Indices for the above countries will be calculated if there are eligible bonds.

Index Families

The following composite indices are calculated:

- **S&P Global Developed Aggregate Ex-Collateralized Bond Index.** The index measures the performance of investment grade debt issued by sovereign, quasi-sovereign, foreign government, and corporate entities in the native currencies of the developed countries listed in *Highlights*. This index excludes collateralized bonds.
 - **S&P Global Developed Sovereign Bond Index.** The index measures the performance of developed-market sovereign debt.
 - **S&P Global Developed Sovereign Ex-U.S. Bond Index.** The index measures the performance of developed-market sovereign debt and excludes U.S. Treasury bonds.
 - **S&P Global Developed Ex-Australia Sovereign Bond Index.** The index measures the performance of developed-market sovereign debt and excludes Australian bonds.
 - **S&P Global Developed Ex-Australia, Hong Kong, Israel, Luxembourg Sovereign Bond Index.** The index measures the performance of developed-market sovereign debt and excludes bonds from Australia, Hong Kong, Israel, and Luxembourg.

¹ Countries considered Developed Markets for index membership.

² Greece lost Investment Grade status in May 2010 and Developed status in March 2012.

- **S&P G7 Sovereign Bond Index.** The index measures the performance of local currency-denominated securities publicly issued by Group of Seven (G7) member countries for their domestic markets.
- **S&P G7 Sovereign 20+ Year Bond Index.** The index measures the performance of local currency-denominated securities with maturities greater than 20 years publicly issued by G7 member countries for their domestic markets.
 - ❖ **S&P G7 Sovereign Duration-Capped 20+ Year Bond Index (AUD).** The index measures the performance, in AUD terms, of local currency-denominated securities with maturities greater than 20 years publicly issued by G7 member countries for their domestic markets. The index caps member countries' dollar duration³ contribution at 25% of the index.
 - ❖ **S&P G7 Sovereign Duration-Capped 20+ Year AUD Hedged Bond Index.** The index measures the AUD hedged performance of local currency-denominated securities with maturities greater than 20 years publicly issued by G7 member countries for their domestic markets. The index caps member countries' dollar duration contribution at 25% of the index.
- **S&P Pan-Europe Developed Sovereign Bond Index.** The index is a sub-index of the S&P Global Developed Sovereign Bond Index and measures the performance of developed-market Pan-European sovereign debt.
- **S&P Eurozone Developed Sovereign Bond Index.** The index is a sub-index of the S&P Pan-Europe Developed Sovereign Bond Index and measures the performance of developed-market Eurozone sovereign debt.
- **S&P Eurozone Sovereign Bond Index.** The index measures the performance of both developed-market and emerging-market Eurozone sovereign debt.
- **S&P Global Developed Corporate Bond Index.** The index is a subset of the S&P Global Developed Aggregate Ex-Collateralized Index and tracks the performance of developed-market corporate bonds.
- **S&P Global Developed Corporate Infrastructure Bond Index.** The index is a subset of the S&P Global Developed Corporate Bond Index and tracks the performance of investment grade corporate bonds in the native currencies of the developed countries listed in *Highlights*.
 - ❖ **S&P Global Developed Corporate Infrastructure Bond Select Min Par Index.** The index is a subset of the S&P Global Developed Corporate Infrastructure Bond Index.
 - ❖ **S&P Solvency II Capital Efficiency Corporate Bond Index.** The index is a subset of the S&P Global Developed Corporate Infrastructure Bond Select Min Par Index, and tracks the performance of bonds meeting the eligibility criteria under Solvency II. Solvency II eligibility is subject to a recurring independent assessment made by Deloitte Tax & Consulting S.à r.l.
- **S&P U.S. Aggregate Bond Index.** The index measures the performance of the U.S. dollar-denominated investment grade U.S. fixed income market, including U.S. Treasuries, quasi-governments, supranational and non-U.S. governments and agencies, corporates, covered bonds, residential mortgage pass-throughs and taxable municipal bonds. Non-residential mortgage collateralized debt, such as commercial mortgage-backed securities, asset-backed securities, and all collateralized mortgage obligations, are excluded from the index.
- **S&P U.S. Ultra Short Treasury Bill & Bond Index.** The index measures the performance of U.S. Treasury bills and Treasury bonds and notes with less than one remaining year to maturity.
- **S&P U.S. Government Bond Index.** The index measures the performance of U.S. dollar-denominated U.S Treasury and agency securities.

³ Dollar duration is calculated as Modified Duration multiplied by Market Value in the index base currency.

- **S&P U.S. Government & Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated U.S Treasury, agency and U.S. investment grade corporate securities.
- **S&P U.S. Government / Credit Bond Index.** The index measures the performance of the U.S. dollar-denominated investment grade U.S. fixed income market, including U.S. Treasuries, quasi-governments, supranational and non-U.S. governments and agencies, corporates and taxable municipal bonds.
- **S&P U.S. Dollar Global Investment Grade Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated investment grade corporate bonds.
- **S&P U.S. Dollar Global Investment Grade Corporate Bond Crossover Rated Index.** The index measures the performance of U.S. dollar-denominated corporate bonds whose lowest available rating from S&P, Moody's and Fitch falls on or between BB-/Ba3/BB- and BBB+/Baa1/BBB+.
- **S&P U.S. Investment Grade Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated investment grade corporate bonds issued in the U.S. by companies whose country of risk⁴ use official G-10 currencies, excluding those countries that are members of the United Nations Eastern European Group (EEG).
- **Dow Jones Equal Weight U.S. Issued Corporate Bond Index.** The index measures equal weighted performance of a subset of the S&P U.S. Investment Grade Corporate Bond Index which contains one bond per issuer and has a maximum of 100 total constituents. Hybrid instruments and securities with deferred interest payments are excluded. For each issuer, the bond with the largest par amount outstanding is considered for inclusion. In cases of ties, the bond with the most recent issue date is considered.
- **S&P U.S. Foreign Issued Investment Grade Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated investment grade corporate bonds which meet at least one of the following criteria:
 - Issued outside of the U.S.
 - Issued by a company whose country of risk falls outside the G-10 currencies.
 - Issued by a company whose country of risk is included in the United Nations Eastern European Group (EEG).
- **S&P U.S. Catholic Values Aggregate Bond Index.** The index measures the performance of a combination of the S&P U.S. Government Bond Index, S&P 500 Catholic Values Investment Grade Bond Index⁵, and S&P U.S. Mortgage-Backed Securities Index. At each rebalancing, index weights are assigned so that the sector weights for the 11 Corporate GICS sectors are matched to the corresponding GICS sector weights in the S&P U.S. Aggregate Bond Index, with non-corporate bonds re-weighted proportionally to maintain the index's original market value. Additionally, S&P Dow Jones Indices consults with Father Séamus Finn O.M.I., Chief of Faith Consistent Investing for the Oblate International Pastoral Investment Trust, on issues related to the index methodology's consistency with the Socially Responsible Investment Guidelines of the USCCB.
- **S&P U.S. Dollar Global High Yield Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated high yield corporate bonds.
- **S&P U.S. High Yield Corporate Bond Index.** The index measures the performance of U.S. dollar-denominated high yield corporate bonds issued in the U.S. by companies whose country of risk use official G-10 currencies, excluding those countries that are members of the United Nations Eastern European Group (EEG).

⁴ Country of Risk data considers revenue by geography, company headquarters country, security listing country and filing currency country to assign country of risk. If country of risk data is not available, country of domicile is used.

⁵ Please refer to the S&P 500 Bond Index Methodology for a description of the S&P 500 Catholic Values Investment Grade Bond Index.

- **S&P U.S. High Yield Corporate Distressed Bond Index.** The index measures the performance of bonds in the S&P U.S. High Yield Corporate Bond Index with a minimum option adjusted spread of 1,000 basis points.
- **S&P Canada All Bond Index.** The index measures the performance of the Canadian fixed income market, and is comprised of the S&P Canada Aggregate Bond Index and the S&P Canada High Yield Corporate Bond Index.
- **S&P Canada Aggregate Bond Index.** The index measures the performance of the investment grade Canadian fixed income market, including government, provincial and municipal, corporate, covered bond, and collateralized securities.
 - **S&P Canada Government Bond Index.** The index measures the performance of Canadian dollar denominated government, provincial and municipal investment grade securities.

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the indices continue to achieve their objectives.

Eligibility Criteria

There are four main sector categories eligible for inclusion for each country and currency index – Sovereign, Corporate, Quasi & Foreign Government, and Collateralized. The country section below outlines the sector categories and specific eligibility rules such as currency, minimum par outstanding, data sources, and market of issue.

The countries included in the S&P Global Developed Sovereign Bond Index family are classified by S&P Dow Jones Indices as developed markets. S&P Dow Jones Indices conducts a rigorous country classification process to evaluate the status of global markets.

For information on country classification, please refer to the S&P Global BMI, S&P/IFCI Methodology and Country Classification Methodology.

S&P Sovereign Indices. The indices measure the performance of debt publicly issued by each sovereign member country in its own native currency in the domestic or Eurobond markets. The sector is subdivided into Bill and Bond.

S&P Corporate Bond Indices. The indices measure the performance of debt issued by any corporation regardless of domicile in the native currency of the countries listed in *Highlights*. The sector is subdivided into investment grade and high yield. Corporate securities guaranteed by either a government or government agency are ineligible. U.S. corporate sub-indices employ a country of risk classification for further country based eligibility criteria. Please see *Index Families* for more information.

S&P Quasi & Foreign Government Bond Indices. The indices measure the performance of debt issued by a government agency, local government, foreign governments, supranational, and corporate securities guaranteed by the government or a government agency, in the native currency of the countries listed in *Highlights*. These indices exclude the bonds issued by central governments of countries in their own domestic currency. In some markets indices may be calculated for subdivisions of the sector. For example, in the U.S. there are separate indices for Muni, Agency and Supranational & Foreign Government.

S&P Collateralized Bond Indices. The indices measure the performance of investment grade collateralized debt issued in the native currency of certain countries listed in *Highlights*. Non-residential mortgage collateralized debt, such as commercial mortgage-backed securities and asset-backed securities, as well as all collateralized mortgage obligations are included in the index. Residential mortgage backed securities are included in the S&P U.S. Aggregate Bond Index. Please refer to *Available Composites* for a listing of indices, including collateralized bond indices.

General Eligibility Factors

Country and Market of Issue. **Sovereign Bonds** must be debt issued by the central governments of the countries listed in *Highlights* and must be issued in the domestic or Eurobond markets. **Other Bonds** (non-sovereign bonds) have no restrictions on the issuer's country of domicile and must be issued in the domestic or Eurobond markets.

Currency. **Sovereign bonds** must be issued in the domestic currency of the issuer. **Other bonds** must be issued in the native currency of one of the countries listed in *Highlights*.

Coupon Type. The following coupon types are eligible:

- Fixed Rate
- Step-up
- Zero Coupon
- Fixed-to-Float

Optionality. Bullets, callable and puttable securities are included. Fixed-to-floating rate securities qualify if they are in the fixed phase and have at least one month until the date they transition to floating.

Exclusions. The following bond types are specifically excluded from the index:

- Bills
- Sukuk bonds
- Floating-rate instruments
- Convertible bonds⁹
- STRIPS
- Inflation-linked instruments
- Sinkable bonds⁸

Maturity. The maturity date must be greater than one month from the rebalancing date. No bond matures in the index.

Settlement. Bonds issued up to the rebalancing reference date (regardless of the settlement date). Standard index settlement convention is same-day (e.g. T+0), unless otherwise specified. For month-ends that fall on a weekend, the interest accrued during the month will be reflected within the calendar month, regardless of settlement convention. For rates that are not available at month-end (e.g. a rate with an unknown reset), the accrual will be based on the current rate and adjusted the first business day of the next month.

Credit Rating Quality. Criteria are as follows:

- **New Issues.** New issues must be rated by at least one rating agency (S&P, Moody's, or Fitch) to be considered at the next rebalancing.
- **Non-rated and Defaulted Bonds.** Bonds that are no longer rated or have defaulted are removed at the next rebalancing.
- **Investment Grade.** The minimum credit rating for inclusion is BBB-/Baa3/BBB-. The lowest of all available ratings (S&P, Moody's and Fitch) is used as the index rating.
- **High Yield.** The maximum credit rating for inclusion is BB+/Ba1/BB+. The lowest of all available ratings (S&P, Moody's, and Fitch) is used as the index rating.

The issuer rating may be applied in place of the bond level ratings. For example, a sovereign bond index may apply the long term foreign currency issuer rating in place of each sovereign bond issue.¹⁰

For ratings-based sub-indices, the above rules are applied to the appropriate ratings band.

Pricing. Bid side pricing – Refinitiv.¹¹ Bonds not priced by the designated pricing source are ineligible for index inclusion.

⁸ Sinkable bonds are only excluded in the S&P Asia Pacific Bond Indices.

⁹ Bonds with convertible features (including Contingent Convertibles) are excluded from the indices.

¹⁰ Prior to July 2016, S&P issuer credit ratings were used to determine sovereign ratings in the S&P Global Developed Aggregate Ex-Collateralized Bond Index.

¹¹ Mortgage-backed securities are priced by Interactive Data Corporation; taxable municipal bonds are priced by Securities Evaluations | ICE Data Services.

S&P Solvency II Capital Efficiency Corporate Bond Index. Solvency II eligibility is subject to an annual independent assessment made by Deloitte Tax & Consulting S.à r.l. Eligibility as Qualifying Infrastructure Company Investment (“QICI”) is based on a series of criteria defined by the EU Commission Delegated Regulation 2016/467, and EU Commission Delegated Regulation 2017/1542. The criteria for the assessment include infrastructure and location, cash flow stability, investors protection, and risk of default. Further information can be found here: <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32017R1542&from=DE>.

Index Construction

Index Calculations

Except for the S&P G7 Sovereign Duration-Capped 20+ Year AUD Hedged Bond Index and Dow Jones Equal Weight U.S. Issued Corporate Bond Index, the indices are market value weighted.

- **S&P G7 Sovereign Duration-Capped 20+ Year AUD Hedged Bond Index.** At each rebalancing the index is market value weighted. The dollar duration contribution of each country cannot exceed 25%, although the final weight in the index may be over 25%. Any excess dollar duration contribution is proportionally redistributed to uncapped countries.
- **Dow Jones Equal Weight U.S. Issued Corporate Bond Index.** At each rebalancing the index is equal-weighted.
- **S&P U.S. Catholic Values Aggregate Bond Index.** At each rebalancing, the index weights are assigned as follows:
 - Sector weights for the 11 Corporate GICS sectors are matched to the corresponding GICS sector weights in the S&P U.S. Aggregate Bond Index.
 - Non-corporate bonds are re-weighted proportionally to maintain the index's original market value.

The total return is calculated by aggregating the interest return, reflecting the return due to paid and accrued interest, and price return, reflecting the gains or losses due to changes in end-of-day price and principal repayments.

For further details regarding Index Calculations, please refer to S&P Dow Jones Indices' Fixed Income Index Mathematics Methodology.

Index Maintenance

Rebalancing

Indices are reviewed and rebalanced in accordance with their stated schedule. The Index Committee, nevertheless, reserves the right to make adjustments to an index at any time that it believes appropriate.

Additions, deletions and other changes to the index arising from the rebalancing are made provided the security's reference information and pricing are available by designated pricing and data providers on the rebalancing reference date. Changes to the index are published on the announcement date and become effective on the rebalancing date. Information related to the rebalancing is obtained and disseminated after the close of business.

Rebalancing Schedule	
Rebalancing Frequency	Monthly
Rebalancing Date	Last day of the rebalancing period (T)
Announcement Date	T minus 3
Reference Date	T minus 4

All days reflect after the close and count business days

Ongoing Maintenance

The indices are also reviewed on an ongoing basis to account for the following:

- When an index bond is in default or misses an interest payment, the price reported by the pricing source is used. However, the Index Committee may determine that the bond be removed from the index at a different price and may specify a price of 0.00. The decision of the Index Committee is final.
- If an index bond is no longer priced by the pricing source, the last available price is used. However, the Index Committee may determine that a different price be used. The decision of the Index Committee is final. For clarity, index bonds that are no longer priced by the pricing source fail to meet the pricing eligibility factors and are removed at the next rebalancing date. If the bond is priced for at least one of the five business days prior to the rebalancing announcement date, the bond remains in the index. Otherwise, it is removed from the index at the subsequent rebalancing date.

S&P Solvency II Capital Efficiency Corporate Bond Index. Each security in the index is reviewed annually for ongoing eligibility. New additions to the S&P Global Developed Infrastructure Bond Select Min Par Index are reviewed at the monthly rebalancing.

Currency of Calculation and Additional Index Return Series

The indices are calculated in their respective local currencies. Certain indices are also available in U.S. dollars or U.S. dollar hedged versions.

WM/Reuters foreign exchange rates taken at 04:00 PM London time are used in the end-of-day calculation of the indices. These mid-market fixings are calculated by the WM Company based on Refinitiv's data and appear on Refinitiv's pages WMRA.¹⁴

¹⁴ For the S&P US Treasury Bond 7-10 Year Index (TTM JPY Hedged) and the S&P US Treasury Bond 7-10 Year Index (TTM JPY), the Tokyo 10:00 AM TTM spot rates of the following business day are used in the calculation.

Additional currency and currency hedged versions of the indices, as well as maturity, sector and rating-based sub-indices may be available. For a list of available sub-indices and tickers, please refer to S&P Dow Jones Indices' Fixed Income Index Directory available at www.spdji.com.

For more information on currency and currency hedged indices, please refer to S&P Dow Jones Indices' Fixed Income Index Mathematics Methodology.

Index Governance

Index Committee

S&P Dow Jones Indices' Fixed Income Index Committee maintains the indices. All committee members are full-time professionals at S&P Dow Jones Indices. Meetings are held regularly. The Index Committee oversees the management of the indices, including determinations of intra-rebalancing changes, maintenance and inclusion policies, and other matters affecting the maintenance and calculation of the indices.

In fulfilling its responsibilities, the Index Committee has full and complete discretion to (i) amend, apply, or exempt the application of index rules and policies as circumstances may require and (ii) add, remove, or by-pass any bond in determining the composition of an index.

The Index Committee may rely on any information or documentation submitted to it or gathered by it that the Index Committee believes to be accurate. The Index Committee reserves the right to reinterpret publicly available information and to make changes to the indices based on a new interpretation of that information at its sole discretion. All Index Committee discussions are confidential.

The Index Committee is separate from and independent of other analytical groups at S&P Global. In particular, the Index Committee has no access to or influence on decisions by S&P Global Ratings analysts.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Fixed Income Policies & Practices Methodology.

Index Policy

Announcements

Global and regional announcements of any relevant information pertaining to the indices are made after the close of business. Press releases are posted on the S&P Dow Jones Indices Web site at www.spdji.com.

Holiday Schedule

Global indices are calculated on all business days of the year (Monday through Friday) except New Year's Day (January 1st).

For regional and sub-index holiday schedules, a complete holiday schedule for the year is available on S&P Dow Jones Indices' Web site at www.spdji.com.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

End-of-Day Calculation

Index levels are calculated at the end of each business day, via S&P Dow Jones Indices' Web site. This may be subject to change.

Recalculation Policy

For information on the recalculation policy please refer to S&P Dow Jones Indices' Fixed Income Policies & Practices Methodology.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Fixed Income Policies & Practices Methodology.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.

Index Dissemination

Index levels are available through S&P Dow Jones Indices' Web site at www.spdji.com, major quote vendors (see codes below), numerous investment-oriented Web sites, and various print and electronic media. Daily index levels and index data are available via subscription.
