Introduction

Index Objective

S&P Shariah Indices. The indices measure the performance of Shariah-compliant companies from an index universe. Index constituents are float-adjusted market capitalization (FMC) or capped market capitalization weighted, as defined for each index in *Eligibility Criteria* and *Index Construction*.

S&P Shariah Dividend Indices. The indices measure the performance of Shariah-companies from an index universe formed from existing S&P indices that have followed a managed-dividends policy of consistently increasing dividends every year for at least three years and meet the minimum liquidity requirements as defined in *Eligibility Criteria*. Index constituents are indicated annual dividend (IAD) yield weighted.

Index Family

Shariah is Islamic canonical law and has certain structures regarding finance and commercial activities permitted for Muslims.

The S&P Shariah Indices include the following:

- S&P 500 Shariah
- S&P 500 ESG Shariah
- S&P BRIC Shariah¹
- S&P BSE 500 Shariah²
- S&P China LargeMidCap Shariah 10% Capped
- S&P Developed LargeMidCap ESG Shariah
- S&P DM Ex-U.S. & EM 50/50 Shariah
- S&P Europe 350 ESG Shariah
- S&P Europe 350 Shariah
- S&P Frontier BMI Shariah
- S&P GCC Composite Shariah 5/10/40 Capped Index
- S&P GCC Composite Shariah Dividend
- S&P GCC Shariah
- S&P Global 1200 ESG Shariah
- S&P Global 1200 Shariah
- S&P Global 1200 Shariah Select
- S&P Global 1200 Shariah Information Technology (Sector) Capped
- S&P Global All Equity REIT Shariah Capped

¹ For information on the S&P BRIC Shariah, please see the S&P BRIC Shariah Methodology available at www.spglobal.com/spdji/.

² For information on the S&P BSE 500 Shariah, please see the S&P/BSE 500 Shariah Methodology available at www.spglobal.com/spdji/.

- S&P Global BMI Shariah
- S&P Global Infrastructure Shariah
- S&P Global LargeMidCap ESG Shariah
- S&P Global Property Shariah
- S&P High Yield Dividend Aristocrats Shariah
- S&P Japan 500 Shariah
- S&P Pan Arab Shariah
- S&P Pan Asia Shariah
- S&P Saudi Arabia Shariah 5/10/40 Capped Index
- S&P South Africa Composite Shariah
- S&P/ASX 200 Shariah
- S&P/ASX 300 Shariah
- S&P/TOPIX 150 Shariah
- S&P/TSX 60 Shariah

Ratings Intelligence Partners

S&P Dow Jones Indices has contracted with Ratings Intelligence Partners (RI) to provide the Shariah screens and filter the stocks based on these screens. RI is a London/Kuwait based consulting company specializing in solutions for the global Islamic investment market. Its team consists of qualified Islamic researchers who work directly with a Shariah Supervisory Board, which is a board of Islamic scholars serving to interpret business issues and recommend actions related to business decisions for the indices.

For more information on RI, please see [here](#).

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

Supporting Document	URL
S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology	Equity Indices Policies & Practices
S&P Dow Jones Indices' Index Mathematics Methodology	Index Mathematics Methodology
S&P Dow Jones Indices' Float Adjustment Methodology	Float Adjustment Methodology
S&P Dow Jones Indices' Global Industry Classification Standard (GICS) Methodology	GICS Methodology

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.

Eligibility Criteria

Each underlying index is screened on a monthly basis for compliance with the below Shariah-based rules by RI. Updates due to changes in compliance are applied once a month at the open of trading on the Monday following the third Friday of each month. Underlying index constituents passing these screens form the eligible universe for each index.

For generalized information on Ratings Intelligence and the Shariah screening process, please refer to the RI Web site at www.ratingsintelligence.com/shariah-screening.html.

Sector-Based Screens

Business activities related to the following are excluded:

1. Advertising
 - Advertisers of pork, alcohol, gambling, tobacco, conventional financial services, and all other non-Islamic activities
 - Advertising means and modes which contravene the tenets of Islam
2. Music, Pornography & Adult Entertainment
 - Producers, promoters, broadcasters and marketers, publishers of all types of adult entertainment/pornographic/explicit content. Games containing adult themes. Music content – videos or audio, cinemas, conventional movies and shows:
 - Exceptions:
 - News Channels
 - Newspapers
 - Sports Channels
 - Children’s Channels
 - Educational Channels
3. Alcohol (Brewers, distillers, packagers, wholesalers, transporters, and sellers)
4. Financial Services, except:
 - Islamic Banks
 - Islamic Financial Institutions
 - Islamic Insurance Companies
 - Defined as a company having:
 - Shariah Supervisory Board or Shariah scholar to supervise all activities
 - All products are Islamic
 - All investments and non-operating business activities of the company are Islamic
 - Passes accounting-based screens
5. Gambling
6. Pork related activities
7. Tobacco and electronic cigarettes/vaping products, including tobacco alternative products meant for consumption as tobacco.

8. Recreational cannabis, including products derived from cannabis used recreationally

Exception:

- o Cannabis-based products which are produced, sold and consumed under medical supervision for health reasons

9. Trading of gold and silver as cash on deferred basis

Revenue Share from Non-Compliant Activities. If a company derives less than 5% of its total business income from Operating Business non-permissible business sectors plus all kinds of interest income, this deviation may be tolerated, and the company will still be deemed to have passed the Level One Core Business Sector-Based Screens:

Operating Business Non-Permissible Income (including all Interest Incomes) / Total Business Income³ < 5%

During the selection process, each company's latest financial statement is reviewed to ensure that the company is not involved in any non-Shariah compliant activities, regardless of whether the latest statement is a quarterly, semi-annual, or annual statement. If the latest statement is available in all three of these frequencies an annual statement will likely be used, as these are more likely to be audited. Those that are found to be non-compliant are screened out. The above industries are not considered Shariah-compliant and would not be permissible for investment by Shariah compliant investors.

Accounting-Based Screen

After removing companies with non-compliant business activities, the remaining companies are examined for compliance with the leverage ratio on an ongoing basis.

Stocks deemed compliant at the prior evaluation period that exceed the maximum leverage ratio at the current evaluation period remain compliant if the ratio is within two percentage points of the maximum allowed. However, if the maximum is breached for three consecutive evaluation periods the stock will be deemed non-compliant. If the ratio is above the two-percentage point buffer limit, the stock is deemed non-compliant immediately.

Stocks deemed non-compliant at the prior evaluation period that pass the accounting-based screen at the current evaluation period remain non-compliant if the ratio is within two percentage points of the maximum allowed. However, if the stock satisfies the ratio for three consecutive evaluation periods, the stock will be deemed compliant.

Accounting-based screening is not applicable to companies which are run on a fully Shariah compliant basis and such companies shall be considered compliant. Such companies may be characterized by (the list below is indicative, non-exhaustive and reviewed on a case-by-case basis):

- Having a Shariah Supervisory Board
- All transactions (business and financial) are in accordance with Shariah principles
- Incorporated and managed in a fully Shariah compliant manner

Leverage Compliance calculates as follows:

Debt / Market Value of Equity (36-month average) < 33 %

Dividend Purification Ratio⁴ calculates as follows:

³ Total business income includes total operating income plus all forms of interest income (operating and non-operating).

⁴ This ratio is provided to investors for purification purposes and is not a compliance ratio.

Dividends * (Non-Permissible Revenue⁵ / Total Income⁶)

Index Eligibility

Except for the indices listed below, stocks are generally first constituents of an underlying index. The underlying index is screened for Shariah compliance, with only compliant stocks remaining in the Shariah index. The table below lists those indices in the family that are Shariah screens of an underlying index:

Index	Underlying Index
S&P 500 Shariah	S&P 500
S&P Europe 350 Shariah	S&P Europe 350
S&P Global 1200 Shariah	S&P Global 1200
S&P Japan 500 Shariah	S&P Japan 500
S&P/TOPIX 150 Shariah	S&P/TOPIX 150
S&P/TSX 60 Shariah	S&P/TSX 60
S&P/ASX 200 Shariah	S&P/ASX 200
S&P/ASX 300 Shariah	S&P/ASX 300
S&P GCC Shariah	S&P GCC
S&P Pan Arab Shariah	S&P Pan Arab
S&P Global BMI Shariah	S&P Global BMI
S&P Global Property Shariah	S&P Global Property
S&P Frontier BMI Shariah	S&P Frontier BMI
S&P BSE 500 Shariah	S&P BSE 500
S&P South Africa Composite Shariah	S&P South Africa Composite
S&P High Yield Dividend Aristocrats Shariah	S&P High Yield Dividend Aristocrats
S&P BRIC Shariah	S&P BRIC
S&P Global LargeMidCap ESG Shariah	S&P Global LargeMidCap ESG
S&P 500 ESG Shariah	S&P 500 ESG
S&P Europe 350 ESG Shariah	S&P Europe 350 ESG
S&P Global 1200 ESG Shariah	S&P Global 1200 ESG Index

Each of the underlying indices has its own eligibility criteria.

For details on the eligibility requirements of the underlying indices, please refer to their respective methodology documents.

The following indices in the index family are not simple Shariah screens of an underlying index.

S&P BRIC Shariah. Please refer to the index's methodology document for more information on the eligibility for this index.

S&P China LargeMidCap Shariah 10% Capped. The index universe consists of all the constituents of the S&P China LargeMidCap Index adjusted for any composition changes at each rebalancing.

S&P Global Infrastructure Shariah. The index universe consists of the eligible universe of the S&P Global Infrastructure Index.

For information on the rebalancing frequency of the S&P Global Infrastructure Index, please refer to S&P Dow Jones Indices' S&P Thematic Indices Methodology located on our Web site, www.spglobal.com/spdji.

S&P Pan Asia Shariah. The index universe consists of the top 15 largest components, as ranked by FMC, within each country of the S&P Pan Asia BMI, excluding Australia, Japan, and New Zealand, and is

⁵ Non-permissible revenue for dividend purification includes all forms of revenue or income from non-permissible business activities (e.g., alcohol sales, gambling revenue, etc.), all forms of interest income (operating and non-operating), income derived from such financial investments which are non-operating in nature, and non-operating income.

⁶ Total income includes total operating income, all forms of interest income (operating and non-operating), and non-operating income.

updated annually with a reference date as of the last business day of August. All stocks in the index universe are screened for Shariah compliance.

S&P 500 Shariah Industry Exclusions. The index universe consists of all the constituents in the S&P 500 Shariah, excluding companies classified as part of GICS sub-industries 20101010 (Aerospace & Defense), 40203040 (Financial Exchanges & Data), 40201060 (Transaction & Payment Processing Services).

S&P Global All Equity REIT Shariah Capped. The index universe consists of all constituents of the S&P Global BMI Shariah Index classified as part of the GICS Equity Real Estate Investment Trusts (REITs) Industry Group (GICS Code: 6010⁷).

S&P Global 1200 Shariah Information Technology (Sector) Capped. The index universe consists of all constituents of the S&P Global 1200 Shariah Index classified as part of the GICS Information Technology Sector (GICS Code: 45).

S&P DM Ex-U.S. & EM 50/50 Shariah Index. The index universe is all constituents of two underlying indices: the S&P Developed Ex-U.S. LargeMidCap Shariah and S&P Emerging LargeMidCap Shariah.

S&P Shariah Dividend Indices. To qualify for membership, a stock must satisfy the following criteria during the index rebalancing:

- Be a constituent of the respective underlying index as detailed in the table below.

Index	Underlying Index
S&P GCC Composite Shariah Dividend Index	S&P GCC Composite Shariah Index

- Have increased dividends or maintained stable dividends every year for at least three consecutive years.
- Have a maximum 100% and non-negative dividend payout ratio for new index constituents and a non-negative dividend payout ratio for existing index constituents.
 - The dividend payout ratio is calculated as the annual Dividend Per Share divided by the annual Earnings Per Share (EPS), using data from each company's most recent fiscal year as of the rebalancing reference date.
 - A dividend payout ratio is considered negative when the annual EPS is negative.
- Have an average daily value traded (ADVT) of at least US\$ 0.2 million for the three-months prior to the rebalancing reference date.

S&P Saudi Arabia Shariah 5/10/40 Capped Index. The index universe is all Shariah compliant constituents of the S&P Saudi Arabia Index, which considers foreign investment restrictions applicable to investors residing within the GCC region. The indices employ a capped market capitalization weighting scheme and specific capping methodology, defined in *Index Construction*.

S&P GCC Composite Shariah 5/10/40 Capped Index. The index universe is all Shariah compliant constituents of the S&P GCC Composite Index and reflects the FMC defined by foreign investment limits applicable to GCC residents. The indices employ a capped market capitalization weighting scheme and specific capping methodology, defined in *Index Construction*.

S&P Global 1200 Shariah Select. The index universe is all constituents of the S&P Global 1200 Shariah (the underlying index) domiciled and listed in countries with an FMC greater than or equal to 0.30% of the total underlying index country weight.

⁷ Prior to September 2016 the GICS Industry Code was 404020.

Index Construction

Approaches

S&P High Yield Dividend Aristocrats Shariah Index. The index calculates in the same manner as the S&P High Yield Dividend Aristocrats Index.

For information on the S&P High Yield Dividend Aristocrats Index, please refer to the S&P High Yield Dividend Aristocrats Index Methodology, available at www.spglobal.com/spdji.

S&P Shariah Dividend Indices. The indices calculate based on a non-market capitalization weighting scheme using the divisor methodology used in S&P Dow Jones' equity indices. Constituents are weighted based on IAD yield.

For more information on index calculations for the S&P High Yield Dividend Aristocrats Shariah Index and S&P Shariah Dividend Indices, please refer to the Non-Market Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

Constituent Selection

Except for the following indices, at each rebalancing each index selects all eligible stocks in the respective underlying index as constituents.

S&P Shariah Dividend Indices. At each rebalancing each index selects a target of 30 stocks, as ranked by IAD yield in descending order, subject to a minimum of two stocks per country if there are two or more eligible stocks from that country. The reference date for IAD yield and ADVT is after the close of the month prior to the rebalancing month. All dividend criteria are based on regular cash dividends as determined by S&P Dow Jones Indices.

Index Construction. At each rebalancing the index selects 30 constituents as follows:

1. Rank stocks in the index universe in descending order by IAD yield.
2. Select the highest ranking 25 stocks.
3. Select current constituents ranked within the top 35 until the target count reaches 30.
4. If, following Step 3, the target count has not been reached, iteratively select the next highest ranking stock in the index universe until the target constituent count is reached.

Additionally, If the number of eligible stocks is less than the target of 30, then constituents of the respective underlying index with a history of increased or stable dividends for more than two years, and satisfying all other index eligibility criteria, are added in decreasing order of IAD yield until the target constituent count of 30 stocks is reached. If the target constituent count is not met at this point the index can contain less than 30 companies.

S&P DM Ex-U.S. & EM 50/50 Shariah Index. At each rebalancing, the index selects a target of 250 constituents from among the largest, by FMC, of the companies in each of the underlying indices according to the following process:

1. Rank companies in the index universe in descending order by FMC.
2. Automatically select all companies ranked in the top 225.

3. Select all current constituent companies ranked in the top 275 until the 250 company target count has been reached.
4. If at this point the target constituent count is not reached, select the highest-ranking non-constituent, iteratively, until the target constituent count is satisfied.

S&P Global All Equity REIT Shariah Capped. At each rebalancing, the eligible stocks in the index universe are selected and form the index.

S&P Global 1200 Shariah Information Technology (Sector) Capped. At each rebalancing, the eligible stocks in the index universe are selected and form the index.

S&P Global 1200 Shariah Select. At each rebalancing, the index selects all stocks from the underlying index, adjusted for the underlying index's upcoming rebalancing, domiciled and listed in one of the eligible countries. Eligible countries are determined during the September Annual Country Eligibility Review.

September Annual Country Eligibility Review. Each September the list of eligible countries is generated and used for the following year's rebalancings. For example, the September 2024 list is used from the September 2025 rebalancing until the June 2026 rebalancing. The process is as follows:

1. Group all stocks in the underlying index by country of domicile and calculate each country's FMC weight as of the market open of the Monday following the third Friday of September.
2. Include all countries with an FMC greater than or equal to 0.30% (current countries 0.10%).⁸

Constituent Weightings

Except for the following indices, at each rebalancing, the indices are FMC weighted:

- **S&P Shariah Dividend Indices.** The indices are IAD yield weighted.
- **S&P DM Ex-U.S. & EM 50/50 Shariah.** The weight of all constituents from each underlying index are aggregated and proportionally rescaled such that each group of constituents have 50% of the total index weight. The constituent weighting process is as follows:
 1. Cluster constituents' FMC weights by underlying index.
 2. Divide cluster weight by 0.5 to obtain the underlying index factor divisors.
 3. Divide the constituents' original weights by the respective underlying index factor divisor to determine the final constituent weights.
- **S&P South Africa Composite Shariah Capped Index.** Constituents are FMC weighted, subject to a single constituent weight cap of 10% of the total index weight.
- **S&P China LargeMidCap Shariah 10% Capped Index and S&P Global Infrastructure Shariah.** Constituents are FMC weighted, subject to a cap of 10% of the total index weight.
- **S&P High Yield Dividend Aristocrats Shariah Index.** Constituents' weights flow through from the parent index, with any excess weight from non-compliant companies proportionally redistributed to all index components.
- **S&P Global All Equity REIT Shariah Capped Index.** Constituents are weighted according to the following process:
 1. With prices reflected on the rebalancing reference date, adjusted for any applicable corporate actions, and membership, shares outstanding, and IWFs as of the rebalancing effective date, each constituent is FMC weighted.

⁸ At launch, and for the entire launch year, the index applied a country weight requirement of 0.20%.

2. If any single constituent's weight exceeds 12%, cap the constituent's weight at 12%. Proportionally redistribute any excess weight to all uncapped constituents, and if necessary, repeat the process iteratively until no company breaches the company capping rule.
 3. If the aggregate weight of all constituents with weights greater than 4.9% exceeds 50% of the total index weight, then cap the aggregate weight of those constituents at 50%.
To perform the capping, rank all companies in descending order of their float-adjusted market capitalization weights and reduce the company with the smallest weight above 4.9% either until the rule is satisfied or it reaches 4.9%. Proportionally redistribute any excess weight to all uncapped constituents, and if necessary, repeat the process iteratively until the aggregate weight of all constituents with weights greater than 4.9% no longer exceeds 50%.
 4. Assign index share amounts to each constituent to arrive at the weights calculated above. Since index shares are assigned based on prices on the reference date, the actual weight of each constituent at the rebalancing differs somewhat from these weights due to market movements.
- **S&P Global 1200 Shariah Information Technology Capped Index.** At each rebalancing, constituents are weighted according to the following process:
 1. With prices reflected on the rebalancing reference date, adjusted for any applicable corporate actions, and membership, shares outstanding, and IWFs as of the rebalancing effective date, each constituent is FMC weighted.
 2. If any single constituent's weight exceeds 10%, cap the constituent's weight at 10%. Proportionally redistribute any excess weight to all uncapped constituents, and if necessary, repeat the process iteratively until no stock breaches the stock capping rule.
 3. Cap single country of domicile weights at 50%. Proportionally redistribute any excess weight to the remaining uncapped constituents.
 - **S&P Saudi Arabia Shariah 5/10/40 Capped Index and S&P GCC Composite Shariah 5/10/40 Capped Index.** At each rebalancing, the index FMC weights constituents, subject to the below constraints to ensure accordance with a 4.5/9/36 weighting scheme:
 - Cap single stock weights at 9%.
 - Cap the aggregate weight of all stocks with a weight greater than 4.5% at 36%.

For more information on index calculations, please refer to Method 1 in the Single Company and Concentration Limit Capping section of S&P Dow Jones Indices' Index Mathematics Methodology.

For more information on the capping thresholds, please refer to the Regulatory Capping Requirements section of S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Index Maintenance

Rebalancing

Except for the following indices, each index follows the respective underlying index's rebalancing schedule, with the index's reference universe the composition of the underlying index at the open of that index's upcoming rebalancing effective date.

S&P Shariah Dividend Indices. The indices reconstitute annually, effective after the last business day of July. At each rebalancing stocks are weighted and assigned index shares based on closing prices nine calendar days prior to the rebalancing effective date. Since index shares are assigned based on prices prior to the rebalancing, the actual weight of each stock at the rebalancing differs from these weights due to market movements.

S&P DM Ex-U.S. & EM 50/50 Shariah Index. The index reconstitutes annually, effective at the open of Monday following the third Friday in September. The reconstitution reference date for eligibility screening is the close of the third Friday in August. The reference date for prices used in the weighting process is the close of the Wednesday prior to the second Friday of the reconstitution month.

S&P South Africa Composite Shariah Capped Index. The index reconstitutes annually, effective at the open of the Monday following the third Friday in September, coinciding with the annual review of underlying index. In addition, the S&P South Africa Composite Shariah Capped is re-weighted on a quarterly basis, effective after the close of the third Friday in March, June, September, and December. The reference dates for constituent selection are the last trading day of February, May, August, and November.

S&P China LargeMidCap Shariah 10% Capped Index and S&P Global Infrastructure Shariah. The indices rebalance monthly, effective prior to the open of the Monday following the third Friday of the month. The reference date for prices used for the weighting process is after the close of the Wednesday prior to the second Friday of the rebalancing month.

S&P High Yield Dividend Aristocrats Shariah Index. The index reconstitutes annually, effective in January, coinciding with the annual review of the qualifying universe. The reference date for such additions and deletions is after the closing of the last trading date of December. Index constituent changes occur after the closing of the last business day of January. In addition, the index reweights in April, July, and October. Index constituent weight adjustments occur after the closing of the last business days of January, April, July, and October, based on indicated yield.

S&P Global All Equity REIT Shariah Capped Index and S&P Global 1200 Shariah Information Technology (Sector) Capped Index. The indices rebalance monthly, effective prior to the open of the Monday following the third Friday of the month. Updates due to changes in compliance are applied once a month at the open of trading of the Monday following the third Friday of each month. The reference date for prices used for the weighting process is after the close of the Wednesday prior to the second Friday of the rebalancing month.

S&P Saudi Arabia Shariah 5/10/40 Capped Index and S&P GCC Composite Shariah 5/10/40 Capped Index. The index rebalances monthly, effective at the open of the Monday following the third Friday of each month. Updates due to changes in compliance are applied once a month, at the open of trading on the Monday following the third Friday of each month. The reference date for prices used for the weighting process is after the close of the Wednesday prior to the second Friday of the rebalancing month.

S&P Global 1200 Shariah Select Index. The index rebalances quarterly, effective at the market open on the Monday following the third Friday of March, June, September, and December. As part of the rebalancing process constituent shares, weights, and any weighting factors, are updated. In addition, each stock's IWF is reviewed and updated as needed on an annual basis in September. Changes are announced after market close on the first Friday of the review month.

S&P Shariah Indices' constituents are also constituents of the underlying S&P Dow Jones Indices' global indices. As such, specific changes to index constituents – such as share changes, IWF changes, dividend distributions, price adjustments, etc. – follow the policy of the respective regional index.

Deletions

S&P Shariah Dividend Indices. An index constituent deleted from the respective underlying index (due to a corporate action, monthly Shariah compliance review, etc.), is simultaneously removed from the respective S&P Shariah Dividend Index.

The composition of each S&P Shariah Dividend Index is also reviewed in January, April, and October, where constituents are screened to ensure continuous payment of dividends. Any index constituent which has omitted its most recent dividend is removed from the index. If the number of constituents is less than 25, the index undergoes a rebalancing using the same criteria as the regular annual rebalancing. In such cases, the rebalancings are implemented after the close of the last business day of January, April, and October. The reference date for the universe and ADVT is the close of the month prior to the rebalancing month. The reference date for all other data is the close of the month prior to the July rebalancing.

S&P DM Ex-U.S. & EM 50/50 Shariah Index and S&P Global 1200 Shariah Select Index. Except for monthly Shariah compliance removals, constituents removed from the underlying index remain in the index until evaluated for continued inclusion at the subsequent rebalancing.

Corporate Actions

Spin-offs. For all indices covered in this methodology, spin-offs are added at a zero price at the market close of the day before the ex-date (with no divisor adjustment) and are removed after at least one day of regular way trading (with a divisor adjustment), regardless of Shariah compliance. Where applicable, all deletions from the parent index are deleted from the Shariah-compliant index on the same day.

GICS Reclassification. For the S&P Global All Equity REIT Shariah Capped and S&P Global 1200 Shariah Information Technology (Sector) Capped, an index constituent may be added to or removed from the indices when a GICS reclassification is made. The addition or removal is simultaneous with the reclassification. Any addition not coinciding with a reweighting effective date will be added to the index with an AWF of 1.

Index-Specific Corporate Action Treatment. Except for the indices listed below, corporate action treatment is detailed in the Market Capitalization Indices section of S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology:

- S&P Global Infrastructure Shariah
- S&P Shariah Dividend Indices
- S&P High Yield Dividend Aristocrats Shariah Index
- S&P BSE 500 Shariah
- S&P BRIC Shariah

For the indices listed above, please refer to the Non-Market Capitalization Indices section of S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Investable Weight Factor (IWF)

For information on IWFs, please refer to S&P Dow Jones Indices' Float Adjustment Methodology.

Currency of Calculation and Additional Index Return Series

Except for the indices listed below, WMR foreign exchange rates are taken daily at 4:00 PM London time and used in the calculation of the indices. These mid-market fixings are calculated by WMR based on LSEG data and appear on LSEG pages.

S&P Japan 500 Shariah and the S&P/TOPIX 150 Shariah. Real-time spot Forex rates, as supplied by LSEG, are used for ongoing index calculations. The end-of-day values of the indices calculate using the real-time spot exchange rate provided by LSEG.

In addition to the indices detailed in this methodology, additional return series versions of the indices may be available, including, but not limited to: currency, currency hedged, decrement, fair value, inverse, leveraged, and risk control versions. For a list of available indices, please refer to the [S&P DJI Methodology & Regulatory Status Database](#).

For information on various index calculations, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

For the inputs necessary to calculate certain types of indices, including decrement, dynamic hedged, fair value, and risk control indices, please refer to the Parameters documents available at www.spglobal.com/spdji.

Base Dates and History Availability

Index history availability, base dates, and base values are shown in the table below.

Index	Launch Date	First Value Date	Base Date	Base Value
S&P 500 Shariah	12/19/2006	12/29/2000	12/29/2000	1000
S&P Europe 350 Shariah	12/19/2006	12/29/2000	12/29/2000	1000
S&P Global 1200 Shariah	03/19/2014	12/31/2007	12/31/2007	1000
S&P Japan 500 Shariah	12/19/2006	12/29/2000	12/29/2000	1000

Index Data

Calculation Return Types

S&P Dow Jones Indices calculates multiple return types which vary based on the treatment of regular cash dividends. The classification of regular cash dividends is determined by S&P Dow Jones Indices.

- Price Return (PR) versions are calculated without adjustments for regular cash dividends.
- Gross Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date without consideration for withholding taxes.
- Net Total Return (NTR) versions, if available, reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of all three indices will be identical.

For a complete list of indices available, please refer to the daily index levels file (“SDL”).

For more information on the classification of regular versus special cash dividends as well as the tax rates used in the calculation of net return, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

For more information on the calculation of return types, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.

Index Governance

Index Committee

The S&P/TSX Canadian Index Committee maintains the S&P/TSX 60 Shariah. S&P Dow Jones Indices' chairs the Index Committee, which is composed of four members representing S&P Dow Jones Indices and three members representing the TMX.

The S&P/ASX Equity Indices Committee maintains the S&P/ASX 200 and 300 Shariah. S&P Dow Jones Indices' chairs the Index Committee, which is composed of five voting members representing both S&P Dow Jones Indices and the Australian Securities Exchange.

An S&P Dow Jones Indices Index Committee maintains the remaining indices. All committee members are full-time professional members of S&P Dow Jones Indices' staff.

All committees meet regularly. At each meeting, the Index Committees may review pending corporate actions that may affect index constituents, statistics comparing the composition of the indices to the market, companies that are being considered as candidates for addition to an index, and any significant market events.

In addition, the Index Committees may revise index policy covering rules for selecting companies, treatment of dividends, share counts or other matters. S&P Dow Jones Indices considers information about changes to its indices and related matters to be potentially market moving and material. Therefore, all Index Committee discussions are confidential.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committees review the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Index Policy

Announcements

All index constituents are evaluated daily for data needed to calculate index levels and returns. All events affecting the daily index calculation are typically announced in advance via the Index Corporate Events report (.SDE), delivered daily to all clients. Any unusual treatment of a corporate action or short notice of an event may be communicated via email to clients.

Pro-forma Files

In addition to the corporate events file (.SDE), S&P Dow Jones Indices provides constituent pro-forma files for select indices each time the indices rebalance. The pro-forma file is typically provided daily in advance of the rebalancing date and it contains all constituents and their corresponding weights and index shares effective for the upcoming rebalancing.

Please visit www.spglobal.com/spdji for a complete schedule of rebalancing timelines and pro-forma delivery times.

Holiday Schedule

Single country indices (e.g., S&P 500 Shariah, S&P Japan 500 Shariah) follow the national holiday schedule in each country.

S&P Europe 350 Shariah. The index calculates on all days of the year except when all the component markets are closed.

A complete holiday schedule for the year is available on S&P Dow Jones Indices' Web site at www.spglobal.com/spdji.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures

For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Recalculation Policy

For information on the recalculation policy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.

Index Dissemination

Daily index values, corporate actions, index weights and portfolios can be received via S&P Dow Jones Indices' FTP site.

Tickers

The table below lists headline indices covered by this document. All versions of the below indices that may exist are also covered by this document. Please refer to the [S&P DJI Methodology & Regulatory Status Database](#) for a complete list of indices covered by this document.

Appendix

Methodology Changes

Methodology changes since January 1, 2015, are as follows:

Change	Effective Date (After Close)	Previous	Methodology Updated
S&P World Index: Index Name	02/26/2024	The index name is S&P Developed Ex-Korea LargeMidcap Shariah.	The index name is S&P World Shariah.
Sector-Based Screens	09/15/2023	Revenue Share from Non-Compliant Activities. If a company derives less than 5% of its total business income (excluding non-operating Interest Income) from non-permissible business sectors, this deviation may be tolerated, and the company will still be deemed to have passed the Level One Core Business Sector-Based Screens: Non-Permissible Income (excluding Non-Operating Interest Income) / Revenue < 5%	Revenue Share from Non-Compliant Activities. If a company derives less than 5% of its total business income from non-permissible business sectors, this deviation may be tolerated, and the company will still be deemed to have passed the Level One Core Business Sector-Based Screens: Non-Permissible Income (including all Interest Incomes) / Revenue < 5%
Accounting-Based Screen	09/15/2023	<p>After removing companies with non-compliant business activities, the remaining companies are examined for compliance with certain financial ratios. Three areas of focus are leverage, cash, and the share of revenues derived from non-compliant activities. All of these are subject to evaluation on an ongoing basis.</p> <p>Stocks deemed compliant at the prior evaluation period that exceed the maximum ratio for any accounting-based screen at the current evaluation period remain compliant if the ratio is within two percentage points of the maximum allowed. However, if the maximum is breached for three consecutive evaluation periods the stock will be deemed non-compliant. If any of the ratios are above the two-percentage point buffer limit, the stock is deemed non-compliant immediately.</p> <p>Stocks deemed non-compliant at the prior evaluation period that pass all accounting-based screens at the current evaluation period remain non-compliant if any ratio is within two percentage points of the maximum allowed. However, if the stock satisfies all three ratios for three consecutive evaluation periods the stock will be deemed compliant. If all three ratios are below the two-percentage point buffer limit, the stock is deemed compliant immediately.</p> <p>Such accounting-based screens are not applicable to companies which are run on a fully Shariah compliant basis and such companies shall be considered compliant. Performance Disclosure/Back-Tested Data

Where applicable, S&P Dow Jones Indices and its index-related affiliates (“S&P DJI”) defines various dates to assist our clients by providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the index is set to a fixed value for calculation purposes. The Launch Date designates the date when the values of an index are first considered live: index values provided for any date or time period prior to the index’s Launch Date are considered back-tested. S&P DJI defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company’s public website or its data feed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed “Date of introduction”) is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index’s public release date.

Please refer to the methodology for the Index for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations.

Information presented prior to an index’s launch date is hypothetical back-tested performance, not actual performance, and is based on the index methodology in effect on the launch date. However, when creating back-tested history for periods of market anomalies or other periods that do not reflect the general current market environment, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market the index is designed to measure or strategy the index is designed to capture. For example, market capitalization and liquidity thresholds may be reduced. In addition, forks have not been factored into the back-test data with respect to the S&P Cryptocurrency Indices. For the S&P Cryptocurrency Top 5 & 10 Equal Weight Indices, the custody element of the methodology was not considered; the back-test history is based on the index constituents that meet the custody element as of the Launch Date. Also, the treatment of corporate actions in back-tested performance may differ from treatment for live indices due to limitations in replicating index management decisions. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias. Actual returns may differ significantly from, and be lower than, back-tested returns. Past performance is not an indication or guarantee of future results.

Typically, when S&P DJI creates back-tested index data, S&P DJI uses actual historical constituent-level data (e.g., historical price, market capitalization, and corporate action data) in its calculations. As ESG investing is still in early stages of development, certain datapoints used to calculate certain ESG indices may not be available for the entire desired period of back-tested history. The same data availability issue could be true for other indices as well. In cases when actual data is not available for all relevant historical periods, S&P DJI may employ a process of using “Backward Data Assumption” (or pulling back) of ESG data for the calculation of back-tested historical performance. “Backward Data Assumption” is a process that applies the earliest actual live data point available for an index constituent company to all prior historical instances in the index performance. For example, Backward Data Assumption inherently assumes that companies currently not involved in a specific business activity (also known as “product involvement”) were never involved historically and similarly also assumes that companies currently involved in a specific business activity were involved historically too. The Backward Data Assumption allows the hypothetical back-test to be extended over more historical years than would be feasible using only actual data. For more information on “Backward Data Assumption” please refer to the FAQ. The methodology and factsheets of any index that employs backward assumption in the back-tested history

will explicitly state so. The methodology will include an Appendix with a table setting forth the specific data points and relevant time period for which backward projected data was used. Index returns shown do not represent the results of actual trading of investable assets/securities. S&P DJI maintains the index and calculates the index levels and performance shown or discussed but does not manage any assets.

Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three-year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

ESG Indices Disclaimer

S&P DJI provides indices that seek to select, exclude, and/or weight index constituents based on, but not limited to, certain environmental, social or governance (ESG) indicators, or a combination of those indicators, including the following: environmental indicators (including the efficient use of natural resources, the production of waste, greenhouse gas emissions, or impact on biodiversity); social indicators (such as, inequality and investment in human capital); governance indicators (such as sound management structures, employee relations, remuneration of staff, tax compliance, respect for human rights, anti-corruption and anti-bribery matters), specific sustainability or values-related company involvement indicators (for example, production/distribution of controversial weapons, tobacco products, or thermal coal), or controversies monitoring (including research of media outlets to identify companies involved in ESG-related incidents).

S&P DJI ESG indices use ESG metrics and scores in the selection and/or weighting of index constituents. ESG scores or ratings seek to measure or evaluate a company's, or an asset's, performance with respect to environmental, social and corporate governance issues.

The ESG scores, ratings, and other data used in S&P DJI ESG indices is supplied directly or indirectly by third parties (note these parties can be independent affiliates of S&P Global or unaffiliated entities) so an S&P DJI ESG index's ability to reflect ESG factors depends on these third parties' data accuracy and availability.

ESG scores, ratings, and other data may be reported (meaning that the data is provided as disclosed by companies, or an asset, or as made publicly available), modelled (meaning that the data is derived using a proprietary modelling process with only proxies used in the creation of the data), or reported and modelled (meaning that the data is either a mix of reported and modelled data or is derived from the vendor using reported data /information in a proprietary scoring or determination process).

ESG scores, ratings, and other data, whether from an external and/or internal source, is based on a qualitative and judgmental assessment, especially in the absence of well-defined market standards, and due to the existence of multiple approaches and methodologies to assess ESG factors and considerations. An element of subjectivity and discretion is therefore inherent in any ESG score, rating, or other data and different ESG scoring, rating, and/or data sources may use different ESG assessment or estimation methodologies. Different persons (including ESG data ratings, or scoring providers, index administrators or users) may arrive at different conclusions regarding the sustainability or impact of a particular company, asset, or index.

Where an index uses ESG scores, ratings or other data supplied directly or indirectly by third parties, S&P DJI does not accept responsibility for the accuracy of completeness of such ESG scores, ratings, or data.

No single clear, definitive test or framework (legal, regulatory, or otherwise) exists to determine 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. In the absence of well-defined market standards and due to the existence of multitude approaches, the exercise of judgment is necessary. Accordingly, different persons may classify the same investment, product and/or strategy differently regarding 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. Furthermore, the legal and/or market position on what constitutes an 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives may change over time, especially as further regulatory or industry rules and guidance are issued and the ESG sustainable finance framework becomes more sophisticated.

Prospective users of an S&P DJI ESG Index are encouraged to read the relevant index methodology and related disclosures carefully to determine whether the index is suitable for their potential use case or investment objective.
