Large Debt Issuer List will only be considered when there are no entities available in the Liquidity List from the required underweight Market. Similarly, the Significant Debt Issuer List will only be considered when there are no entities available in the Large Debt Issuer List from the required underweight Market.

Repeat the process until *any* of the conditions below are achieved:

- four replacements have already been made in the index as part of the Market-Sector alignment process;
- target Market-Sector profile for the forthcoming iTraxx Asia ex-Japan index has been achieved i.e. none of the Markets are overweight of underweight beyond the Market Weighting Tolerance Level; or
- no further eligible entities are available from the Liquidity List, Large Debt Issuer List or Significant Debt Issuer List.

2.4) Publication of Provisional iTraxx Asia ex-Japan Index

The list of entities resulting after the steps above (the “Provisional iTraxx Asia ex-Japan Index”) will be published on IHS Markit’s public website for comment no later than seven (7) Business Days prior to the Roll Date. The Administrator will review comments received and determine whether amendments are necessary. The Administrator welcomes public comment, but is not required to follow or otherwise address any comment received. The Administrator will publish the expected name changes (if any) on its public website as it determines such changes may be required. The comment period will end four (4) Business Days prior to the Roll Date. The draft and final annexes for the iTraxx Asia ex-Japan Index will be published as set forth in the 'Publication of Annex' section below.

2.5) Final Review of Constituent List

On any day prior to the date of publication of a final index annex, the Administrator may determine that any entity that is intended to be included in the relevant index fails any of the iTraxx Asia ex-Japan Index Criteria then such entity shall be excluded from the iTraxx Asia ex-Japan Index.

If the Administrator determines that any entity shall be excluded from the iTraxx Asia ex-Japan Index in accordance with the preceding paragraph, then the highest ranked entity in the iTraxx Asia ex-Japan Index Liquidity List that has not already been included in the iTraxx Asia ex-Japan Index, as applicable, shall be added to the new iTraxx Asia ex-Japan Index as a replacement entity. If no entity is eligible from

the iTraxx Asia ex-Japan Liquidity List, the highest-ranking eligible entity will be selected from the Debt Issuer List.

- If the new entity cannot be selected from the iTraxx Asia ex-Japan Index Liquidity List or the Debt Issuer List, IHS Markit will request the iTraxx Asia ex-Japan Index market participants to submit additional entities for Inclusion to the iTraxx Asia ex-Japan Index Liquidity List.
- Additional entities for the iTraxx Asia ex-Japan Index Liquidity List will comprise of the additional entities market participants would like to include in the new series of the respective indices on the basis of trading volumes over the past 12 months. IHS Markit aggregates all votes from the additional entities to be added to the iTraxx Asia ex-Japan Index Liquidity List. All entities in this list are ranked according to the trading volume in descending order.
- Entities are selected from the sorted additional Inclusion List for membership in the new series of the index and added to the iTraxx Asia ex-Japan Index Liquidity List until the total number of names in the iTraxx Asia ex-Japan Index Liquidity List is 40.

Where a determination with regard to constituent selection is made by the Administrator which involves discretion and/or expert judgment, IHS Markit may consult the Index Advisory Committee for guidance. Such determinations will be documented, communicated to stakeholders via e-mail and published on the IHS Markit website www.ihsmarkit.com under the *iTraxx News* page. Where similar determinations are made, precedents set by previous decisions will be considered across all CDS indices.

In the unlikely instance an inaccuracy is not caught and resolved prior to the publication of the final list, or if input data used in the constituent selection process is revised retrospectively, IHS Markit will review the impact on the affected indices. In order to determine whether to restate the final list or any index parameters, IHS Markit will consult with the Index Advisory Committee to determine the impact of such action.

If it is decided to update the Final List or any related parameters, the reason for such revision together with revised material will be published. In addition, IHS Markit will compile an incident report to summarize the incident, the root cause, and set forth remedial actions to avoid such an error in the future, where such remedial actions are applicable.

2.6) Publication of Annex

No later than three (3) Business Days prior to the Roll Date of a iTraxx Asia ex-Japan Index, the Administrator will publish a draft of the annex for such iTraxx Asia ex-Japan Index, along with the weighting and final reference obligations (if applicable) for each entity. The final annex for iTraxx Asia ex-Japan Index will be published after 5:00 p.m. Hong Kong Time on the Business Day immediately preceding the Roll Date of the Indices.

2.7) Reference Obligations

The reference obligations for the reference entities are obtained from IHS Markit Limited's Reference Entity Database (RED) in conjunction with input from iTraxx Asia ex-Japan Index market participants.

2.8) Changes to the Reference Obligations

In the event that IHS Markit receives requests from three or more market participants that the reference obligation of an entity should be replaced, IHS Markit will identify one new reference obligation for such entity, based on RED and on input from iTraxx market participants. A poll is then initiated by IHS Markit. If a majority of the market participants participating in the poll agrees that such replacement should be made, a new annex will be published by IHS Markit, which will be identical to the previous annex, save for the fact that the reference obligation for such entity will be as agreed in the poll.

2.9) Coupon Levels and Recovery Rates

On the second business day preceding the roll date, a telephone poll is initiated by IHS Markit to determine the coupons and recovery rates for each index. Coupon levels are rounded to the nearest 5 basis points and recovery levels to the nearest 5%.

These trademarks together with others have been licensed to S&P Dow Jones Indices LLC. Redistribution or reproduction in whole or in part are prohibited without written permission of S&P Dow Jones Indices LLC. This document does not constitute an offer of services in jurisdictions where S&P DJI does not have the necessary licenses. Except for certain custom index calculation services, all information provided by S&P DJI is impersonal and not tailored to the needs of any person, entity, or group of persons. S&P DJI receives compensation in connection with licensing its indices to third parties and providing custom calculation services. Past performance of an index is not an indication or guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments based on that index. S&P DJI does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P DJI makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P DJI is not an investment advisor, commodity trading advisor, fiduciary, “promoter” (as defined in the Investment Company Act of 1940, as amended) or “expert” as enumerated within 15 U.S.C. § 77k(a), and S&P DJI makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. S&P DJI is not a tax advisor. Inclusion of a security, commodity, crypto currency, or other asset within an index is not a recommendation by S&P DJI to buy, sell, or hold such security, commodity, crypto currency, or other asset, nor is it considered to be investment or trading advice.

These materials have been prepared solely for informational purposes based upon information generally available to the public and from sources believed to be reliable. No content contained in these materials (including index data, ratings, credit-related analyses and data, research, valuations, model, software or other application or output therefrom) or any part thereof (“Content”) may be modified, reverse engineered, reproduced, or distributed in any form or by any means, or stored in a database or retrieval system, without the prior written permission of S&P DJI. The Content shall not be used for any unlawful or unauthorized purposes. S&P DJI and its third-party data providers and licensors (collectively “S&P Dow Jones Indices Parties”) do not guarantee the accuracy, completeness, timeliness, or availability of the Content. S&P Dow Jones Indices Parties are not responsible for any errors or omissions, regardless of the cause, for the results obtained from the use of the Content. THE CONTENT IS PROVIDED ON AN “AS IS” “WHERE IS” BASIS. S&P DOW JONES INDICES PARTIES DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT’S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Dow Jones Indices Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special, or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of the Content even if advised of the possibility of such damages.

Credit-related information and other analyses, including ratings, research and valuations are generally provided by licensors and/or affiliates of S&P Dow Jones Indices, including but not limited to S&P

Global's other divisions such as S&P Global Market Intelligence. Any credit-related information and other related analyses and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. Any opinion, analyses and rating acknowledgement decisions are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P Dow Jones Indices does not assume any obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P DJI does not act as a fiduciary or an investment advisor. While S&P DJI has obtained information from sources it believes to be reliable, S&P DJI does not perform an audit or undertake independent verification of any information it receives. S&P DJI reserves the right to vary or discontinue any index at any time for regulatory or other reasons. Various factors, including external factors beyond S&P DJI's control might necessitate material changes to indices.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P Global Ratings reserves the right to assign, withdraw or suspend such acknowledgement at any time and in its sole discretion. S&P Dow Jones Indices, including S&P Global Ratings, disclaim any duty whatsoever arising out of the assignment, withdrawal, or suspension of an acknowledgement as well as any liability for any damage alleged to have been suffered on account thereof. Affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, may receive compensation for its ratings and certain credit-related analyses, normally from issuers or underwriters of securities or from obligors. Such affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, reserve the right to disseminate its opinions and analyses. Public ratings and analyses from S&P Global Ratings are made available on its Web sites, www.standardandpoors.com (free of charge), and www.ratingsdirect.com and www.globalcreditportal.com (subscription), and may be distributed through other means, including via S&P Global Ratings publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.

S&P Global keeps certain activities of its various divisions and business units separate from each other to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions, and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate, or otherwise address.

Some indices use the Global Industry Classification Standard (GICS[®]), which was developed by, and is the exclusive property and a trademark of, S&P Global and MSCI. Neither MSCI, S&P DJI nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P DJI, any of their affiliates or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

S&P Dow Jones Indices products are governed by the terms and conditions of the agreements under which they may be provided. A license is required from S&P Dow Jones Indices to display, create derivative works of and/or distribute any product or service that uses, is based upon and/or refers to any S&P Dow Jones Indices and/or index data.
