Introduction

Index Objective

The S&P ESG Global Macro Indices are weighted return indices that measure the performance of a multi-asset class strategy with ESG equity component indices and a risk control overlay. The indices employ economic and market trend signals to determine allocations across component indices representing different asset classes.

Index Family

The S&P ESG Global Macro Indices include:

- **S&P ESG Global Macro (with Commodity) Index:** The index uses economic and equity market trend signals to allocate among equity, fixed income, and commodity asset classes.
- **S&P ESG Global Macro Index:** The index uses economic and equity market trend signals to allocate among only equity and fixed income asset classes.
- **S&P ESG Global Macro (with Bond and FX Momentum Signals) Index:** The index uses economic and equity market trend signals, along with bond and FX momentum signals, to allocate among equity, fixed income, and FX asset classes.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

Supporting Document	URL
S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology	Equity Indices Policies & Practices
S&P Dow Jones Indices' Commodities Indices Policies & Practices Methodology	Commodities Indices Policies & Practices
S&P Dow Jones Indices' Index Mathematics Methodology	Index Mathematics Methodology

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.

Eligibility Criteria

Index Eligibility

The universe of eligible asset classes, and the component indices used to represent each, are:

Asset Class	Region	Component Indices
Equities	U.S. Equities	S&P 500 ESG Excess Return Index
	Europe Equities	S&P Europe 350 ESG Excess Return Index (USD) ¹
	Japanese Equities	S&P Japan 500 ESG Excess Return Index (USD) ²
Fixed Income	U.S. Fixed Income	S&P 10-Year U.S. Treasury Note Futures Excess Return Index
	Europe Fixed Income	S&P Euro-Bund Futures Excess Return Index (USD) ³
	Japanese Fixed Income	S&P 10-Year JGB Futures Excess Return Index (USD) ⁴
Commodities	Global Commodities	S&P GSCI Light Energy 3 Month Forward ER
FX	EURUSD FX	S&P EURO Futures Index ER
	JPYUSD FX	S&P Japanese Yen Futures Index ER

The excess return versions of the S&P 500 Scored & Screened, S&P Europe 350 ESG, and S&P Japan 500 ESG Indices calculate in local currency before conversion into the USD versions. The excess return indices calculate using local cash rates.

Component Index	Asset Class	Sub-Component Indices	Ticker
S&P 500 ESG Excess Return Index (USD)	Equity	S&P 500 Scored & Screened Index (USD)	SPXESUP
	Cash ⁵	SOFR Overnight + 0.13088% interest rate	SOFRS3M=

Component Index	Asset Class	Sub-Component Indices	Ticker
S&P Europe 350 ESG Excess Return Index (USD)	Equity	S&P Europe 350 ESG Index (EUR)	SPEESEP
	Cash ⁶	1-Month EURIBOR interest rate	EURIBOR1MD=
		3-Month EURIBOR interest rate	EURIBOR3MD=
	Exchange Rate	DIRECT US Dollar TO Euro currency (WM Spot)	USDEURFXM=WM

Component Index	Asset Class	Sub-Component Indices	Ticker
S&P Japan 500 ESG Excess Return Index (USD)	Equity	S&P Japan 500 ESG Index (JPY)	SPJESGJP
	Cash ⁷	1-Month TIBOR interest rate	DIBJP1MD=
		3-Month TIBOR interest rate	DIBJP3MD=
	Exchange Rate	DIRECT Japanese Yen TO US Dollar (WM Spot)	USDJPYFXM=WM

For information on the sub-component indices, please refer to the *S&P Scored & Screened Index Series Methodology*, *S&P Global Bond Futures Index Series Methodology*, *S&P GSCI Methodology*, and *S&P Futures Indices Methodology*, available at www.spglobal.com/spdji.

For information on excess return calculations, please refer to *S&P Dow Jones Indices' Index Mathematics Methodology*.

¹ The S&P Europe 350 ESG Excess Return Index (USD) is the principal hedged USD version of the S&P Europe 350 ESG Excess Return Index based on price return. Please see Appendix A for the calculation of principal hedged currency index levels.

² The S&P Japan 500 ESG Excess Return Index (USD) is the principal hedged USD version of the S&P Japan 500 ESG Excess Return Index based on price return. Please see Appendix A for the calculation of principal hedged currency index levels.

³ The S&P Euro-Bund Futures Excess Return Index (USD) is the principal hedged USD version of the S&P Euro-Bund Futures Excess Return Index. Please see Appendix A for the calculation of principal hedged currency index levels.

⁴ The S&P 10-Year JGB Futures Excess Return Index (USD) is the principal hedged USD version of the S&P 10-Year JGB Futures Excess Return Index. Please see Appendix A for the calculation of principal hedged currency index levels.

⁵ Cash items are used in calculating the excess return; the indices do not hold cash.

⁶ Cash items are used in calculating the excess return; the indices do not hold cash.

⁷ Cash items are used in calculating the excess return; the indices do not hold cash.

Index Construction

Signals and Market Phase Determination

The indices determine component index representation based on the combination of economic and market trend signals, as defined below.

Economic Signal	Indicator/Equity Benchmark
Market Trend Signal: Number of equity benchmark indices with positive 63-Day Price Return	OECD G20 Composite Leading Indicator
	S&P 500 Index (USD)
	S&P Europe 350 (EUR)
	S&P Japan 500 (JPY)
Bond Momentum Signal: Number of fixed income benchmark indices with positive 63-Day Price Return	S&P 10-Year U.S. Treasury Note Futures Excess Return Index
	S&P Euro-Bund Futures Excess Return Index
	S&P 10-Year JGB Futures Excess Return Index
FX Momentum Signal: Number of FX benchmark indices with negative 63-Day Price Return	S&P EURO Futures Index ER
	S&P Japanese Yen Futures Index ER

OECD G20 Composite Leading Indicator (“CLI”) is designed to provide early signals of turning points in business cycles showing fluctuation of the economic activity globally around its long-term potential level. The OECD aims for the turning points of the CLI to consistently precede those of the business cycle, typically by six to nine months (lead time varies).

CLIs show short-term economic movements in qualitative rather than quantitative terms. The long-term average of the amplitude-adjusted CLI is 100, which represents the trend of economic activity. The OECD CLIs are compiled and published monthly, with a given month’s input data t available in month $t+2$ at the OECD Data website [here](#).

The global market phase is determined once a month, based on the latest available value of OECD G20 CLI and the 63-day price returns of the above equity benchmarks as of the second last business day of each month (reference date). The index uses the identified market phase to determine the base weight assigned to each of the asset classes and component indices in the following month, starting from the first business day of the following month after market close.

Market Phase Determination		OECD G20 CLI	
		>100	≤100
Number of equity benchmarks with positive 63-day price return	≥ 2	Phase 1	Phase 2
	< 2	Phase 3	Phase 4

The bond momentum signal calculates monthly, based on the 63-day price returns of the above fixed income benchmarks as of the second last business day of each month (reference date). The index uses the signal to apply a multiplier to the base weights of all the fixed income indices that were determined by the market phase.

Fixed Income Multiplier Determination	Multiplier	
Number of fixed income benchmarks with positive 63-day price return	≥ 2	1
	< 2	0

The FX momentum signal calculates monthly, based on the 63-day price returns of the above FX benchmarks as of the second last business day of each month (reference date). The index uses the signal to apply a multiplier to the base weights of the FX indices.

FX Multiplier Determination			EUR FX Multiplier	JPY FX Multiplier
Check 63-day price return of FX benchmarks	EURUSD >= 0	JPYUSD >= 0	0	0
	EURUSD >= 0	JPYUSD < 0	0	1
	EURUSD < 0	JPYUSD >= 0	1	0
	EURUSD < 0	JPYUSD < 0	2	2

For more information on the equity, fixed income, and FX indices used for market trend signals, please refer to the respective methodology documents available at www.spglobal.com/spdji.

Each index uses the respective signals below to determine component index representation and eligible asset classes for allocation:

Index	Signals	Eligible Asset Classes
S&P ESG Global Macro (with Commodity) Index	Economic Signal Market Trend Signal	Equity Fixed Income Commodities
S&P ESG Global Macro Index	Economic Signal Market Trend Signal	Equity Fixed Income
S&P ESG Global Macro (with Bond and FX Momentum Signals) Index	Economic Signal Market Trend Signal Bond Momentum Signal FX Momentum Signal	Equity Fixed Income FX

Base Weights Allocation Matrix

Based on the market phase determined at the reference date, assign a base weight to each component index for the following month according to the below allocation matrix. The allocation across three regions within equities and fixed income follows the ratio of 3:2:1 for U.S., Europe, and Japan, respectively.

S&P ESG Global Macro (with Commodity) Index

Market Phase	Equities	Fixed Income	Commodities
Phase 1	72%	20%	8%
Phase 2	49.5%	45.0%	5.5%
Phase 3	22.5%	75.0%	2.5%
Phase 4	0%	100%	0%

Market Phase	U.S. Equity	Europe Equity	Japan Equity	U.S. Fixed Income	Europe Fixed Income	Japan Fixed Income	Commodity
Phase 1	36%	24%	12%	10%	6.66%	3.33%	8%
Phase 2	24.75%	16.5%	8.25%	22.5%	15%	7.5%	5.5%
Phase 3	11.25%	7.5%	3.75%	37.5%	25%	12.5%	2.5%
Phase 4	0%	0%	0%	50%	33.33%	16.66%	0%

S&P ESG Global Macro Index

Market Phase	Equities	Fixed Income
Phase 1	80%	20%
Phase 2	55%	45%
Phase 3	25%	75%
Phase 4	0%	100%

Market Phase	U.S. Equity	Europe Equity	Japan Equity	U.S. Fixed Income	Europe Fixed Income	Japan Fixed Income
Phase 1	40%	26.66%	13.33%	10%	6.66%	3.33%
Phase 2	27.5%	18.33%	9.16%	22.5%	15%	7.5%

Market Phase	U.S. Equity	Europe Equity	Japan Equity	U.S. Fixed Income	Europe Fixed Income	Japan Fixed Income
Phase 3	12.5%	8.33%	4.16%	37.5%	25%	12.5%
Phase 4	0%	0%	0%	50%	33.33%	16.66%

S&P ESG Global Macro (with Bond and FX Momentum Signals) Index

Market Phase	Equities	Fixed Income
Phase 1	80%	20%
Phase 2	55%	45%
Phase 3	25%	75%
Phase 4	0%	100%

Market Phase	U.S. Equity	Europe Equity	Japan Equity	U.S. Fixed Income	Europe Fixed Income	Japan Fixed Income
Phase 1	40%	26.66%	13.33%	10%	6.66%	3.33%
Phase 2	27.5%	18.33%	9.16%	22.5%	15%	7.5%
Phase 3	12.5%	8.33%	4.16%	37.5%	25%	12.5%
Phase 4	0%	0%	0%	50%	33.33%	16.66%

If the fixed income multiplier is determined to be zero, set base weights for U.S. Fixed Income, Europe Fixed Income, and Japan Fixed Income to zero, irrespective of the Market Phase.

Set the base weights of the FX Indices to the following values based on the FX multiplier:

FX Multipliers			
EUR FX Multiplier	JPY FX Multiplier	EUR FX	JPY FX
0	0	0%	0%
0	1	0%	-16.66%
1	0	-33.33%	0%
2	2	-66.66%	-33.33%

Apply the assigned monthly base weights to each business day of the following month for the calculation of the leverage factor necessary each day to achieve the target portfolio volatility of 5%; or the scaled volatility for the S&P ESG Global Macro (with Bond and FX Momentum Signals) Index.

Risk Control Overlay

On each business day of the following month, the prior 60-day and 20-day volatilities of the indices calculate based on the monthly base weights assigned to component indices in that month as of two business days prior. The index selects the maximum of the two volatility values to determine the leverage factor necessary to achieve the target volatility of 5% and caps the leverage factor at 200%.

$$\text{Leverage Factor} = \min \left[200\%, \frac{5\%}{\max(VOL_{t,20D}, VOL_{t,60D})} \right]$$

$$VOL_{t,M} = \sqrt{\frac{252}{M-1} \times \sum_{i=t-M+1}^t \left[\text{BaseIndexRet}_i - \frac{\sum_{j=t-M+1}^t \text{BaseIndexRet}_j}{M} \right]^2}$$

$$\text{BaseIndexRet}_t = \sum_{c=1}^C \text{BaseWeight}_{t,c} \times \ln \left(\frac{\text{ComponentLevel}_{t-2,c}}{\text{ComponentLevel}_{t-3,c}} \right)$$

where:

M = number of daily returns used to compute the volatility

$\text{BaseWeight}_{t,c}$ = base weight assigned to component index c , as of business day t

$ComponentLevel_{t-i,c}$ = closing index level of component index c , as of business day $t - i$

S&P ESG Global Macro (with Bond and FX Momentum Signals) Index. For this index, the total absolute base weight can be less than 100% when the fixed income multiplier is zero. In that scenario, the target volatility scales by the sum of the absolute values of the base weights and the leverage factor calculates as

$Target\ Volatility = \min[5\%, (5\% \times Sum\ of\ absolute\ values\ of\ Base\ Weights)]$

$Leverage\ Factor = \min\left[200\%, \frac{Target\ Volatility}{\max(VOL_{t,20D}, VOL_{t,60D})}\right]$

Base weights assigned to component indices are then adjusted by the leverage factor.

$Adjusted\ Base\ Weights = Base\ Weights \times Leverage\ Factor$

The number of units calculated for a component index on day t after market close is pre-determined based on the index level of the S&P ESG Global Macro Indices, the index level, and adjusted base weight of this component index as of day $t-2$. Therefore, the effective weight allocated to this component index at day t is slightly different from its adjusted base weight determined at day $t-2$.

Index Calculation

The indices calculate as follows:

$$IndexDailyReturn_t = \sum_{i=1}^n W_t^i \left(\frac{Subindex_t^i}{Subindex_{t-1}^i} - 1 \right)$$

where:

W_t^i = effective weight of subindex i assigned for time t

$Subindex_t^i$ = index level of subindex i at time t

$IndexValue_t = IndexValue_{t-1} * (1 + IndexDailyReturns_t)$

Index Maintenance

Rebalancing

The indices rebalance daily, based on the adjusted base weights and index levels of the index and component indices as of two business days prior. The base weights assigned to component indices are determined once a month at the second last business day of the prior month. However, the leverage factor and adjusted base weights are calibrated daily based on the covariance matrix two days prior.

Currency of Calculation and Additional Index Return Series

The indices calculate in U.S. dollars.

In addition to the indices detailed in this methodology, additional return series versions of the indices may be available, including, but not limited to the following: currency, currency hedged, decrement, fair value, inverse, leveraged, and risk control versions. For a list of available indices, please refer to the [S&P DJI Methodology & Regulatory Status Database](#).

For information on the calculation of different types of indices, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

For the inputs necessary to calculate certain types of indices, including decrement, dynamic hedged, fair value, and risk control indices, please refer to the Parameters documents available at www.spglobal.com/spdji.

Base Date and History Availability

Index history availability, base date, and base value are in the table below.

Index	Launch Date	First Value Date	Base Date	Base Value
S&P ESG Global Macro (with Commodity) Index	10/04/2019	08/31/2010	08/31/2010	100
S&P ESG Global Macro Index	10/04/2019	08/31/2010	08/31/2010	100
S&P ESG Global Macro (with Bond and FX Momentum Signals) Index	09/27/2024	08/31/2010	08/31/2010	100

Index Governance

Index Committee

An Index Committee maintains the indices. All committee members are full-time professional members of S&P Dow Jones Indices' staff. The Committee meets regularly. At each meeting, the Committee reviews pending corporate actions that may affect index constituents, statistics comparing the composition of the index to the market, companies that are being considered as candidates for addition to the index, and any significant market events. In addition, the Committee may revise index policy covering rules for selecting companies, treatment of dividends, share counts or other matters.

S&P Dow Jones Indices considers information about changes to its indices and related matters to be potentially market moving and material. Therefore, all Committee discussions are confidential.

S&P Dow Jones Indices Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Index Policy

Holiday Schedule

The indices calculate when U.S., Europe, and Japan equity markets, and the relevant bond futures and commodities markets, are open.

A complete holiday schedule for the year is available at www.spglobal.com/spdji.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures

For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Recalculation Policy

For information on the recalculation policy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.

Index Dissemination

Index levels are available through S&P Dow Jones Indices' Web site at www.spglobal.com/spdji, major quote vendors (see codes below), numerous investment-oriented Web sites, and various print and electronic media.

Tickers

The table below lists headline indices covered by this document. All versions of the below indices that may exist are also covered by this document. Please refer to the [S&P DJI Methodology & Regulatory Status Database](#) for a complete list of indices covered by this document.

Index	Return Type	BBG	RIC
S&P ESG Global Macro (with Commodity) Index	Excess Return	SPEGMAUP	---
S&P ESG Global Macro Index	Excess Return	SPEGMXUP	---
S&P ESG Global Macro (with Bond and FX Momentum Signals) Index (USD)	Excess Return	SPEGMBUP	.SPEGMBUP

Index Data

Daily constituent and index level data are available via subscription.

For product information, please contact S&P Dow Jones Indices, www.spglobal.com/spdji/en/contact-us.

Website

For further information, please refer to S&P Dow Jones Indices' Web site at www.spglobal.com/spdji.

Appendix A

Excess Return Calculation

The USD versions of the S&P Europe 350 ESG Excess Return Index, S&P Japan 500 ESG Excess Return Index, S&P Euro-Bund Futures Excess Return Index, and S&P 10-Year JGB Futures Excess Return Index calculate on a principal hedged basis:

$$IndexDailyReturn(USD)_t = \left(\frac{IndexValue(LOC)_t}{IndexValue(LOC)_{t-1}} - 1 \right) * \left(\frac{ExchangeRate(USD/LOC)_t}{ExchangeRate(USD/LOC)_{t-1}} \right)$$

where:

$ExchangeRate(USD/LOC)_t$ = U.S. dollars per local currency at time t

$IndexValue(LOC)_t$ = The index level in local currency at time t

$IndexValue(USD)_t$ = $IndexValue(USD)_{t-1} * (1 + IndexDailyReturns(USD)_t)$

For information on excess return index calculations, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

Appendix B

Methodology Changes

Methodology changes since October 4, 2019, are as follows:

Change	Effective Date (After Close)	Previous	Methodology Updated
Economic Indicator Replacement	04/24/2023	OECD Total Composite Leading Indicator	OECD G20 Composite Leading Indicator
USD Interest Rate Replacements	12/17/2021	2-Month US Dollar LIBOR interest rate 3-Month US Dollar LIBOR interest rate	SOFR overnight + 0.13088%
EUR and JPY Interest Rate Replacements	11/19/2021	2-Month ICE LIBOR JPY interest rate 3-Month ICE LIBOR JPY interest rate 2-Month ICE LIBOR EUR interest rate 3-Month ICE LIBOR EUR interest rate	1-Month TIBOR interest rate 3-Month TIBOR interest rate 1-Month EURIBOR interest rate 3-Month EURIBOR interest

Disclaimer

Performance Disclosure/Back-Tested Data

Where applicable, S&P Dow Jones Indices and its index-related affiliates (“S&P DJI”) defines various dates to assist our clients by providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the index is set to a fixed value for calculation purposes. The Launch Date designates the date when the values of an index are first considered live: index values provided for any date or time period prior to the index’s Launch Date are considered back-tested. S&P DJI defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company’s public website or its data feed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed “Date of introduction”) is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index’s public release date.

Please refer to the methodology for the Index for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations.

Information presented prior to an index’s launch date is hypothetical back-tested performance, not actual performance, and is based on the index methodology in effect on the launch date. However, when creating back-tested history for periods of market anomalies or other periods that do not reflect the general current market environment, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market the index is designed to measure or strategy the index is designed to capture. For example, market capitalization and liquidity thresholds may be reduced. In addition, forks have not been factored into the back-test data with respect to the S&P Cryptocurrency Indices. For the S&P Cryptocurrency Top 5 & 10 Equal Weight Indices, the custody element of the methodology was not considered; the back-test history is based on the index constituents that meet the custody element as of the Launch Date. Also, the treatment of corporate actions in back-tested performance may differ from treatment for live indices due to limitations in replicating index management decisions. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias. Actual returns may differ significantly from, and be lower than, back-tested returns. Past performance is not an indication or guarantee of future results.

Typically, when S&P DJI creates back-tested index data, S&P DJI uses actual historical constituent-level data (e.g., historical price, market capitalization, and corporate action data) in its calculations. As ESG investing is still in early stages of development, certain datapoints used to calculate certain ESG indices may not be available for the entire desired period of back-tested history. The same data availability issue could be true for other indices as well. In cases when actual data is not available for all relevant historical periods, S&P DJI may employ a process of using “Backward Data Assumption” (or pulling back) of ESG data for the calculation of back-tested historical performance. “Backward Data Assumption” is a process that applies the earliest actual live data point available for an index constituent company to all prior historical instances in the index performance. For example, Backward Data Assumption inherently assumes that companies currently not involved in a specific business activity (also known as “product involvement”) were never involved historically and similarly also assumes that companies currently involved in a specific business activity were involved historically too. The Backward Data Assumption allows the hypothetical back-test to be extended over more historical years than would be feasible using only actual data. For more information on “Backward Data Assumption” please refer to the FAQ. The methodology and factsheets of any index that employs backward assumption in the back-tested history

will explicitly state so. The methodology will include an Appendix with a table setting forth the specific data points and relevant time period for which backward projected data was used. Index returns shown do not represent the results of actual trading of investable assets/securities. S&P DJI maintains the index and calculates the index levels and performance shown or discussed but does not manage any assets.

Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three-year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

Past performance of an index is not an indication or guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments based on that index. S&P DJI does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P DJI makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P DJI is not an investment advisor, commodity trading advisor, fiduciary, “promoter” (as defined in the Investment Company Act of 1940, as amended) or “expert” as enumerated within 15 U.S.C. § 77k(a), and S&P DJI makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. S&P DJI is not a tax advisor. Inclusion of a security, commodity, crypto currency, or other asset within an index is not a recommendation by S&P DJI to buy, sell, or hold such security, commodity, crypto currency, or other asset, nor is it considered to be investment or trading advice.

No content contained in these materials (including index data, ratings, credit-related analyses and data, research, valuations, model, software or other application or output therefrom) or any part thereof (“Content”) may be modified, reverse engineered, reproduced, or distributed in any form or by any means, or stored in a database or retrieval system, without the prior written permission of S&P DJI. The Content shall not be used for any unlawful or unauthorized purposes. S&P DJI and its third-party data providers and licensors (collectively “S&P Dow Jones Indices Parties”) do not guarantee the accuracy, completeness, timeliness, or availability of the Content. S&P Dow Jones Indices Parties are not responsible for any errors or omissions, regardless of the cause, for the results obtained from the use of the Content. THE CONTENT IS PROVIDED ON AN “AS IS” “WHERE IS” BASIS. S&P DOW JONES INDICES PARTIES DISCLAIMS ANY AND ALL

EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Dow Jones Indices Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special, or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of the Content even if advised of the possibility of such damages.

Credit-related information and other analyses, including ratings, research and valuations are generally provided by licensors and/or affiliates of S&P Dow Jones Indices, including but not limited to S&P Global's other divisions such as S&P Global Market Intelligence. Any credit-related information and other related analyses and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. Any opinion, analyses and rating acknowledgement decisions are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P Dow Jones Indices does not assume any obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P DJI does not act as a fiduciary or an investment advisor. While S&P DJI has obtained information from sources it believes to be reliable, S&P DJI does not perform an audit or undertake independent verification of any information it receives. S&P DJI reserves the right to vary or discontinue any index at any time for regulatory or other reasons. Various factors, including external factors beyond S&P DJI's control might necessitate material changes to indices.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P Global Ratings reserves the right to assign, withdraw or suspend such acknowledgement at any time and in its sole discretion. S&P Dow Jones Indices, including S&P Global Ratings, disclaim any duty whatsoever arising out of the assignment, withdrawal, or suspension of an acknowledgement as well as any liability for any damage alleged to have been suffered on account thereof. Affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, may receive compensation for its ratings and certain credit-related analyses, normally from issuers or underwriters of securities or from obligors. Such affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, reserve the right to disseminate its opinions and analyses. Public ratings and analyses from S&P Global Ratings are made available on its Web sites, www.standardandpoors.com (free of charge), and www.ratingsdirect.com and www.globalcreditportal.com (subscription), and may be distributed through other means, including via S&P Global Ratings publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.

S&P Global keeps certain activities of its various divisions and business units separate from each other to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions, and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate, or otherwise address.

Some indices use the Global Industry Classification Standard (GICS®), which was developed by, and is the exclusive property and a trademark of, S&P Global and MSCI. Neither MSCI, S&P DJI nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use

thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P DJI, any of their affiliates or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

S&P Dow Jones Indices products are governed by the terms and conditions of the agreements under which they may be provided. A license is required from S&P Dow Jones Indices to display, create derivative works of and/or distribute any product or service that uses, is based upon and/or refers to any S&P Dow Jones Indices and/or index data.

ESG Indices Disclaimer

S&P DJI provides indices that seek to select, exclude, and/or weight index constituents based on, but not limited to, certain environmental, social or governance (ESG) indicators, or a combination of those indicators, including the following: environmental indicators (including the efficient use of natural resources, the production of waste, greenhouse gas emissions, or impact on biodiversity); social indicators (such as, inequality and investment in human capital); governance indicators (such as sound management structures, employee relations, remuneration of staff, tax compliance, respect for human rights, anti-corruption and anti-bribery matters), specific sustainability or values-related company involvement indicators (for example, production/distribution of controversial weapons, tobacco products, or thermal coal), or controversies monitoring (including research of media outlets to identify companies involved in ESG-related incidents).

S&P DJI ESG indices use ESG metrics and scores in the selection and/or weighting of index constituents. ESG scores or ratings seek to measure or evaluate a company's, or an asset's, performance with respect to environmental, social and corporate governance issues.

The ESG scores, ratings, and other data used in S&P DJI ESG indices is supplied directly or indirectly by third parties (note these parties can be independent affiliates of S&P Global or unaffiliated entities) so an S&P DJI ESG index's ability to reflect ESG factors depends on these third parties' data accuracy and availability.

ESG scores, ratings, and other data may be reported (meaning that the data is provided as disclosed by companies, or an asset, or as made publicly available), modelled (meaning that the data is derived using a proprietary modelling process with only proxies used in the creation of the data), or reported and modelled (meaning that the data is either a mix of reported and modelled data or is derived from the vendor using reported data /information in a proprietary scoring or determination process).

ESG scores, ratings, and other data, whether from an external and/or internal source, is based on a qualitative and judgmental assessment, especially in the absence of well-defined market standards, and due to the existence of multiple approaches and methodologies to assess ESG factors and considerations. An element of subjectivity and discretion is therefore inherent in any ESG score, rating, or other data and different ESG scoring, rating, and/or data sources may use different ESG assessment or estimation methodologies. Different persons (including ESG data ratings, or scoring providers, index administrators or users) may arrive at different conclusions regarding the sustainability or impact of a particular company, asset, or index.

Where an index uses ESG scores, ratings or other data supplied directly or indirectly by third parties, S&P DJI does not accept responsibility for the accuracy or completeness of such ESG scores, ratings, or data. No single clear, definitive test or framework (legal, regulatory, or otherwise) exists to determine 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. In the absence of well-defined market standards and due to the existence of multitude approaches, the exercise of judgment is necessary. Accordingly, different persons may classify the same investment, product and/or strategy differently regarding 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled

objectives. Furthermore, the legal and/or market position on what constitutes an 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives may change over time, especially as further regulatory or industry rules and guidance are issued and the ESG sustainable finance framework becomes more sophisticated.

Prospective users of an S&P DJI ESG Index are encouraged to read the relevant index methodology and related disclosures carefully to determine whether the index is suitable for their potential use case or investment objective.
