### SUMMARY

Should investment results be attributed to skill or to luck? Genuine skill is likely to persist, while luck is random and fleeting. Thus, one measure of skill is the consistency of a fund's performance relative to its peers or to its benchmark. The Persistence Scorecard shows that **regardless of asset class or style focus, active management outperformance is typically short-lived**, with few funds consistently outranking their peers or benchmarks.

Recent years illustrate this point quite well. Exhibit 1 shows that the top-quartile funds of 2019 often continued to lead the way in 2020. Had these funds developed a consistent winning strategy? Sadly, no. Even with the bull market extending into 2021, these funds quickly reverted to the mean, and **only 2.2% of the 2019 domestic equity winners remained in the top quartile by 2021** (see Report 1 a).

**Exhibit 1: The Top-Quartile Funds of 2019 Extended Their Success into 2020, but Fell Short of Their Peers in 2021**

Source: S&P Dow Jones Indices LLC, CRSP. Data as of Dec. 31, 2021. Chart is provided for illustrative purposes. Past performance is no guarantee of future results.

If we extend the time horizon to five years, the picture looks still more bleak. Even selecting for the category with the highest observed persistence, just 3.5% of large-cap funds stayed in the top quartile each year. Mid-cap and small-cap funds displayed poorer persistence across all horizons, with no small-cap fund remaining in the top quartile for five years (see Report 2).

Some statistically minded readers might note that these numbers are occasionally better than what would be expected if fund performance were randomly distributed. For example, the odds that a top-quartile fund in one year could remain in the top quartile for the next four consecutive years might be calculated as  $(25\%)^4 = 0.39\%$ , and the 3.5% referenced previously is substantially better than that.<sup>1</sup> **While the persistence report does not prove that fund performance is completely random, from a practical or decision-making perspective, it reinforces the notion that choosing between active funds on the basis of previous outperformance is likely a misguided strategy.** After all, there remains a 96.5% chance that a top-quartile fund will not stay in the top quartile consistently for the next four years.

Another way of evaluating performance persistence is by comparing performance against fund benchmarks, rather than against peer groups. Any fund alpha quickly proved fleeting viewed under this lens as well. For example, out of 791 large-cap equity funds, 232 (29.33%) beat the [S&P 500®](#) in 2019. As might be expected from the previous statistics, there was significant follow-on for 2020, with 174 of those 232 (75.0%) continuing to put up positive alpha for the next year. Fast-forward to the end of 2021, and only 21 funds (9.1%) repeated their outperformance over the benchmark (see Report 1b).<sup>2</sup>

**Exhibit 2: Past Performance Is No Guarantee of Future Results**

Source: S&P Dow Jones Indices LLC, CRSP. Data as of Dec. 31, 2021. Chart is provided for illustrative purposes. Past performance is no guarantee of future results.

Unsurprisingly, **the one pattern that did hold across equity funds was the tendency of the poorest-performing funds to close.** Fourth-quartile funds were almost always the most likely to merge or liquidate over the subsequent three- and five-year windows, as 142 out of the 484 All Domestic Funds (29.3%) classed as bottom quartile from the December 2011–December 2016 period closed their doors within the next five years (see Report 5).

Fixed income funds showed results similar to equities, as strong one-year persistence soon reversed course. **In 11 of the 13 categories considered, not a single top-quartile fund from 2017 maintained that status annually through 2021.** Across all fixed income categories, a nearly identical 28.9% (63 out of 218 funds) of bottom-quartile funds from the December 2011–December 2016 period were consigned to the history books within five years (see Reports 8 and 11).

<sup>1</sup> Similarly, having none of the 131 small-cap funds repeating in the top quartile is quite reasonable: only  $0.39\% * 131 = 0.52$  funds “should have” done so if performance was randomly distributed.

<sup>2</sup> Previous SPIVA® U.S. Scorecards showed that 42.9% and 20.4% of all domestic funds outperformed in 2020 and 2021, respectively. One might thus expect a  $42.9\% * 20.4\% = 8.8\%$  chance of randomly picking a fund that would outperform for two consecutive years, slightly higher than the 7.3% realized—reinforcing the notion that fund alpha is likely fleeting.

## ABOUT THE PERSISTENCE SCORECARD

The phrase “past performance is no guarantee of future results” (or some variation thereof) can be found in the fine print of most mutual fund literature. Yet many investors and advisors consider past performance and related metrics to be important factors in fund selection. So does past performance really matter?

To answer this question, the semiannual S&P Persistence Scorecard tracks the degree to which historical relative performance predicts future relative performance. As in our widely followed SPIVA Scorecards, the University of Chicago’s Center for Research in Security Prices (CRSP) Survivorship Bias Free Mutual Fund Database serves as our underlying data source.

S&P Dow Jones Indices is one of the world’s leading index providers, maintaining a wide variety of investable and benchmark indices to meet an array of investor needs. Our Global Research & Design team is dedicated to conducting unbiased, in-depth analysis on a broad range of topics and issues facing investors in today’s marketplace. This scorecard highlights performance persistence over three and five consecutive 12-month periods and two non-overlapping three- and five-year periods.

Key features of the S&P Persistence Scorecard include:

- **Historical rankings without survivorship bias:** For anyone making an investment decision, all funds available at the time of that decision are part of the initial opportunity set. Ignoring funds that liquidate or merge during a period of study biases measurements of persistence. Using the CRSP database, the S&P Persistence Scorecard ranks all funds available at each point in time and tracks the top-quartile and top-half performers throughout the time period.
- **Clean universe:** The mutual fund universe used in these reports comprises actively managed domestic U.S. equity funds. Index funds, sector funds, and index-based dynamic (bull or bear) funds are excluded from the sample. To avoid double counting multiple share classes, only the share class with the highest previous period return of each fund is used.
- **Transition matrices:** Transition matrices show the movements between quartiles and halves over non-overlapping three- and five-year periods. They also track the percentage of funds that have merged or liquidated. In addition, we monitor movements across capitalization levels. This helps us capture, for example, the conversion of some large-cap funds to mid- and small-cap funds.
  - Starting with the Persistence Scorecard Year-End 2019, the style change calculation includes funds that changed fund categories at any point between the relevant start and end dates. Previously, this calculation only checked if the fund category remained identical at the endpoints.
- **Tracking reports of top performers:** The tracking reports show the percentages of funds that remain in the top-quartile or top-half rankings over consecutive three- and five-year periods.

## REPORTS

### Report 1a: Performance Persistence of Domestic Equity Funds over Three Consecutive 12-Month Periods

FUND CATEGORY	FUND COUNT AT START (DECEMBER 2019)	PERCENTAGE REMAINING IN TOP QUARTILE	
		DECEMBER 2020	DECEMBER 2021
<b>TOP QUARTILE</b>			
All Domestic Funds	506	55.53	2.17
All Large-Cap Funds	175	58.29	6.86

S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. S&P Dow Jones Indices LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

These materials have been prepared solely for informational purposes based upon information generally available to the public and from sources believed to be reliable. No content contained in these materials (including index data, ratings, credit-related analyses and data, research, valuations, model, software or other application or output therefrom) or any part thereof ("Content") may be modified, reverse-engineered, reproduced or distributed in any form or by any means, or stored in a database or retrieval system, without the prior written permission of S&P Dow Jones Indices. The Content shall not be used for any unlawful or unauthorized purposes. S&P Dow Jones Indices and its third-party data providers and licensors (collectively "S&P Dow Jones Indices Parties") do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Dow Jones Indices Parties are not responsible for any errors or omissions, regardless of the cause, for the results obtained from the use of the Content. THE CONTENT IS PROVIDED ON AN "AS IS" BASIS. S&P DOW JONES INDICES PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Dow Jones Indices Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of the Content even if advised of the possibility of such damages.

S&P Global keeps certain activities of its various divisions and business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.
