Introduction

Index Objective

The S&P Global Sovereign Inflation-Linked Bond Indices measure the market-value-weighted performance of inflation-linked sovereign debt publicly issued by governments in their domestic markets.

Index Family

S&P Global Developed Sovereign Inflation-Linked Bond Index. The index measures the performance of developed-market inflation-linked sovereign debt.

- **S&P Eurozone Sovereign Inflation-Linked Bond Index.** The index is a subset of the S&P Global Developed Sovereign Inflation-Linked Bond Index and measures the performance of developed-market Eurozone inflation-linked sovereign debt.
- **S&P U.S. TIPS Index.** The index is a subset of the S&P Global Developed Sovereign Inflation-Linked Bond Index and measures the performance of U.S. inflation-linked sovereign debt.
 - **S&P U.S. TIPS 7-10 Year Index.** The index is a subset of the S&P U.S. Treasury TIPS Index with bonds with between 7-10 years of remaining maturity.
 - **S&P U.S. TIPS 7-10 Year Excess Return Index.** The index measures the daily return of the S&P U.S. Treasury TIPS 7-10 Year Index minus the daily return of the S&P U.S. Treasury Current 3-Month Bill Index.

S&P Global Emerging Sovereign Inflation-Linked Bond Index. The index measures the performance of emerging-market inflation-linked sovereign debt.

- **S&P Pacific Alliance Sovereign Inflation-Linked Bond Index.** The index is a subset of the S&P Global Emerging Sovereign Inflation-Linked Bond Index and measures the performance of emerging-market inflation-linked sovereign debt in Chile, Colombia, Mexico, and Peru.
- **S&P Andean Sovereign Inflation-Linked Bond Index.** The index is a subset of the S&P Global Emerging Sovereign Inflation-Linked Bond Index and measures the performance of emerging-market inflation-linked sovereign debt in Chile, Colombia, and Peru.

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of the indices governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the indices continue to achieve their objective.

Eligibility Criteria

Eligibility Factors

Countries. The countries included in the S&P Global Developed Sovereign Inflation-Linked Bond Index are classified by S&P Dow Jones Indices as developed. The countries included in the S&P Global Emerging Sovereign Inflation-Linked Bond Index are classified by S&P Dow Jones Indices as emerging. S&P Dow Jones Indices conducts a rigorous country classification process to evaluate the status of global markets.

For more information on country classification, please refer to the S&P Fixed Income Policies & Practices Methodology.

Currency. Securities must be issued in the domestic currency of the issuer.

Maturity. Each bond must have a maturity greater than one month from the rebalancing date.¹ No bond matures in an index.

Market of Issue. Securities must be sovereign debt issued by the central governments and issued in the domestic or Eurobond markets.

Coupon Type. Only fixed coupon bonds are included in the indices.

Size. A minimum one billion (local currency) outstanding at each rebalancing is required for all countries except the following:

Country	Currency	Size
Japan	JPY	100 Billion
Chile	CLF	10 Million
Peru	PEN	100 Million
South Korea	KRW	1 Trillion

Par amounts of index securities are adjusted on the rebalancing date to reflect any changes that have occurred since the previous rebalancing date, due to partial calls, tenders, U.S. Treasury Department secondary market repurchases, etc. Adjustments due to U.S. Government or Federal Reserve holdings are made once per quarter, on the rebalancing date in the first month of the quarter.

Optionality. Bullets, callable and puttable, are included.

Settlement. Bonds issued up to the rebalancing reference date (regardless of the settlement date). Standard index settlement convention is same-day (e.g. T+0), unless otherwise specified. For month-ends that fall on a weekend, the interest accrued during the month will be reflected within the calendar month, regardless of settlement convention. For rates that are not available at month-end (e.g. a rate with an unknown reset), the accrual will be based on the current rate and adjusted the first business day of the next month.

Exclusions. Except for the S&P U.S. Treasury Current 3-Month Bill Index, the following bond types are specifically excluded from the indices:

¹ For the S&P/ASX Government Inflation-Linked Bond Index and S&P South Africa 1+ Year Sovereign Inflation-Linked Bond Index, each bond must have a maturity greater than one year from the rebalancing date.

- Bills
- Floating-rate issues
- STRIPS
- Sukuk

For the S&P U.S. Treasury Current 3-Month Bill Index, government bills are eligible.

Pricing. Bid Price – – Refinitiv, except for the following indices:

- S&P/ASX Government Inflation-Linked Bond Index – Mid Price - Yield Broker
- S&P/BMV Mexico Sovereign Inflation-Linked Bond Index – Valmer

Bonds not priced by the designated pricing source are ineligible for index inclusion.

For information on the S&P/ASX Government Inflation-Linked Bond Index, please refer to the S&P/ASX Australian Fixed Interest Index Series Methodology document available at www.spdji.com.

For information on the S&P/BMV Mexico Sovereign Inflation-Linked Bond Index, please refer to the S&P/BMV Fixed Income Indices Methodology document available at www.spdji.com.

Index Construction

Index Calculations

The indices are weighted by market value.

The total return is calculated by aggregating the interest return, reflecting the return due to paid and accrued interest, and price return, reflecting the gains or losses due to changes in the end-of-day price and principal repayments.

For further details regarding Index Calculations, please refer to S&P Dow Jones Indices' Fixed Income Index Mathematics Methodology.

Index Maintenance

Rebalancing

Except for the S&P U.S. TIPS 7-10 Year Excess Return and the S&P/ASX Government Inflation-Linked Bond Index, the indices are reviewed and rebalanced on a monthly basis using the schedule in the table below.

- For the S&P U.S. TIPS 7-10 Year Excess Return weights are reset on a daily basis.
- For the S&P/ASX Government Inflation-Linked Bond Index, the reference date is T minus 5.

Additions, deletions and other changes to the index arising from the rebalancing are made provided the security's reference information and pricing are available by designated pricing and data providers on the rebalancing reference date. Changes to the index are published on the announcement date and become effective on the rebalancing date. Information related to the rebalancing is obtained and disseminated after the close of business.

Rebalancing Schedule	
Rebalance Frequency	Monthly
Rebalancing Date	Last day of the rebalancing period (T)
Announcement Date	T minus 3
Reference Date	T minus 4

All days reflect after the close and count business days.

Ongoing Maintenance. The indices are also reviewed on an ongoing basis to account for the following:

- When an index bond is in default or misses an interest payment, the price reported by the pricing source is used. However, the Index Committee may determine that the bond be removed from the index at a different price and may specify a price of 0.00. The decision of the Index Committee is final.
- If an index bond is no longer priced by the pricing source, the last available price is used. However, the Index Committee may determine that a different price be used. The decision of the Index Committee is final. For clarity, index bonds that are no longer priced by the pricing source fail to meet the pricing eligibility factors and are removed at the next rebalancing date. If the bond is priced for at least one of the five business days prior to the rebalancing announcement date, the bond remains in the index. Otherwise, it is removed from the index at the subsequent rebalancing date.

Currency of Calculation and Additional Index Return Series

The aggregate indices are calculated in U.S. dollars and the underlying indices are calculated in their respective local currencies. Certain underlying indices are also available in U.S. dollars as detailed in *Index Dissemination*.

WM/Refinitiv foreign exchange rates are taken daily at 4:00 PM London time and used in the calculation of the indices. These mid-market fixings are calculated by the WM Company based on Refinitiv data and appear on Refinitiv pages WMRA.

Additional currency and currency hedged versions of the indices, as well as maturity, sector, and rating-based sub-indices, may be available. For a list of available sub-indices and tickers, please refer to S&P Dow Jones Indices' Fixed Income Index Directory available at www.spdji.com.

For more information on currency and currency hedged indices, please refer to S&P Dow Jones Indices' Fixed Income Index Mathematics Methodology.

Index Governance

Index Committee

S&P Dow Jones Indices' Fixed Income Index Committee maintain the indices. All committee members are full-time professionals at S&P Dow Jones Indices. Meetings are held regularly.

The Index Committee oversees the management of the indices, including determinations of intra-rebalancing changes, maintenance and inclusion policies, and other matters affecting the maintenance and calculation of the indices.

In fulfilling its responsibilities, the Index Committee has full and complete discretion to (i) amend, apply, or exempt the application of index rules and policies as circumstances may require and (ii) add, remove, or by-pass any bond in determining the composition of an index.

The Index Committee may rely on any information or documentation submitted to it or gathered by it that the Index Committee believes to be accurate. The Index Committee reserves the right to reinterpret publicly available information and to make changes to the indices based on a new interpretation of that information at its sole discretion. All Index Committee discussions are confidential.

The Index Committee is separate from and independent of other analytical groups at S&P Global. In particular, the Index Committee has no access to or influence on decisions by S&P Global Ratings analysts.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Fixed Income Policies & Practices Methodology.
